

NEELAMBIGAI VENKATESH

Automation and Performance Test Lead

 nellambigai@gmail.com

 +91 893932843

SKILLS

- **Tools/IDE:** Apache JMeter, QALoad, JIRA, Soap UI, Kibana, OpenShift, Sauce Labs, qTest
- **Monitoring Tools :** AppDynamics, Visual Monitoring, JConsole for JVM, nmon for Server CPU
- **Databases:** SQL, MySQL
- **Methodologies :** Agile
- **Continuous Integration Tool:** Jenkins, Selenium WebDriver
- **Agile Framework :** Scrum
- **Operating Systems :** Windows
- **Programming Languages :** Java, HTML

CERTIFICATIONS

- ISTQB Certified Tester Foundation Level (CTFL)
- Java - Oracle Certified Java SE8 Programmer

EDUCATION

Sri Manakula Vinayagar Engineering College
Puducherry, India • 06/2015

B.Tech
9.3 CGPA

PROFESSIONAL SUMMARY

Adept at leading testing teams at TCS, I excel in both manual and automated testing, enhancing product quality through meticulous test script development in Selenium and performance tuning. My expertise in Agile methodologies and Java programming, coupled with a knack for mentoring, drives project success and fosters team growth.

EXPERIENCE SUMMARY

- As a performance tester, honed skills in writing and executing load, stress, and performance tests using tools like JMeter and QALoad. Adept at identifying bottlenecks on client and server sides, with experience monitoring systems during load test execution. Possess strong understanding of STLC and SDLC, and expertise in analyzing system performance using tools such as AWR-DB analysis, NMON files, and AppDynamics.
- As an automation tester and lead with 5.5 years of experience, successfully implemented Selenium Test Automation Frameworks, developed test scripts in Java using Selenium Web Driver, and performed regression testing. Skilled in creating test scenarios, test cases, and analyzing script results. Excellent communication and leadership skills, thrive in project-oriented environments, excel at finding creative solutions for challenging client needs. Proficient in SQL queries and experience with Jira for bug tracking make a well-rounded professional in Agile Testing.

WORK HISTORY

TCS - Automation Tester/Lead

09/2018 - Current

Worked as Manual, Automation and Functional Tester.

As a Quality Analyst, responsibilities undertaken:

- Mentoring and undertaking new features
- Writing use-cases as per the requirements gathered and collating required data.
- Developed the Automation Test Scripts in Selenium Web Driver
- using Java, based on the design pattern Page Object Model and used Data Driven Framework for reusability.
- Reviewing the test reports using the TestNG framework.
- Investigating/Analyzing automation failures.
- Used Gradle as the build tool, and JIRA as a defect tracking tool.
- Responsible for updating and maintenance of existing selenium scripts. Used qTest for test execution and Eclipse IDE for running scripts.
- Used SQL to fetch data from tables, generate documents.
- Generated documents through Kafka batch process and validated.

TCS - Performance Tester/Lead

Chennai, India • 04/2015 - 09/2018

- Responsible for defining the scope of the project gathering performance impacted business requirements and documents them textually
- Execute various test runs like Load, Stress, Endurance and Fail Over as per test plan Gather performance statistics on various layers of the application. Analyze the performance statistics and provide interim report after each test run
- Worked on creating scripts for different protocols like web, web services (XML, SOAP) and Test API
- Involved in studying the Application/Data Base server statistics and determine the capacity on the system.
- Performance fine-tuning and recommendation using AWR and NMON files analysis
- Recommended changes to system capacity/performance using quantitative methods, statistical data and historical performance data, defining and managing system tuning and workload balance
- Preparation of High-Level Estimate (HLE), High Level Scenarios (HLS), Test Strategy, Test Planning Document, Test Exit report to stake holders.
