| a.nishanth78@gmail.com

| Bangalore

PROFILE SUMMARY

A seasoned Software Test Manager with a rich background spanning more than 19 years in QA and Testing, specializing in spearheading Software Testing leadership. Profound expertise encompasses Agile, Scrum, and SDLC methodologies, steering advancements in both manual and automated testing. Acknowledged for leading transformative initiatives at industry titans such as NetApp, Broadcom, and CA Technologies.

SKILLS

Application Proficiency

Cypress, Ansible, Selenium, Python, Jenkins, GitLab CI/CD, Postman

Cyber Security

Nmap, Qualys, Wireshark, Burp Suit

Cloud Computing

Microsoft Azure, AWS

Software Release Management

Version Control, Change Management, Release Notes

Process and Workflows

Agile / Scrum, JIRA, Confluence, HP Quality Center, Bugzilla, Testrail

Leadership

Test Planning, Resource & Risk Management, Conflict Resolution.

Educational Qualification

MBA - Information Technology
Madurai Kamaraj University

Certification

CSM - Certified Scrum Master
JIRA - Certified

WORK EXPERIENCE

Securitaz, Bangalore (San Radiance)

Engineering QA Manager

2020 - 2024

Management Vision and Team Development:

- Managing a team of 16 engineers, overseeing their professional growth through effective goal-setting,
- Conduct regular performance appraisals, coaching sessions to nurture individual talents and improve team cohesion.
- Led a multifaceted team in developing and enhancing diverse software products, overseeing multiple projects concurrently to meet stringent deadlines.
- Managed relationships with external partners and suppliers, setting clear expectations for deliverables and quality, facilitating seamless communication between in-house teams and external resources, ensuring project success and cost-effectiveness.

Technical Innovation:

- Conducted and supervised Quality Assurance testing for Cloud based solution called Pollux (Azure and AWS) using Postman for API Testing and Integration
- Implemented and optimized CI/CD pipelines to streamline the software development lifecycle, ensuring efficient and reliable delivery of high-quality software products.
- Oversaw planning, tracking, and execution of testing activities aligned with Agile methodologies, ensuring rapid product development within a fast-paced environment using JIRA
- Spearheaded the development of a test framework using Python and Cypress, enabling comprehensive automation. Managed and successfully released a web-based application,
- Orchestrating end-to-end test planning, and automation using Cypress, ensuring top-quality deliverables.
- Utilized Postman to conduct security-related tests such as input validation, authentication checks, and authorization verification, ensuring the robustness of APIs against potential vulnerabilities and threats..

Lecturer, Freelancer

2018 – 2020

- Delivered educational sessions on Cloud computing to students through lectures, presentations, and hands-on demonstrations across multiple academic institutions such as SLCS and Fatima Engineering College.
- Facilitated private sessions specifically focused on storage technology, covering NetApp ONTAP and Commvault, ensuring a customized learning experience for participants seeking targeted expertise in these storage solutions.
- Organized seminars focusing on Cloud computing and Cybersecurity, frequently integrating live demonstrations to illustrate concepts effectively.
- Collaborated with educational institutions to enrich their curriculum by incorporating cutting-edge topics like Cloud computing and Cybersecurity, ensuring students stay updated with the latest technological advancements.
- Ran private classes and workshops dedicated to Cloud computing platforms like Microsoft Azure and AWS, offering personalized instruction and tailored content to meet individual or specialized group needs.
- Provided career guidance consultations within the Information Technology domain, engaging with various institutions to advise students on potential career paths and opportunities.

Cloudbyte, Bangalore

2014 – 2017

Engineering QA Manager

Management Vision and Team Development

- Initiated and built a team from inception, providing coaching, guidance, and mentorship to foster professional growth.
- Successfully scaled the team to exceed 30 engineers, steering them towards heightened performance and elevating product quality.
- Instituted quarterly one-on-one goal-setting sessions, aligning individual objectives with the company's vision.
- Spearheaded proactive initiatives to identify areas for process optimization and cost reduction, implementing strategies that improved operational efficiency and maximized resource utilization.

Technical Innovation :

- Demonstrated expertise in tracking and analyzing key quality assurance metrics for Cloud based Storage solution called Elastistore enhancing product reliability through meticulous defect analysis and resolution using Bugzilla
- Optimized CI/CD pipelines, employing Ansible for backend automation and Cypress for frontend validation, facilitating accelerated software development lifecycles, and enabling swift and dependable delivery of high-quality software products.
- Evaluated and verified the functionality of Application in system testing phase, along with endurance tests, ensuring product resilience under sustained operational conditions.

Broadcom, Bangalore

2012 – 2014

SW Test Engineering Manager 2

Management Vision and Team Development

- Successfully retained 11 team members amidst a mass exodus to a competitor by implementing strategic measures to address salary discrepancies.
- Enhanced project efficiency through the adoption of Agile Scrum methodologies, optimizing deliverables and streamlining sprint cycles.
- Led a multifaceted team in developing and enhancing diverse software products, overseeing multiple projects concurrently to meet stringent deadlines, ensuring alignment with budgetary constraints and organizational objectives.
- Spearheaded proactive initiatives to identify areas for process optimization and cost reduction, implementing strategies that improved operational efficiency and maximized resource utilization.

Technical Innovation and Quality Assurance:

- Demonstrated proficiency in handling end-to-end projects involving Firmware testing for Storage HBA and Software, incorporating VLSI components for complex deliverables.
- Innovated an automated sanity testing process integrated with the build server, optimizing QA efforts and expediting responses to failed builds.
- Led teams in devising and executing test plans, including regression, integration, and compatibility testing, to validate firmware functionalities across multiple hardware platforms and ensure product stability.
- Used firmware testing tools and frameworks JTAG, boundary scan, In-Circuit Emulators to perform low-level testing and debugging of embedded systems, enhancing test efficiency and accuracy.

NetApp, Bangalore / US

Manager Quality Assurance

2006 – 2012

Management Vision and Team Development

- Spearheaded the formation of the NetApp Interoperability Team with 14 Engineers, focusing on the development of a web application-centric platform for managing NetApp ONTAP NAS \ SAN Filer and Virtual Tape Library
- Fostered robust customer relations by personally delivering over 25 product demonstrations via the web application, playing a pivotal role in enhancing customer engagement and contributing to successful sales closures.
- Provided comprehensive leadership in people management, including hiring, performance monitoring, coaching, and career development for direct reports.
- Led a multifaceted team in developing and enhancing diverse software products, overseeing multiple projects concurrently to meet stringent deadlines, ensuring alignment with budgetary constraints and organizational objectives.
- Spearheaded proactive initiatives to identify areas for process optimization and cost reduction, implementing strategies that improved operational efficiency and maximized resource utilization.

Technical Innovation and Quality Assurance:

- Ensured the seamless integration of the developed web application with 3rd Party Hardware, including Tape Libraries and Backup Software, to enhance interoperability and usability.
- Introduced an automation framework within the web application utilizing Cypress for frontend testing and Python for backend automation, streamlining testing procedures, ensuring efficiency.
- Skillfully directed the transition of Metro-cluster product testing operations from Sunnyvale to Bangalore,
- Led the oversight of an extensive support matrix for the entire product line, ensuring comprehensive assistance and swift issue resolution for customers, thereby optimizing user experience.
- Established the NetApp Metrocluster Product line within the web application framework from inception, showcasing adeptness in talent acquisition and resource management strategies to ensure successful product development.

CA Technologies, Chennai

Sr QA Engineer

2000 – 2006

- Sole contributor in the CA Chennai team for SAN technology, serving as a mentor for both the team and new hires on Qlogic, HBAs, SAN Manager, Brocade, and Cisco switches.
- Provided leadership in test-planning, conducted thorough test case reviews, efficiently allocated resources, and meticulously scheduled timelines. Ensured seamless execution and progress reporting through weekly status updates.
- Led the QA team in functional and interoperability testing, fostering close collaboration with 3rd-party hardware vendors including EMC Centra, IBM DS Series Storage Arrays, Brocade, Mc Data, Cisco SAN Switches, and various tape libraries.
- Managed customer escalations, showcasing expertise in issue reproduction, patch testing, and proficiently delivering DOT releases alongside the main product release cycle, following the waterfall model.
