PROFESSIONAL SUMMARY

- **4.3 Years** of industry experience in software testing in automation testing.
- Extensive working experience in all phases of **software development life cycle (SDLC)**, and its methodologies such as agile, and scrum.
- Well-versed in **Test Planning, Test Case Design and defect management**.
- Having good knowledge of the **Maven tool**.
- Good in preparing Test Scenarios and Feature Files.
- Good in preparing the selenium automation test scripts with **Java** for automating the web-based applications for the given user stories.
- Experience in working with defect management tools like **Jira**.
- Good Experience in Source Code Management Tool **GIT**.
- Knowledge of different levels of testing (**Unit Testing, Integration Testing, System Testing and Acceptance Testing**).
- Good knowledge on **Object-Oriented Programming(oops)** concept.
- Extensively used Java for test case automation.
- Experience in **POM design pattern, JUnit, TestNG, BDD(Cucumber) framework and Data Driven Framework**.
- Testing for improper access control in API requests using **Rest assured API**.
- Strong knowledge in using HTTP Methods like **GET, PUT, POST and DELETE**.
- Test scripts can be added to verify response data and status codes using **Postman**.

SKILLS

- Automation Testing Tools : **Selenium WebDriver**
- Language : **Core Java**
- Framework : **BDD, TestNG, Junit,Pom,Data-Driven .**
- Browsers : Google Chrome, Mozilla Firefox, and Microsoft InternalExplorer.
- Version Control Tool : **GIT**
- Integration Tool :**Jenkins**
- Defect Tracking Tools : **JIRA**
- API Testing : **Postman, Rest-Assured**

WORK HISTORY

Software Test Engineer - (Aug 2020 - Present)

Ramco Systems - Chennai.

EDUCATION DETAILS

B.Tech (Civil Engineering) -- Periyar Maniammai University .

PROJECT DETAILS

Project#1 : Topsy Elves

Domain : E-Commerce

Testing Type : Automation Testing

Project Description:

Tipsy Elves is a holiday-themed apparel company. It sells holiday sweaters and other holiday-themed items through its website and other online vendors, and donates part of each sale to charity.

Roles and Responsibilities:

- Involved in **Automation** Framework Development implementing **Cucumber** BDD, **Page Object Model**, **Maven Selenium** Web Driver –Java,
- Involved in writing automation script by using **Selenium Web Driver** with **Cucumber**.
- Developing BDD tests using **Cucumber** by writing feature file and Step definition.
- Involved in testing the application utilizing the **Scrum (Agile)** methodology
- Identifying the test cases which needs to be automated and which cannot be automated.
- Creating Test cases using element locators and **Selenium Web Driver** methods.
- Regression script execution and analyze the results.
- Raise bugs in **Jira** and Re-test resolved defects.
- Reporting the bugs to development team and analyzing issues.
- Implementation of **Data driven** framework.
- Involved in Smoke testing and Regression testing using Selenium.
- Debug and fix the Script issues.
- Experienced in attending the status calls and reporting to the clients.
- Pre-request scripts in Postman allow the execution of code before sending an **API request**.
- Rest Assured library allows working with cookies in API requests.
- Client interaction via email or conference calls on a regular basis.
- Analyze the changes in the new build and update it accordingly.
- Understanding the Test Plan.
- Executing Test Cases to validate the Functionality

Project#2 : Pinnacle Financial Partners

Domain : Banking

Testing Type : Automation and Manual

Project Description:

Pinnacle Financial Partners provides a full range of banking, investment, trust, mortgage and insurance products and services designed for businesses and their owners and individuals interested in a comprehensive relationship with their financial institution.

Roles and Responsibilities:

- Involved in Automation Framework Development implementing Page Objects, **Maven Selenium Web Driver –Java**.
- Analyzing the **BRD document**

- Involvement in preparation of test scenarios, test cases and test data.
- Identifying the test cases which need to be automated and which cannot be automated.
- Prepare the Automation script with Selenium java using **TestNG**
- Creating Test cases using element locators and **Selenium Web driver** methods.
- Regression script execution and Analyze the Results.
- Raise the bugs in **Jira** and Re-test resolved defect.
- Implementation of Data driven framework.
- Involved in **Smoke testing** and **Regression testing** using **Selenium**.
- Experience in code check-in and check-out in **GIT**.
- Debug and fix the Script issues.
- Experienced in attending status calls and reporting to the clients.
- Client interaction via email or conference calls on a regular basis.
- Analyze the changes in new build and update it accordingly.

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge and belief.
