About

Eager to take on challenging assignments in the field of testing and automation and to continuously develop my skills and knowledge in order to deliver high-quality software products. Aspiring for high career growth and determined to be an asset for the organization

Skills

- **Java**
- **Selenium WebDriver**
- **Cucumber**
- **TestNG, Junit, POM, Data Driven**
- **Manual, Automation, API**
- **JMeter API**
- **Postman, Rest Assured**
- **JIRA**
- **Eclipse**
- **Maven**
- **Jenkins**
- **Oracle**

Qualification

Bachelor of Engineering

Annamalai University.

Job Background

C L Infotech Private Limited, Bangalore

Nov 2019 - Present

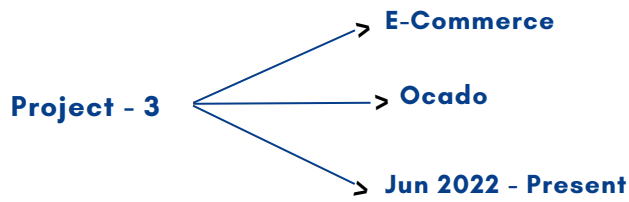

Summation

- I am an experienced Software Test Engineer with expertise in both Manual and Automation testing. In the last **4 years**, I have specialized in crafting and executing automated test scripts for web applications using **Selenium WebDriver** in **Java**.
- My skills extend to mobile application testing on Android platforms using **Appium**, ensuring compatibility and responsiveness.
- I efficiently manage test cases using **TestNG**, leveraging its capabilities for case management, parallel execution, and generating comprehensive test reports.
- I promote efficient collaboration through Behavior-Driven Development (BDD) with **Cucumber**, creating feature files and step definitions for streamlined communication within cross-functional teams.
- **API testing** is within my skill set, utilizing tools like **Postman** and **REST Assured** to validate the functionality and performance of RESTful services.
- I am proficient in **Data-Driven** testing, Hybrid frameworks, and the **Page Object Model (POM)**, ensuring scalable and maintainable automation suites.
- I bring **SQL** proficiency to database testing, ensuring data integrity and the accuracy of results derived from application interactions. For project management and build automation, I integrate **Maven** to guarantee consistency and repeatability in builds.
- Operating in an Agile-Scrum environment, I actively participate in sprint planning, daily stand-ups, and sprint reviews, aligning testing activities seamlessly with development goals.
- In terms of tools, I use **JIRA** for issue tracking and sprint planning, and **GIT** for version control. I orchestrate continuous integration and continuous deployment (CI/CD) of test scripts through Jenkins for efficient automation workflows.

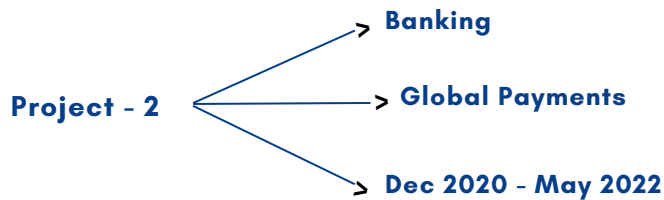

Highlighted Projects

As a Software Test Engineer at Ocado Group, I played a pivotal role in enhancing the efficiency and reliability of Ocado.com, a leading online grocery retail platform. The project focused on implementing robust integration testing automation to ensure seamless communication and functionality across various components of the e-commerce system.

Job Contributions

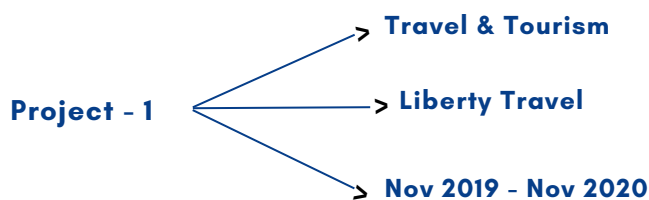

- Developed BDD tests with Cucumber, crafting behaviors and step definitions.
- Created Selenium support code in Java for Cucumber and ensured expertise in BDD format.
- Proficient in writing Gherkin format scenarios for Cucumber.
- Maintained and developed Selenium scripts for Scrum Stories, emphasizing regression testing.
- Expertise in XPath and handling dynamic elements for robust automation scripts.
- Executed automation tests in Electric Flow, including regression testing.
- Prepared XML files, Service Sheets, and Data Sheets for Service Automation.
- Conducted failure analysis and fixes for UI and Service Testing, documenting defects in JIRA.
- Active participation in Agile environment with regular involvement in Daily Scrum meetings.
- Implemented reusable components to enhance productivity and maintainability.
- Managed source code through checkout and check-in processes on Bit Bucket with integration through Electric Flow.

As a Software Test Engineer at Global Payments Inc., I played a pivotal role in ensuring the seamless functionality and reliability of the payment processing systems, contributing to the company's recognition on the Fortune 500 list in June 2021. My Job Contributions included:

Job Contributions

- Develop and maintain automated test scripts in Java, Selenium WebDriver, and TestNG.
- Design robust test automation frameworks using Maven and TestNG.
- Execute tests on various browsers, platforms, and devices.
- Manage test data for reusability and integrity.
- Collaborate with dev and ops teams to set up test environments.
- Design test cases for maximum coverage and adherence to requirements.
- Identify and report defects, track progress, and ensure timely resolution.
- Integrate automation with Jenkins for continuous integration.
- Analyze test results, prepare detailed reports, and communicate progress.
- Update scripts and frameworks for application changes. Participate in code reviews for quality assurance.

At Liberty Travel, I held a crucial position in fortifying the resilience and dependability of the organization's reservation system. My efforts played a key role in guaranteeing a smooth and reliable travel experience for a multitude of customers. The primary objective of the project was to enhance the efficiency of the current reservation system, ensuring it could meet the dynamic demands of the ever-evolving travel industry.

Job Contributions

- Led daily scrum calls with Business and Partner Teams, reporting task progress, open defects, and Risks/Issues.
- Managed and reported team progress to higher management.
- Daily reporting of test progress, prioritized issues, and risks to prevent blockages.
- Wrote test cases in Excel, uploaded to Maestro, and tested profile details, medical plans, and coverage.
- Conducted System, Regression, Functional, Integration, and End-to-End Testing.
- Maintained Traceability Matrix, Test Data Matrix, and Status Reports.
- Created test data for Member data based on scenarios.
- Supported End-to-End testing for downstream systems.
- Involved in Task Creation, Estimation, Distribution, Prioritization, and Communication within Onsite and Offshore Teams.

Declaration
