ABOUT ME

To give effective as well as efficient efforts towards the attainment of organizational goals with exploring the wide scope of knowledge and intelligence. To work in an environment that provides a challenging and rewarding career ensuring high-level job satisfaction. In the process apart from benefiting my employer, I also expect to learn for my overall development in playwright automation.

PROFESSIONAL PROFILE

- Result-oriented QA Automation Engineer with 4.5+ years of experience in functional, API, and UI automation testing. Specialized in Playwright, and Selenium, with strong experience in automation frameworks (BDD, POM, Data-Driven), API testing, and test integration into DevOps pipelines. Proven track record in delivering quality products across Banking, and e-Commerce domains through high-level test strategy, deep debugging skills, and strong collaboration with Agile teams.
- Good experience in Page Object Model and Object-Oriented Programming Structure (OOPS) Concepts. Utilized Git for version control, managing and organizing code repositories efficiently.
- Skilled in preparing Test Cases, Test Scripts, and Test Data, proficiently analyzing Test results, and generating detailed defect reports. Possess explicit knowledge of the Software Development Life Cycle (SDLC) and the Software Testing Life Cycle (STLC) Experience in frameworks such as Cucumber BDD, JUnit, TestNG TDD, and Data-Driven framework.
- Proficient in developing, executing, and maintaining automation scripts using Selenium WebDriver and JavaScript. Successfully executed automation scripts across various browsers and environments, promptly reporting defects and results to the team.
- Proficient in using JIRA for bug reporting and collaborated closely with developers and managers to resolve technical issues during automation testing.
- Excelled in various testing types including Functional, Regression, GUI, Black Box, Smoke, and System Testing.
- Created and managed Continuous Integration and Continuous Delivery (CI/CD).
- Installed, configured, and maintained Jenkins for CI and end-to-end build and deployment automation. Managed GitHub repositories, including permissions, branching, and tagging.
- Developed Docker images to build and run Docker containers

TECHNICAL SKILLS

- **LANGUAGES:** JavaScript, Core Java, SQL, MySQL
- **AUTOMATION:** Playwright, Selenium WebDriver
- **FRAMEWORKS:** API TESTING: BDD (Cucumber), POM, Data-Driven, Hybrid
- **API TESTING:** Postman, Rest Assured
- **BUILD TOOLS:** Maven, NPM
- **CICD:** Jenkins, Git
- **TEST MANAGEMENT:** JIRA, TestRail, Xray
- **OS/BROWSER TESTING:** METHODOLOGIES: Windows, Linux, Chrome, Firefox, Edge
- **METHODOLOGIES:** Agile Scrum, Sprint Planning, Daily Stand-ups, Retrospective
- **OTHERS:** HTML, CSS, GitHub, TestNG, JUnit, Excel (Apache POI), JSON/XML Parsing

WORK EXPERIENCE

Cybrid Technologies

First American (Banking Domain) - Playwright Automation

Software Test Engineer

(Feb 2023 - Till Date)

- Built a modular Playwright automation framework using JavaScript with centralized selectors and utilities.
- Automated critical banking flows like funds transfer, account validation, credit check, and loan approval.
- Designed reusable page actions and element handlers with Page Object Model (POM) design.
- Simulated multi-tab and multi-user banking sessions for transaction-level validations.
- Used Playwright Trace Viewer and browser tracing to debug flaky test cases effectively.
- Developed Playwright wrappers to standardize UI interactions and improve code reusability.
- Performed REST API testing for account services, fraud modules, and credit scoring using API Request Context.
- Configured Jenkins CI pipelines for nightly regression and cross-environment test execution.
- Created dynamic test data using Faker for account creation, KYC, and loan simulations.
- Participated in defect triage calls and logged/managed defects using JIRA dashboards.
- Onboarded and mentored new team members on framework usage and Playwright best practices

Cybrid Technologies

Watchfinder (e-Commerce Domain) - Manual & Selenium Testing

Junior Test Engineer

(Feb 2021 - Jan 2023)

- Performed UI validations on product listings, filters, and price tags across categories.
 - Automated checkout, add-to-cart, and wish list features using Selenium and TestNG.
 - Structured Selenium scripts using POM with reusable utility classes and locators.
 - Read product input data from Excel via Apache POI for data-driven testing.
 - Executed tests in parallel using Selenium Grid on Chrome, Firefox, and Edge.
 - Validated APIs for search, order placement, and delivery tracking via Postman.
 - Logged UI and functional defects in JIRA with screenshots and browser logs.
 - Performed visual alignment checks for banners, promo sections, and responsiveness.
 - Participated in sprint reviews and showcased key automation scenarios to stakeholders.
 - Conducted pre-release and post-production sanity checks for major sales campaigns.
-

EDUCATION

BACHELOR OF ENGINEERING - EEE

2011 - 2015

Francis Xavier Engineering College
Tirunelveli.
