

Prabhu Annadurai

25, Govindhrajapuram Street

Rangasamuthram,

Sathyamangalam-638402

E-mail: Prabhuadurai@gmail.com

Mobile: +91- 9629448983

PROFESSIONAL SUMMARY:

- Having 4.5 years of experience as a Software Testing in Web and Mobile application using Manual testing Techniques with emphasis on Destructive, Functional, System, and Regression Testing.
- Experience in GUI, Destructive, Functional, Regression and Integration Testing.
- Expertise in Test Case Design, Test Execution, Defect Management, Defect Reporting, Defect Tracking.
- Experience in Defect Classification, tracking and reporting of Defect Repetition.
- Experienced in working within fast-paced Agile Testing/SCRUM systems maintained by JIRA.
- Expertise in Problem solving and creating Bug Reports using Bug Tracking Tools.
- Versatile team player with good communication, team management and problem solving.

RESPONSIBILITIES:

- Involved in **Functional, System integration and Regression testing** web application
- Preparing User Acceptance Test Scripts based on the requirement
- Posting issues in bug tracking tool. Functional Testing, Regression Testing, Classifying Defects, posting defects in Bug Tracking System, creating test case and executing the test scripts.
- Posting the bugs in bug tracking tools and handled client calls.

TECHNICAL SKILLS:

- **Test Management and Bug Tracking Tools:** JIRA, Box, and Target Process
- **Database:** MY SQL.
- **Version Control Systems:** GitHub
- **Audit:** Elastic
- **Methodologies:** Agile
- **Domain Knowledge:** Health Care
- **Browsers:** Chrome, Firefox, Microsoft Edge, Safari
- **Other Tools:** Amazon Workspace, Ericom, MobaXterm, SAS Enterprise, Snagit.

PROFESSIONAL QUALIFICATION:

MCA – Bannari Amman Institute of Technology, Sathyamangalam.

PROFESSIONAL EXPERIENCE:

PROJECT #1: Hospital & Health Care

Technology: Manual Testing

Project Overview: Pivotal is a platform that collects and visualizes pertinent information and that provides a correlative structure that highlights the relationships between different data sets. It is in these relationships that healthcare organizations will be able to draw valuable insights about the market and the populations they serve.

Responsibilities:

- Understanding business requirements
- Preparing User Acceptance Test Scripts based on the requirement
- Modifying scripts based on business requirements
- Prepared Test Report based on the Test results
- Involved in Functional and System Integration Testing
- Posting Issues in Bug tracking Tool.

Project #2: Drug Development and Clinical Management

Technology: Manual Testing

Project Overview: Drug Development and Clinical Management is a cloud-based application. The primary goal of the system is to develop and validate analysis reports to use as supporting documentation in the submission to regulatory agencies supporting the approval of new drugs. The outputs are typically analysis datasets tables, listings and figures developed from input from clinical trial patient datasets

Responsibilities:

- To create the Test Scenarios, test cases and execute them.
- To develop Regression tests cases for execution.
- Classifying Defects and posting defects to Bug Tracking System

Project #3: Clinical Computing Environment

Technology: Manual Testing

Project Overview: Clinical analytics framework of flexible clinical components that allow data scientists to focus on the meaning of the data by automating mundane tasks and providing a fit-for-purpose workflow. Configured on extendable cloud architecture, that allows you to rapidly

add new capabilities while maintaining data integrity and traceability throughout the clinical data lifecycle.

Responsibilities:

- To create the Test Scenarios, Test cases and execute them.
- To develop Regression Cycles for every new Agile Sprint.
- Functional Testing, API Testing and Distributed load testing, Cluster and running pods testing, Audit log testing.

Project #4: Clinical Analytics Platform

Technology: Manual Testing

Project Overview: The main objective is to establish a secure cloud infrastructure and seamlessly integrate and deploy a newly developed in-house healthcare product for a client. Additionally deploying various other third-party applications as per client's requirement and handle Migration of existing, medical research records, and other relevant information from the client's legacy systems to the new healthcare product, ensuring data integrity and confidentiality.

Responsibility:

- Evaluate the functions of Windows-based applications, third-party applications, and integrated healthcare applications based on requirement.
- Test the server connections for the installed applications and check the migrated data with logs.
- Develop test scripts to verify the functionality of all installed applications and run them in test and validation environments.

EMPLOYMENT DETAILS:

ORGANIZATION: Techunity Software Systems India Pvt. Ltd. (September 2017 – till date)

DOMAIN: Software Testing

DESIGNATION: Software Tester (2019 - till date)

DOMAIN: Marketing

DESIGNATION: Web Researcher (2017 -2019)

DECLARATION:

I hereby declare that the above-mentioned information is true to the best of my knowledge.

Place: Coimbatore, Tamil Nadu, India

Date:

(Prabhu Annadurai)
