Objectives:

To work in a globally competitive environment on challenging assignments that shall yield twin benefits of job satisfaction and steady paced professional growth.

**SELENIUM WITH JAVA [CUCUMBER BDD, DATA DRIVEN, HYBRID],
SELENIUM WITH PYTHON [PYTEST FRAMEWORK and ROBOT],
PLAYWRIGHT, CYPRESS, LambdaTest, Browserstack, AWS EC2,
RESTAPI, Postman, GIT, GITUB, JENKINS, JIRA**

Professional Summary:

- Having 14+ years of experience in Manual and Automation Testing like Playwright, Cypress, **Selenium with Java/Python**.
- Experience in designing the Frameworks like **Page Object Model, Cucumber BDD, POM, PYTEST, ROBOT, Hybrid** and also etc.
- Hands-on experience with **Appium Mobile** and **Rest API** Automation.
- Experience in **Design, Build** and **Execute** the automated tests for Web and Mobile Applications.
- Develop and maintain **Regression, End-to-End** and also **Smoke Testing**.
- Hands-on experience in performing machines with different operating systems and/or browser versions of **Selenium Grid**
- Experience in Build Automation Tools like **Maven** and Continuous Integration Tools like **Jenkins**.
- Experience in Reports like **Allure Report**.
- Experience in Storing the Code in **Git, GITHUB**.
- Knowledge of **SQL** database testing and also **OWASP ZAP** for Security testing.
- Hands-on Defect Management tools like Azure, REDMINE and JIRA

Technical Skills:

Automation Tools: Playwright, Cypress, Selenium with Java/Python, Selenium Grid, LambdaTest, BrowserStack, AWS EC2, Appium, Sikuli and AutoIT.

Programming Languages: Core Java, Javascript, Python

Databases: SQL Server

Operating Systems: Windows, Linux

Bug Tracking Tools: Azure, JIRA, TestRAIL, RedMine, TestMo

PRASATH

Experience:

Connecting Intelligence & Information. Making a significant and meaningful positive impact in this world by researching and developing.

Company Name: NAICO ITS Pvt Ltd.

Designation: Team Lead – Quality Analyst

Project Title: Opeeka (USA based)

Sep'24 – Mar'25

Tools: Playwright, KANE AI, LambdaTest, RestAPI, Postman, TestRAIL, JIRA, AZURE

Framework: Page Object Model

Domain: Health Care

Domain URL: <https://www.opeeka.com/>

Highlights: Opeeka's Person-Centered Intelligence Solution (P-CIS) connects to existing electronic health records and automates processes to improve care delivery.

- Lead end-to-end QA strategy, planning, and execution across multiple product releases.
- Develop and maintain scalable automation frameworks using Playwright JS following the Page Object Model (POM) design pattern.
- Coordinate testing efforts across tools and platforms including LambdaTest, Postman, and RestAPI, ensuring cross-browser and cross-platform compatibility.
- Oversee functional, integration, regression, and API testing across a microservices-based architecture.
- Work closely with developers, business analysts, and product owners to understand requirements and convert them into effective test cases.
- Manage test documentation and traceability using TestRail, and track defects/issues via JIRA and Azure DevOps.
- Ensure test coverage and quality benchmarks are met in alignment with healthcare domain standards.
- Mentor junior QA team members and drive continuous improvement in testing processes and practices.
- Contribute to quality-centric discussions with insights derived from tools like KANE AI to enhance test efficiency and accuracy.

PRASATH

Experience:

More responsible in producing or to produce a consistent end-to-end light touch customer experience delivery to meet the business objectives.

Company Name: Dreams Technologies

Designation: Team Lead – Quality Analyst

Project Title: Ecommerce (UK based)

Apr'21 – June'24

Tools: Playwright, RestAPI Automation, Postman, LambdaTest, JIRA, DataDog(Performance Testing), ZAP(Security Testing)

Framework: Page Object Model(POM)

Domain: Ecommerce - Contract to Public Sector Projects

Domain URL: <https://redirect.contractawardservice.crowncommercial.gov.uk>

Highlights: E-commerce is a business model that enables the buying and selling of goods(Infrastructure) and services(Manpower supply) over the internet. It's nothing but Agreement signed by both buyers and suppliers in front of the Public Sector using contract based tenure.

- Played a key role in Test Plan development, test design, test data derivation, and creation of high-quality test cases. Additionally, contributed to the review process of peer test cases and test execution reports.
- Executed test cases meticulously and promptly raised any noticed bugs in JIRA for efficient issue tracking and resolution.
- Prepared detailed Defect Reports and collaborated with developers to assign and facilitate the timely fixing of identified defects.
- Conducted thorough retesting of cases where defects were raised, verifying their successful resolution, and updated the status accordingly.
- Illustrated proficiency in utilizing BDD Framework for scripting automation scenarios, enhancing overall testing efficiency.
- Played a role to Sanity and Regression Testing of the application, ensuring its stability and reliability.
- Prepare meeting notes on daily execution/highlight of the project and send out the reports to managements.
- Effectively logged defects in Jira, providing accurate and detailed information for efficient issue tracking and resolution.
- Delivered comprehensive artifacts including bug reports and status reports, providing clear insights into the testing progress and outcomes.
- Actively initiated regular meetings with clients to discuss defects, prioritize them and ensure effective collaboration in the resolution process.
