SUMMARY

A highly motivated and dedicated performance testing professional with 2.4 years of experience in creating and executing performance testing strategies, analyzing test results, and providing recommendations for improvements. Proven ability to work collaboratively in a team environment, excellent problem-solving skills, and effective communication skills.

EXPERIENCE

Performance Test Engineer

Tech Mahindra

 08/2021 - 12/2023

 Noida, India

- Proficient in performance test planning, design, execution, and analysis
- Experience in creating and executing performance test scripts and scenarios.
- Familiarity with performance monitoring tools to identify and analyze performance Created data visualizations and reports to communicate insights to business stakeholders and provided recommendations for improvement.
- Skilled in analyzing test results and identifying performance issues.
- Ability to generate comprehensive performance test reports with actionable recommendations.
- Strong data analysis skills using tools like Excel or SQL queries.
- Handled PT deliverables independently.

Projects

BT Project

- Assisted in the creation and execution of performance test scripts and scenarios.
- Conducted baseline performance tests to establish performance metrics and benchmarks.
- Designed and executed comprehensive performance test plans, including load, stress, and soak test.
- Using monitoring tools like JMeter and Blaze meter on a frequent basis.
- Involved in test execution, identify, document and report bugs and errors.
- Kept Scripts and test cases updated with current requirements.
- Reviewed performance and load balancing of each application.
- Recommended changes and corrections to developers for optimal software performance and usability.
- Contributed to documentation of performance test plan, reports, and findings.

IPC Project

- Proficiency in using performance testing tools such as JMeter and JVM.
- Monitored the test fluctuation with the help of Java virtual machine tool.
- Checked the counts of hits on the server while running the test from database SQL.
- Checked the call load counts before and after the test from Linux.
- Giving the load as per requirement and running the test over JMeter.
- After completion of test covering all post checks and preparing the report.
- Verified the defects and gave updates to developers.
- Contributed to documentation of performance test plan and reports.
- Participated in team meetings and knowledge sharing sessions to enhance skills and understanding of performance testing.

EDUCATION

Bachelor of Technology

Institute of Technical Education and Research

 08/2016 - 08/2020

SKILLS

Technical – JMeter, Blaze meter, JVM, Jenkins, JIRA, MySQL, Linux, Load Testing, Stress Testing, SOAK Testing, Tuning, Database, Result Analysis.

Functional – Test Planning, Scripting, Cross-functional Collaboration, Strategic Thinking

ACHIEVEMENTS

PAT ON BACK AWARD (Tech Mahindra)

Level 1- UiPath RPA Developer Foundation Training
