

SENTHIL KUMAR. K

Chennai, India

- ksenthilkumar2780@gmail.com
- +91-9092426961

SUMMARY

17 years of Quality Assurance technical/hands-on and executive leadership delivering significant improvements in cost of poor quality by manual and automated testing of web applications, databases, standalone applications, mobile applications, networks, infrastructure, automation, hardware and performance testing. Building and growing an effective QA team from the ground up. Participating in cross functional team discussions to help improve the overall services quality, providing input for a go/no-go decision on release readiness, reviews and communicating status to stakeholders.

CAREER HIGHLIGHTS

- **SDLC:** Agile with Scrum/Sprints, Iterative, Waterfall Model
- **Test Planning:** Scoping, Estimates, Strategy, Plans, Presentation, coordination
- **Risk Management:** Identify risks and plan best case approach for risk.
- **Test Cases Management:** Managing test cases with/without requirements/design docs.
- **Defect Management:** tracking, reporting and defect triage/management meetings.
- **Test Execution:** Web apps, WinUI, RestAPI, Mobile App, network, security and infrastructure
- **Test types (Manual):** Functional, Regression, Integration, Smoke, System, UAT (Automation): Functional, Regression, Performance, Stress, Load and Security Testing
- **Release Management:** Plan, Develop, coordinate and lead software release activities with application and support teams.
- **Selenium WebDriver:** Proficient in creating robust and scalable automation frameworks using Selenium WebDriver for web application testing and Appium for Mobile Application. Experienced in writing automated test scripts in various programming language such as Java, ensuring comprehensive test coverage and efficient test execution.
- **Katalon Studio and Eggplant:** Skilled in using Katalon Studio and Eggplant DAI to accelerate test automation efforts, including test case design, execution, and reporting. Proficient in leveraging built-in keywords and custom libraries to automate end-to-end testing of web and mobile applications.
- **JMeter and Blazemeter:** Extensive experience in performance testing using Apache JMeter, including load testing, stress testing, and scalability testing of web applications, APIs, and databases. Proficient in designing and executing performance test scenarios, analyzing test results, and identifying performance bottlenecks.
- **Burp Suite:** Proficient in using Burp Suite for web application security testing, including vulnerability assessment, penetration testing, and security scanning. Skilled in performing manual and automated security tests, identifying security vulnerabilities, and providing remediation recommendations.
- **Postman:** Experienced in using Postman for API testing, including request creation, parameterization, and response validation. Skilled in designing and executing API test suites, monitoring API performance, and troubleshooting API issues.
- **Git:** Proficient in version control using Git, including repository management, branching, merging, and conflict resolution. Experienced in collaborating with development teams using Git workflows such as GitFlow and GitHub Flow.

QA Manager

CENSANEXT System (Waycool Food Enterprise Ltd)

Sep 2021 – Dec 2024 – 3 years, 3 months

Chennai, Tamil Nādu, India

Projects 1: Retail (SunnyBee, iGrade, and Marketplace)

Framework Used: Data-Driven and Hybrid Automation Frameworks (**Selenium Webdriver**)

- Designed and implemented a Selenium-based data-driven framework to execute functional and regression tests.
- Implemented Page Object Model (POM) for better code reusability and maintainability.
- Integrated Apache POI for external test data management using Excel.
- Developed detailed test execution reports using TestNG and Extent Reports.
- Integrated with Jenkins for CI/CD pipeline, ensuring continuous testing with instant feedback.

Project 2: FMCG (Outgrow, Censa Depot, Censa Source)

Framework Used: Hybrid Automation Framework (Selenium Webdriver) and Appium for Mobile Automation

- Built a hybrid automation framework leveraging Selenium for web applications and Appium for mobile applications.
- Automated test cases for Android and iOS platforms using Appium, ensuring compatibility across devices.
- Utilized Appium Inspector and UIAutomator Viewer for element inspection and identification.
- Implemented capabilities for testing native, hybrid, and web-based mobile apps.
- Integrated Maven for dependency management and Jenkins for automated test execution.

Roles & Responsibilities – QA Manager

- Led the design and implementation of comprehensive testing strategies for **FMCG and Retail projects**, ensuring alignment with project goals and industry best practices.
- Provided architectural guidance on test automation frameworks, tools, and technologies, resulting in a 30% increase in test automation coverage.
- Collaborated with cross-functional teams to define test objectives, scope, and timelines, facilitating clear communication and alignment on testing priorities.
- Mentored junior testers and provided training on testing best practices, methodologies, and tools, fostering a culture of quality and excellence within the testing team.
- Drove continuous improvement initiatives to enhance testing processes, methodologies, and tools, resulting in a 25% reduction in testing cycle time.
- Communicated regularly with project stakeholders to provide updates on testing progress, issues, and recommendations for improvement, ensuring transparency and alignment with project objectives.

Automation Test Lead - **SwaaS- Pvt Ltd**, Chennai

Apr 2020 – Aug 2021 – 1 yrs 4 months.

Project: ASRC Federal

Roles & Responsibilities

- Leading Automation Team, Interacting with Client, Initiate and develop the automation work from scratch by using of the tool **Eggplant DAI** and **Functional**. Update the testing status to stakeholders.
- Prepare Reusable functions, which improve the robustness, re-usability, and maintainability of their test scripts.
- Automation feasibility analysis / POC
- Defined Test Strategies, Test standards, Processes, Policies, Procedure, Template, Beta testing, UAT testing processes.
- Developed automated and manual test procedures for requirement validation, integration, regression, performance and usability testing.
- Execute Benchmark, load, stress, endurance, and other non-functional tests by using of Tool like **Apache JMeter** and **BlazeMeter**

Quality Assurance Manager - Fern BIS Software - Full time, Trichy Tamilnadu

May 2016 – Mar 2020 – 3 yrs 11 months.

Project: Banking and Microfinance (Abacus)

Tool Used: Katalon

Framework Type: Hybrid Test Automation Framework

Roles & Responsibilities

- Building and growing an effective QA team from the ground up. Lead and managed a team 20 Manual and Automated QA Engineers.
- Automated end-to-end testing for standalone and web-based microfinance applications by using of the tool Katalon and Selenium Webdriver Tools
- Design test architectures (test automation frameworks, code libraries, etc.) for the team to use across the platforms;
- Contributed heavily and implemented testing process to infrastructure initiatives and automation frameworks and Conducted several Proof of Concepts.
- Extensive Experience in **Performance Testing (Load, Stress and Endurance)** tool like **Apache JMeter, BlazeMeter and LoadRunner**

Project Manager - Newgen Pvt Ltd, Chennai

November 2009 – April 2016 – 6 Yrs 7 months..

Roles & Responsibilities

- Ensure that sprint goals and scope are understood by everyone on the Scrum Team
- Prepare estimates and detailed project plan for all phases of the project.
- Coordinate sprints, retrospective meetings, and daily stand-ups.
- Ensure deliverables are up to quality standards at the end of each sprint.
- Develop and manage all aspects of project engagement from planning, external vendor relationships, communications, resources, budget, change, risks and issues.
- SPOC for Overall project deliverables Collaterals (SOW, Project Plan, Functional Technical Specifications, Effort Commercial Estimation, Proposals and other requisite documents)

Software Quality Engineer - Scientific Publishing Services Pvt Ltd, Chennai

September 2004 –October 2009 – 5 Yrs 1 months.

Roles & Responsibilities

- Hands on experience in testing various applications in SPS, Requirement Analysis, Test cases Preparation, Execution, Defect Tracking and reporting.
- Understanding risk areas and prioritizing QA effort to mitigate them.
- Developed Manual test procedures for requirement validation, integration, regression, performance and usability testing.

EDUCATION

- **Master of Philosophy in Computer Science (M. Phil) -Madurai Kamaraj University - 2005**
- **Master of Business Administration (M.B.A) – Alagappa University – 2010**
- **Master of Science in Information Technology (M.Sc., IT) – Thiruvalluvar Engg. & Tech College, University of Madras- 2003**
- **Bachelor of Science in Computer Science (B. Sc) – Arignar Anna Arts and Science College, University of Madras -2001**

CERTIFICATIONS

- Certified Prince2 APMG International®
- Certified ISTQB BCS The Chartered Institute for IT®
- Certified ISO 9001:2015 -Quality Management System (QMS) - Alison
- Certified Scrum Master and Agile - Udemy
- Certified AWS Core Services
- Certified Digital Automation Intelligence – Eggplant
- Certified in Java and J2EE – NIIT
- Certified in Hardware and Networking – SISI, Govt. of India
