CAREER SUMMARY

Engineering Manager – Quality (QA/SDET)

- **Seasoned and results-driven Quality Engineering Leader with 14+ year of** successful career and extensive expertise in leading software quality initiatives, developing automation frameworks, and managing high-performance teams across various domains, including e-commerce and fintech, ensuring product quality and reliability.
- **Proven expertise in building and mentoring** cross-functional teams, fostering a culture of collaboration, quality excellence, and continuous improvement.
- **Spearheaded end-to-end execution** of complex projects involving multiple stakeholder teams, consistently meeting tight deadlines through meticulous planning and coordination.
- **Expert in Design and Implementing Automation framework** to cater to diverse testing needs, including Mobile, Web, Backend, and Performance testing.
- **Experienced in developing and integrating** automation tools and CI/CD pipelines, streamlining release processes and improving testing outcomes.

AREAS OF EXPERTISE

- Leadership in building high performing functioning teams
- Career development, mentoring, coaching and performance management.
- Collaboration & Stakeholder Management
- Agile/Scrum Methodologies
- CI/CD : Jenkins, ArgoCD
- Release Management
- Quality Assurance
- Automation Frameworks
- Release Management
- Test Strategy
- Test Data Management
- Test Management Tools: TestLink, Testrail, Xray, Jira
- Test Automation: Selenium WebDriver, Java, Appium (Android and iOS), TestNG, Report Portal, Browser Stack
- API Automation: Rest-assured/gRPC
- Mocking mechanisms
- Databases: MySQL, MongoDB
- Performance & Load Testing: Locust, JMeter
- Infrastructure/Cloud : Kubernetes, Docker, GCP
- Languages: Java, python

PROFESSIONAL EXPERIENCE

Groww, Bangalore (Engineering Manager – Quality (QA/SDET)

April 2022 – Present

One of India's fastest growing investment platforms enabling users to invest in stocks, F&O, mutual funds, ETFs, IPOs and provide Loans.

- **Successfully established and mentored a team of 20+ QA and SDETs**, elevating them to a high-performing unit through strategic guidance and coaching thus driving exceptional growth and productivity.
- **An expert in cross-functional collaboration**, providing technical leadership and driving large-scale projects to completion. Consistently delivers high-quality results within tight deadlines. Instrumental in launching Groww UPI, Bills, and the Groww Payment Gateway to market, driving critical business impact and growth.
- **As part of QA Platform team**, led the development and implementation of cutting-edge automation tools, including:
 - Unified UI automation for mobile (App, iOS) and web, integrated with visual comparison and MITM Proxy for mock data.
 - Automation for backend services using REST/GRPC frameworks.
 - Establishment of an internal device lab to streamline UI testing.
 - Creation of performance testing frameworks leveraging Locust and Kubernetes for comprehensive NFR testing.

- Utilized Microcks for efficient mocking of external dependencies, simplifying integration testing.
- **Optimized the release management** process, integrating automated CI/CD pipelines, enabling smooth and regular bimonthly releases of new product features and improvements.
- **Enabled data-driven decision-making** by defining & establishing relevant KPI metrics, and built a centralized QA dashboard, providing real-time visibility into performance metrics and trends.
- Expert in testing applications built on a **microservices architecture, deployed on GCP, and utilizing Docker and Kubernetes** for continuous integration and delivery.
- **Mentored** team members by focusing on career growth and skill development through **regular one-on-one sessions**, providing guidance for professional development, while also conducting comprehensive performance evaluations to deliver constructive feedback, recognize achievements, and drive continuous improvement and team success.
- **Standardized the interview process**, providing training and calibration for interviewers to ensure fair, consistent candidate assessments, enhancing team-building efforts.
- Significantly improved automation efficiencies, **reducing execution times by 30%, increasing UAT environment uptime**, and expanding automated test coverage.

Flipkart, Bangalore (Tech Lead – SDET)

August 2011 – April 2022

Flipkart is India's leading digital commerce platform for retailers which have enabled millions of sellers, merchants to sell to over 500+ million customers.

Joined as initial member of QA team where developed innovative test strategies for both technology driven and business focused capabilities aimed at creating critical business impact like Flipkart Marketplace launch, Liquidation of returned products, Fulfilled by Flipkart, GST etc.

- **During my tenure at Flipkart**, I collaborated with various teams, including **Order Management Service (OMS), Returns Management, Warehouse Management System (WMS), Last Mile Delivery, and Customer Support**.
- **Led the creation of the Performance Engineering charter**, playing a key role in ensuring the success of Flipkart's **Big Billion Days**, one of India's largest e-commerce events.
- **Managed** 6-7 member's team focused on building centralized UI & API automation frameworks to improve testing efficiency.
- **Designed and implemented** Flash, a platform for Non-Functional Requirements (NFR) testing, ensuring seamless performance evaluations.
- **Developed Mirana, a Test Data** as a Service platform to streamline data provisioning and enhance test reliability.
- **Built centralized dashboards** for leadership, offering real-time insights and metrics to support informed decision-making.

Aditi Technologies, Bangalore (Software Engineer)

November 2009 – August 2011

- **Contributed to the development and automation** of test cases for key features of AdCenter Desktop, ensuring quality and functionality.
- **Developed and automated** test cases for various features of AdCenter Desktop.
- **Created detailed test plans and test cases** for new features to ensure thorough testing coverage.
- **Executed Compatibility, Accessibility, and Pseudo-localization** testing to ensure product adaptability across different environments.

EDUCATION

Bachelors of Engineering (BE) – Information and Technology

Manipal Institute of Technology (2004 – 2008), Manipal, Karnataka
