COMPREHENSIVE FUNCTIONAL TESTING OF

E-COMMERCE MOBILE AND WEB APPLICATIONS

Enhancing test coverage and preventing crashes of a leading e-commerce platform
in Indonesia

CLIENT BACKGROUND

Client Name: Tokopedia

Industry: E-commerce

Products and Services : E-commerce and Financial Services

Area of operation (Locations): Indonesia

Employees: 8247

ABOUT TOKOPEDIA

Tokopedia is an Indonesian tech company that has been a pioneer in digital transformation with a mission to democratize commerce through technology. Tokopedia has an e-commerce platform with 100+ million Monthly Active Users (MAUs) and 11+ million merchants signed up

Tokopedia needed a scalable and efficient QA partner that could enable the fast-paced and frequent releases needed to accelerate its e-commerce platform's growth

CHALLENGES

1

Tokopedia has a leading e-commerce platform with a diverse customer base of consumers and retailers throughout Indonesia

2

Tokopedia noticed that their app store rating had declined due to the crashes in their applications. In addition, the number of downloads for their apps had not increased

3

As part of its efforts to achieve customer trust and confidence, Tokopedia was having trouble ensuring adequate test coverage for its mobile and web applications for buyers and sellers

4

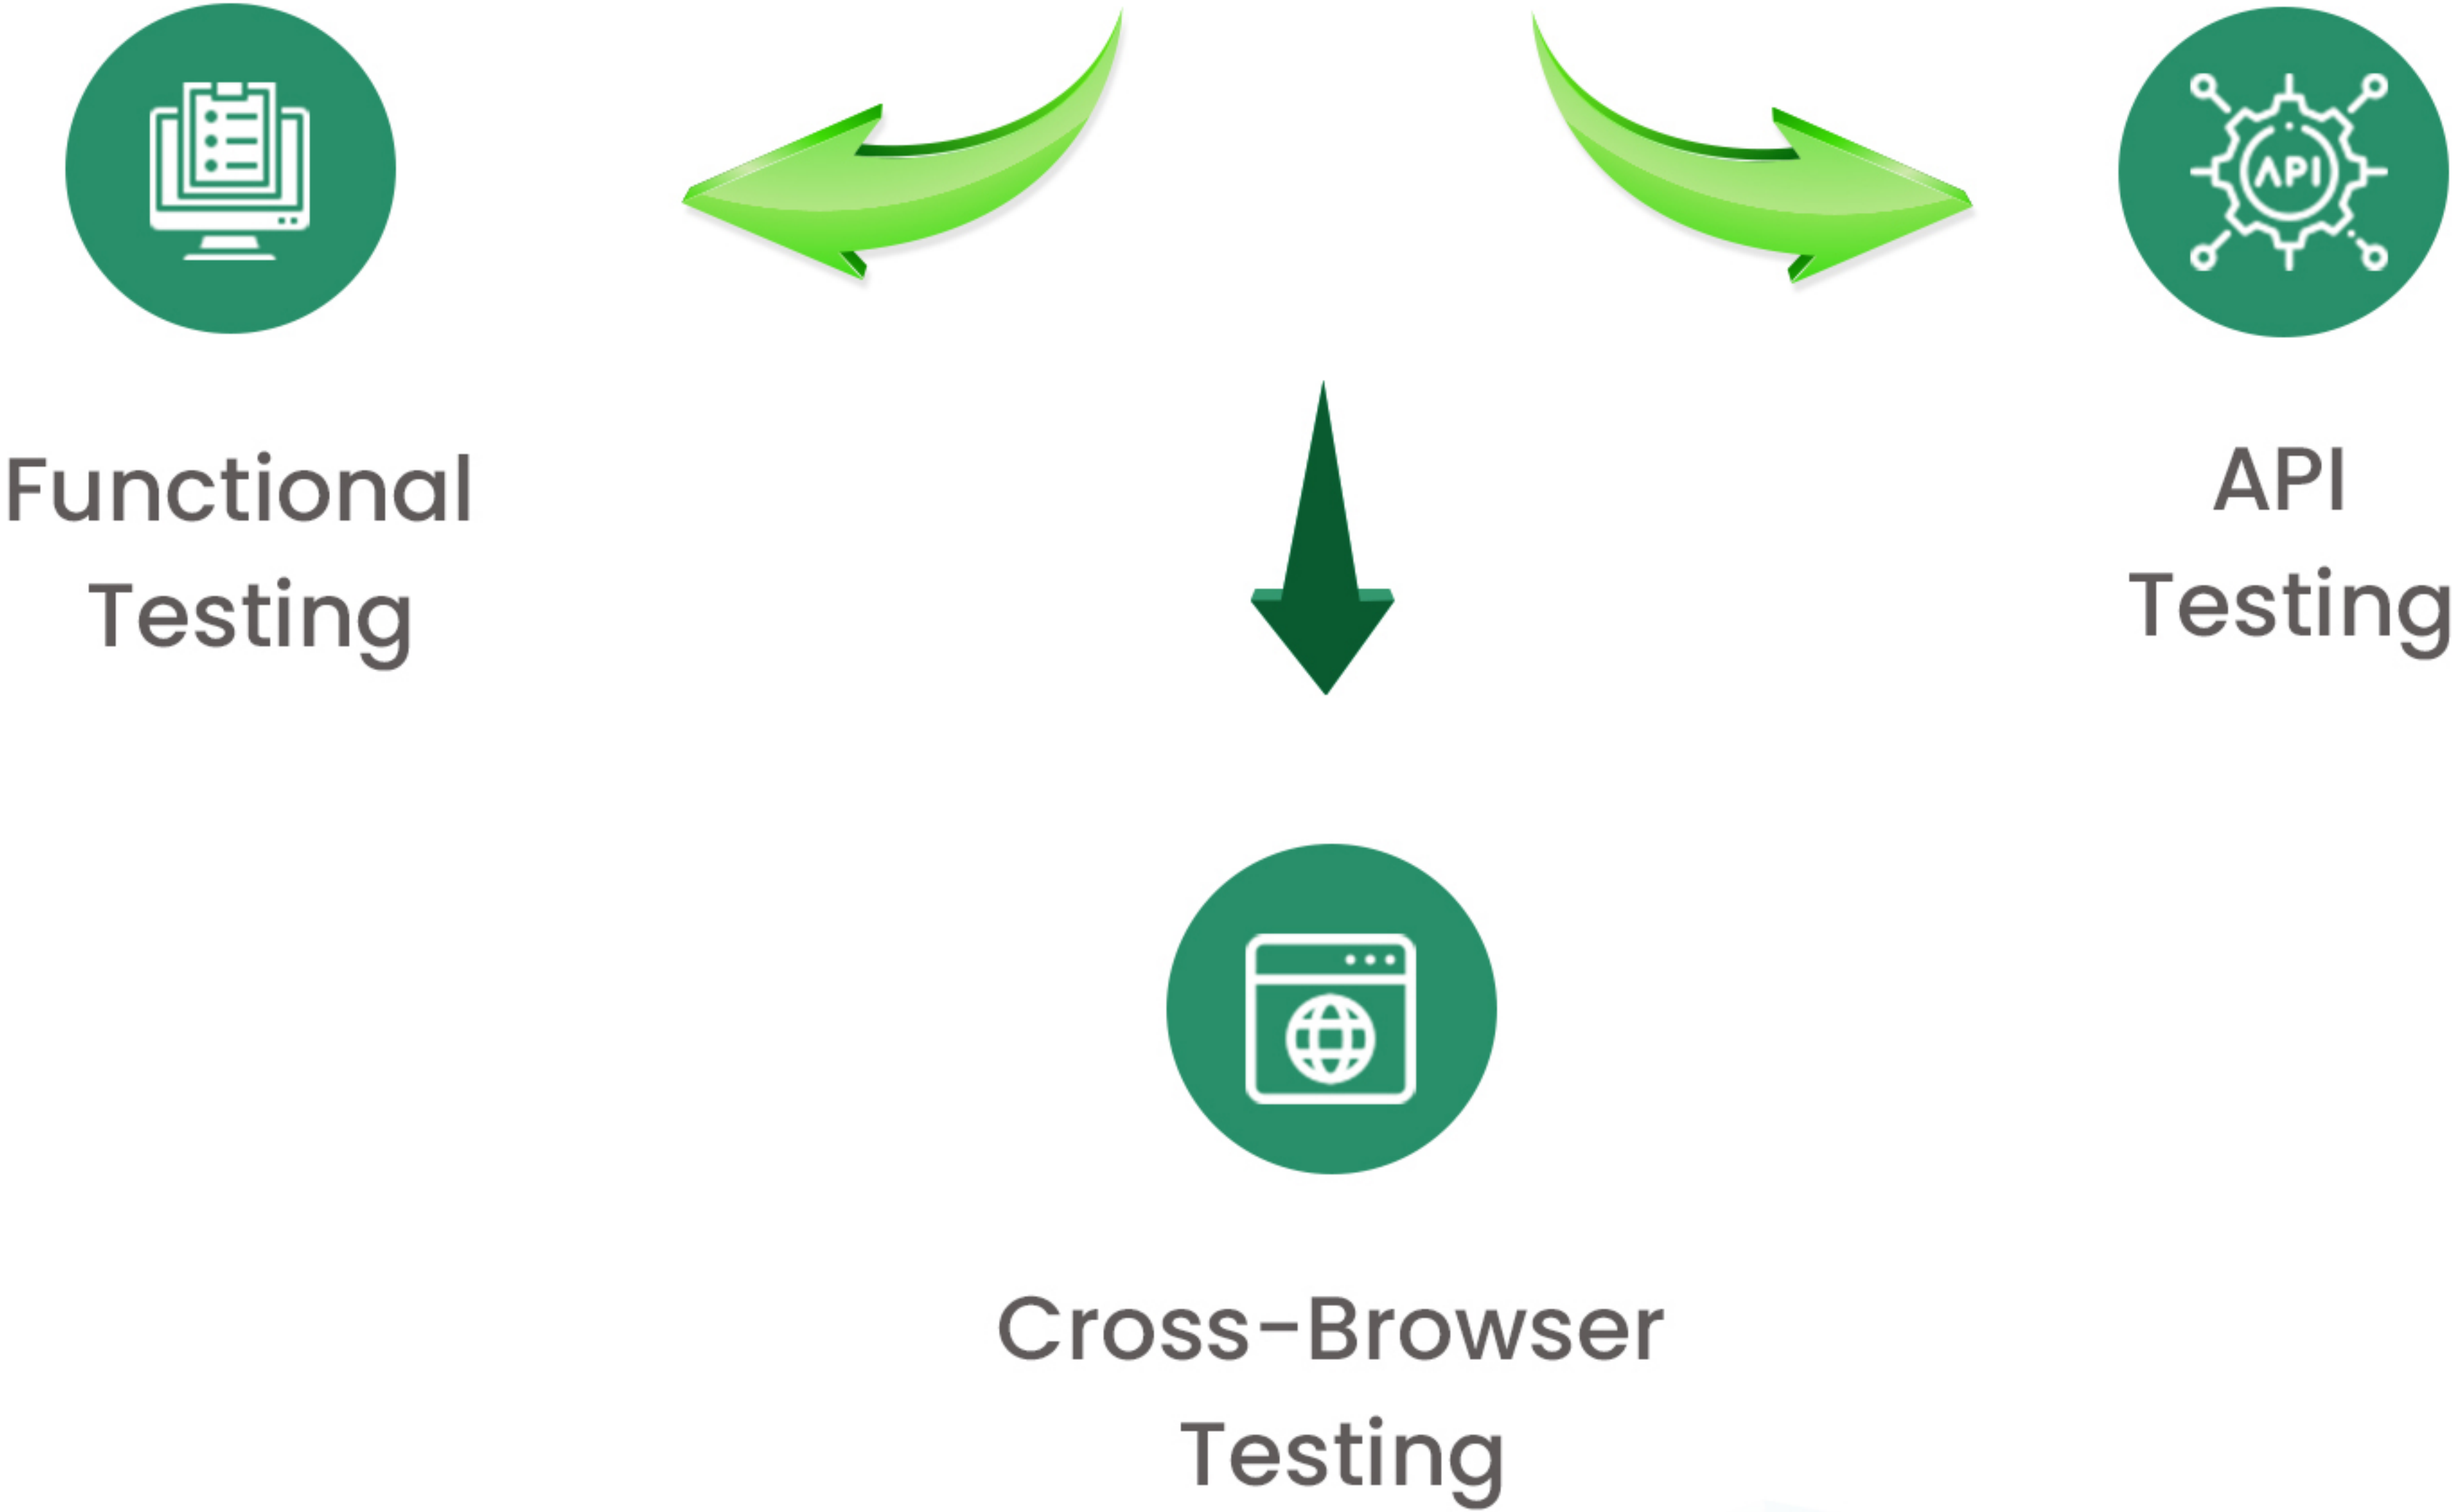

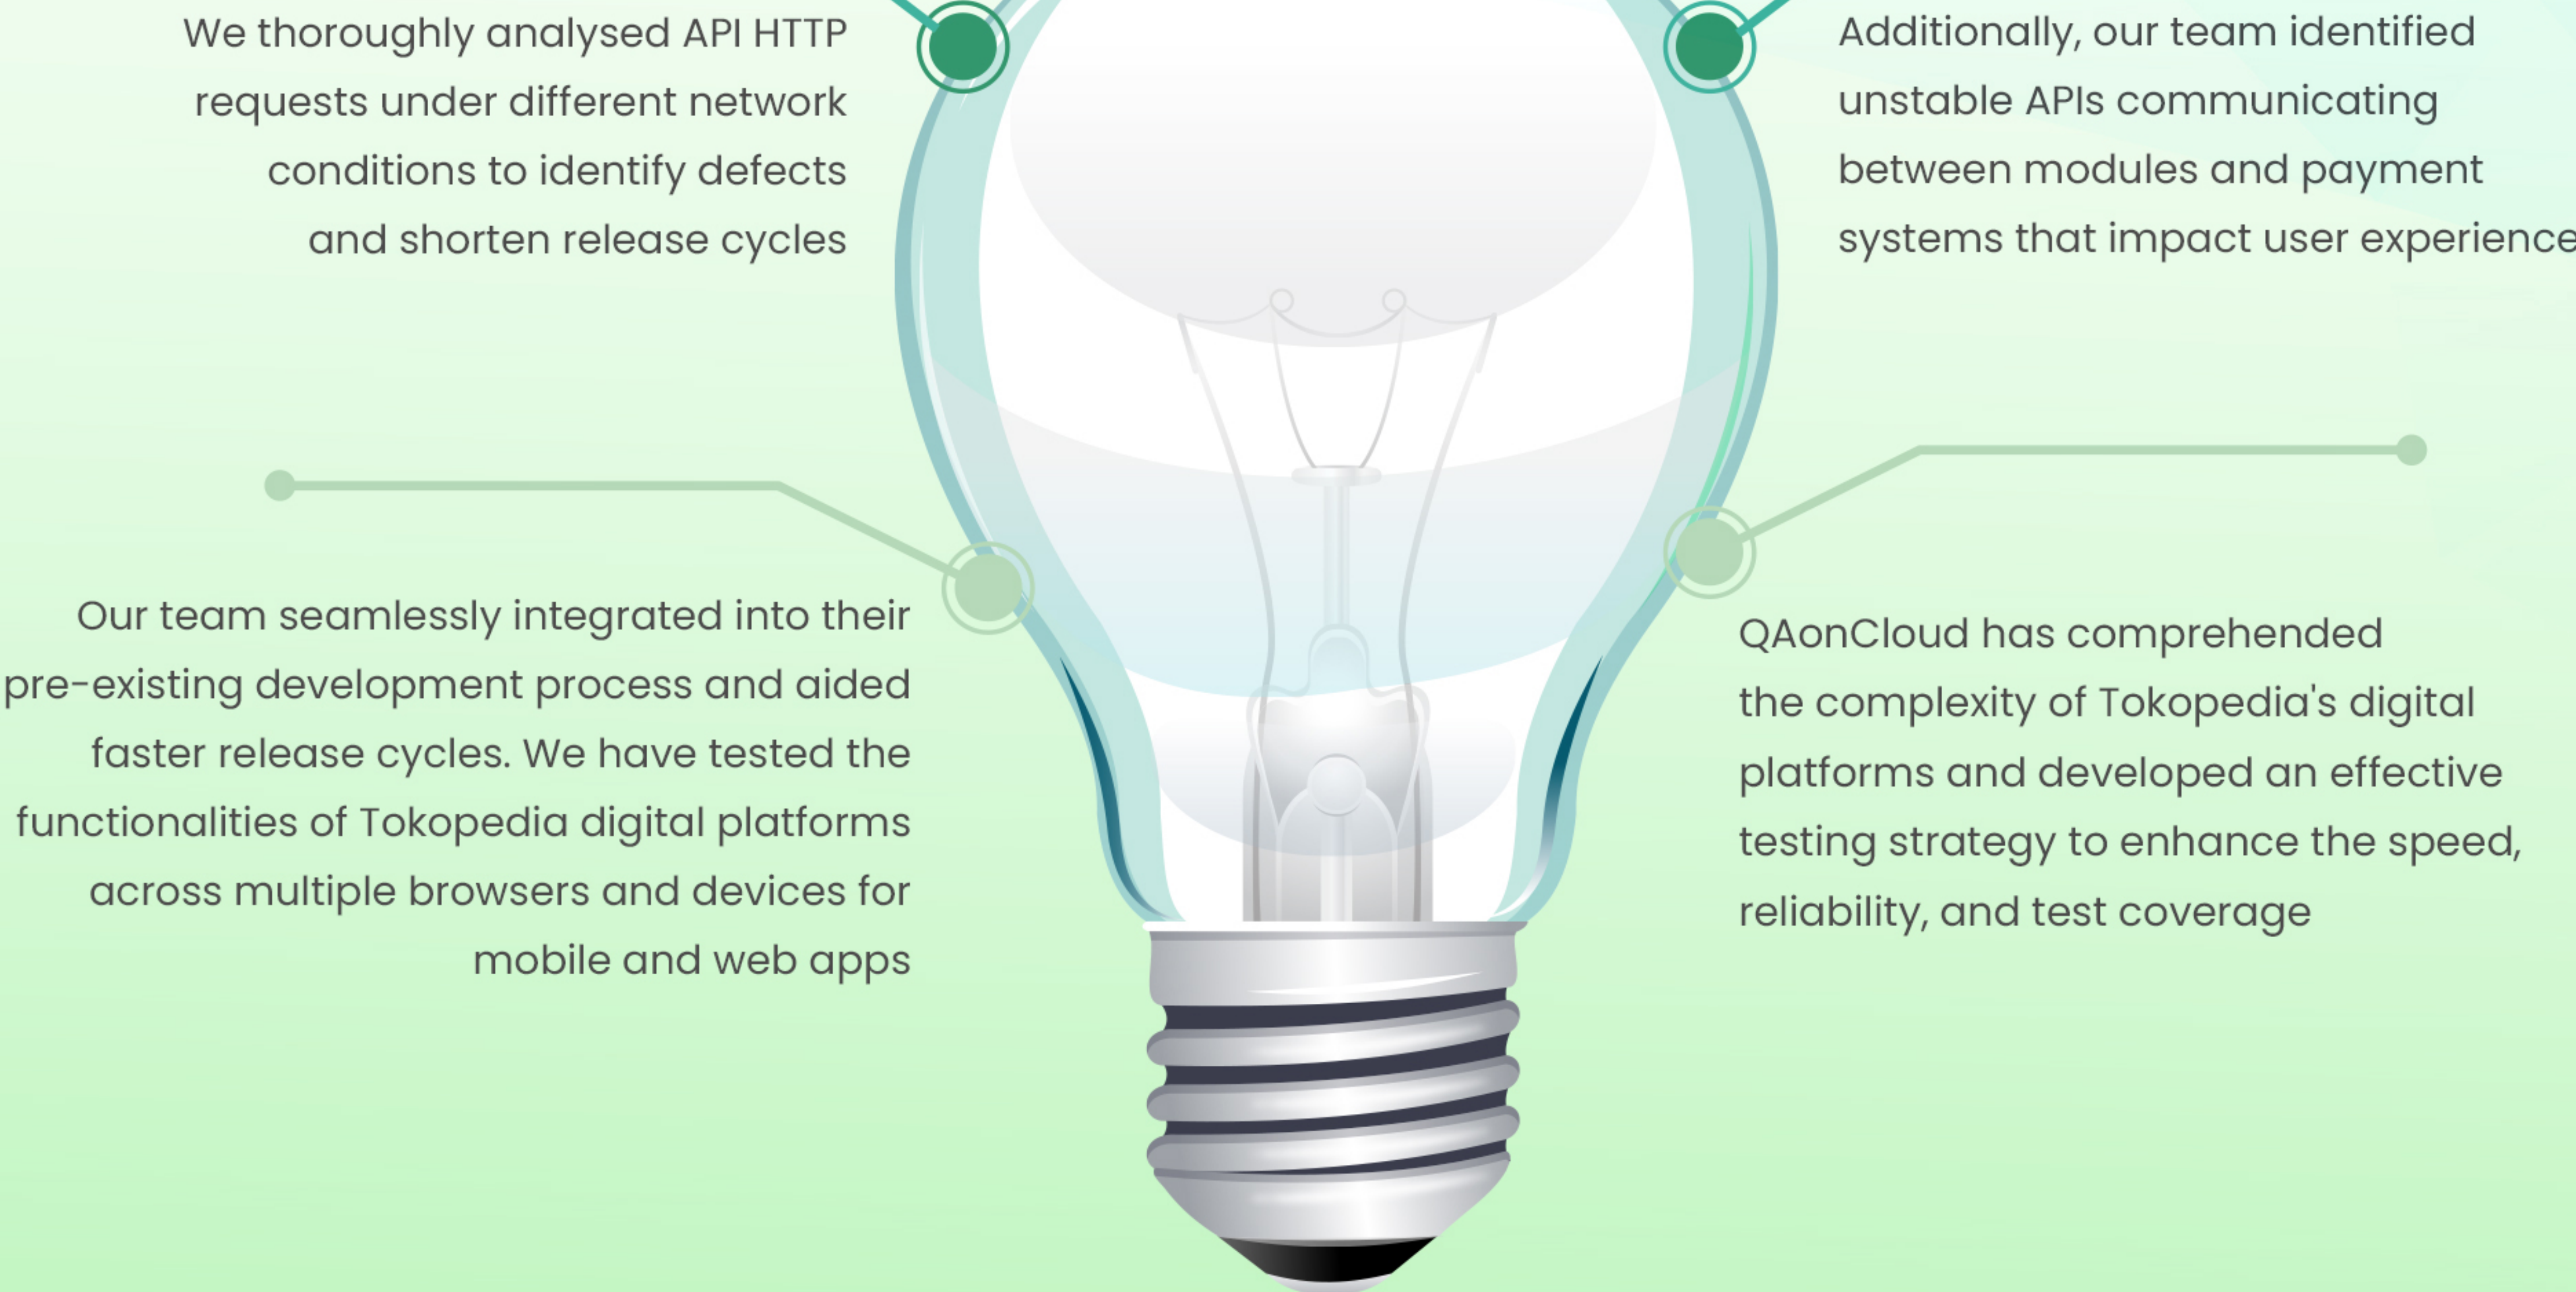

Due to the wide range of user profiles and unique ecosystems, Tokopedia required many devices/-platform combinations for both the buyer's and seller's portals to cover all the customized modules

5

To improve the quality of its e-commerce applications, Tokopedia sought a competent and experienced QA testing partner who could test its e-commerce portals as per their requirements

SOLUTIONS

QAonCloud helped Tokopedia ensure that all major defects were identified and addressed before they hit production

BUSINESS IMPACT

QAonCloud has helped Tokopedia to uncover numerous functional issues and helped in improving user experience and app store ratings dramatically

Our comprehensive e-commerce testing solution has helped Tokopedia to identify all defects and provide a convenient and truly user-centric online shopping experience

1300+
Test cases written over
iterative releases

1000+
Defects verified over
various release cycles

400+
Crashes verified

150+
Defects verified

21%
Reduction in crashes

95%
Defect acceptance

QAonCloud has helped us detect app crashes which were affecting our downloads significantly. They have now taken the responsibility of giving a QA clear to all our development sprints. We would like to expand the team further
