- Manual Testing: Test case design, Test Execution, Bug Tracking and Reporting
- Database: SQL Plus, MySQL
- Automation Tools: Selenium Web Driver
- IDE: Eclipse
- Frameworks: Cucumber Framework, TestNG, POM, Data Driven Framework.
- Project Management Tool: Jira Tfs
- SCM Tool : GIT
- Build Tool : Maven
- Programming Languages: Core Java
- Integration Tool: Jenkins
- API Testing: Postman

Professional Experience

*Working as Software Test Engineer at **Corefront Technologies** from April 2023 to Till Date.*

Project Summary

Project 1- Shriram Life Insurance Corporation–**Web Application**-Agile Methodology

Client: **Shrilife**

Tools and Technology: Java, Selenium, POM, Cucumber, Junit, Git, Jenkins, TestNG

Role : **Software Test Engineer**

Duration: **April 2023 to Feb 2025**

Project Description:

This application is being used for policy generation for the customers (B2B people). This application is being used in Chennai, Hyderabad, Mumbai and Secunderabad locations. This application was completely developed and tested under agile methodology. In this application as part of testing following types of testing were

covered. Security testing, integration testing, Regression testing, smoke and sanity testing.

Responsibilities:

- Analyzed Software Requirement Specification (SRS) document and identified all the possible test scenarios.
- Performed detailed manual testing, including test case design, test execution, exploratory testing, and defect logging.
- Executed functional, regression, smoke, and system testing cycles.
- Wrote and executed automation test scripts using Selenium with Java and TestNG following the POM and Data Driven Framework.
- Actively used JIRA for defect tracking, test planning, and Agile board tracking.
- Created test scenarios and test cases for all possible and non-possible combinations for each and every requirement.
- Prepared test data for all of the positive and negative test cases. Performed defect tracking & management in TFS.
- Participated in the Quality focus discussion.
- Creating test script using Cucumber Framework with Selenium.

Manual Testing:

- Experienced in all stages of STLC including requirement analysis, test planning, test case preparation, test execution, defect tracking, and reporting.
- Strong knowledge in writing effective test scenarios and test cases for functional, UI, and integration testing.

- Performed cross-browser testing, exploratory testing, and boundary value analysis.
- Hands-on in defect life cycle management using JIRA – logging, triaging, re-testing, and closing bugs.
- Collaborated in Agile teams, participating in sprint ceremonies and continuously updating test cases per changing requirements.
- Familiar with preparing traceability matrices, test reports, and daily test status updates to leads and stakeholders
