ABOUT

Software Test Engineer with **4.5 Years** of experience in Software Testing and in an agile development environment throughout the testing phase. Experience in ensuring software performance by conducting automated testing, including test case development and execution and bug tracking. Competent at time management and multitasking in deadline-driven environment.

PROFESSIONAL EXPERIENCE

- Overall **4.5 years** of experience in Software Testing with specializing in **Automation** and **Manual testing**, Good experience on Core Java, **OOPS** concepts and **Selenium Webdriver**.
 - Experience in developing **BDD** scripts with **Cucumber** and writing step definitions, features in **Gherkin Keywords**.
 - Performed Cross Browser and **parallel testing** to test whether the web applications are working as desired in different browsers and environments using **TestNG**.
 - Implemented TestNG in Grouping of **Test Cases**, Test Methods and Test Suites for **regression** and functional testing.
 - Experience in using the **TestNG** annotations like Groups, Parameter, and **Data Provider**.
 - Professional expertise in Smoke Testing, Sanity Testing and Regression Testing and Re-Testing Extensive experience in reviewing and analyzing Business Requirements and creating **Test Plans, Test Cases ,Test Scripts**, Test Estimation & Requirement Traceability Matrix (**RTM**).
 - Conducting **API testing** using tools such as **Postman** and **Rest Assured**.
 - Used **GitHub**, source code management tool for code re-usage, high portability extending scope of Automation Testing.
 - Experience in logging defects using **JIRA**, performed defect tracking and reporting.
 - Executed automated tests on Continuous Integration environment (CI) using **Jenkins**.
 - Involved in defect review meetings, weekly status meetings and walkthroughs and interacted with Business Analysts and Developers for resolving Defects.
 - Followed **Agile Methodologies** for all of the project activities
-

EDUCATION

Jayaram College of Engineering and Technology, Trichy | 2013 – 2017

Bachelor of Engineering, Mechanical Engineering.

CGPA: 7.86

WORK EXPERIENCE

Technerds Solutions Private Limited

Oct 2020 to Present

PROJECTS HANDLE

Project 1: Waterstones
Company: Technerds Solutions Private Limited
Domain: Ecommerce
Technology: Core java, Selenium, BDD Cucumber, API Testing, Git, SQL, JIRA, Jenkins, POM
Role: Automation Tester
Duration: Aug 2023 to Present

DESCRIPTION

Waterstones Booksellers Limited, trading as Waterstones (formerly Waterstone's), is a British book retailer owned by the American investment group Elliott Investment Management. It operates 311 shops, mainly in Britain and other nearby countries. As of February 2014 it employed around 3,500 staff in Britain and Europe.

RESPONSIBILITIES

- Analyzing the user stories, prepare the test scenario based on acceptance criteria.
- Review the Test scenarios, identifying test cases for manual and Automation with Selenium WebDriver.
- Design and Develop automation scripts in Selenium WebDriver using **Cucumber Framework**.
- Execution of automated Test scripts through Maven.
- Experience in **API Postman** and **Rest Assured** Java Library with CRUD Operation
- Used **Junit** frameworks for Automation scripting.
- Experience in scheduling the jobs in **Jenkins** CI and CD tool
- Dynamically used **POM, Data Driven** and many other reusable methods from Base class with one another to perform Automation testing.
- Used **Git** as code repository to manage code reviews.
- Extensively automated **Regression** and Functional test suites by using **Selenium WebDriver** with **Java**.
- Conducted **Functional testing** with Valid and Invalid inputs for positive and negative testing.
- Identifying the defects and reporting it through Defect Tracking Tool as **JIRA** and following the defect yet to closure
- Good Knowledge in **SQL Queries** – Joins, Group BY functions.
- Worked in a highly **AGILE** environment and participated in **scrum** and **sprint meetings**.
- Updating project manager regularly about the progress of testing activities.

PROJECTS HANDLE

Project 2: Versant
Company: Technerds Solutions Private Limited
Domain: E-Learning
Tools: Selenium, TestNG, Data driven, Jira, Agile, Manual Testing,
Role: Manual and Automation Tester
Duration: Oct 2020 to July 2023

DESCRIPTION

The **Versant** suite of tests are computerized tests of spoken language available from Pearson PLC. Versant tests were the first fully automated tests of spoken language to use advanced speech processing technology (including speech recognition) to assess the spoken language skills of non native speakers. The Versant language suite includes tests of English, Spanish, Dutch, French, and Arabic.

RESPONSIBILITIES

- Verified functionality after fixes through manual testing and ensured system stability.
 - Generated **TestNG HTML** test reports using the Apache Maven Surefire Plugin.
 - Developed and implemented a Selenium Page Object Model (**POM**) framework using **Java**, **TestNG**, and Selenium WebDriver, reducing script development time.
 - Conducted cross-browser and **cross-platform** testing to ensure compatibility.
 - Designed test cases with preconditions, created Test Plans, and configured **TestNG** dependencies for execution.
 - Leveraged reusable methods like **JUnit**, **POM**, and **Data-Driven** techniques for automation testing.
 - Raised and tracked defects in **JIRA** and ensured timely resolution.
 - Performed functional, **Regression**, Smoke, and Sanity testing with valid/invalid inputs for positive/negative scenarios.
 - Uploaded and updated test cases in **GIT** to maintain version control.
 - Conducted retesting of resolved defects and implemented **cross-browser** and parallel testing.
 - Prepared **Test Summary** Reports, weekly and monthly status updates for stakeholders.
 - Participated in **Scrum** and **Sprint** Meetings to discuss progress and resolve challenges.
 - Executed automated tests in a CI environment using **Jenkins**.
-

SKILLS

- Java Programming language
 - Automation using Selenium
 - Frameworks like Cucumber, Junit, POM, Data driven, TestNG
 - Source code management using Git/GitHub
 - Build Automation using Maven
 - Defect management using JIRA
 - API, Postman, Rest Assured
 - Data base SQL
 - Continuous Integration JENKINS
-

DECLARATION

I hereby declare that all the information given above is true and correct to the best of my knowledge.

Yours faithfully
