SUMMARY

As a seasoned software testing professional, I bring a strong blend of program and project management expertise, along with advanced skills in test automation. I have led and delivered large-scale testing initiatives, ensuring alignment with business objectives while managing full project lifecycles—from gathering requirements to creating detailed automation strategies. My leadership extends across both onsite and offshore teams, ensuring seamless execution and coordination.

A hands-on leader, I am highly proficient in developing and implementing automation frameworks, promoting early automation adoption, and achieving high-quality outcomes in diverse sectors such as healthcare, security, web-based applications, and hardware with embedded firmware. My combined strengths in program, project, and test management, along with my technical expertise in automation, consistently drive projects to success while supporting the broader organizational strategy.

EXPERTISE

- 20+ years of software and quality assurance experience including 13+ years of experience in delivery management and program management.
- Certified Scrum Product Owner (CSPO) certification by Scrum Alliance.
- People manager for 10+ years building highly motivated teams; managed team size of 30+ members
- Automation leader with hands-on experience in building frameworks and automated test suites
- Expertise in test development for the mobile platform (iOS, Android), web browser and desktop (Windows, Mac) application releases; Skilled in Test strategy, test Design, test frameworks, and agile release process
- Proficient in device testing (Mice, Keyboard, Webcam & Presenters) along with firmware.
- Honored with “**Green mile award**” award, twice for consistent outstanding performance, mentoring and helping other teams on Automation and fixing the issues.
- Awarded with “**On the spot award**” for the great work showcased in the project for going above and beyond than expected. For being Proactive and Innovative.
- Awarded with “**Challengers award**” for the idea “**Voice Assistive Experience**” for PWD customers.

TECHNICAL SKILLS

- **Test Management Tool:** HP Quality Center 12, X-Ray, Zephyr, Git, Bitbucket
- **Test Automation Tool:** UFT, SAHI, Parasoft SOA Test 9.9, Postman, Selenium, Cucumber, Cypress
- **Defect Management Tool:** QC, JIRA
- **Database:** Oracle, SQL Server, PostgreSQL
- **Scripting language:** VB Script, Java Script

PROFESSIONAL EXPERIENCE

Logitech

Product Quality Manager

May 2022 – Present

- Achieved the successful delivery of over 10 releases in 6 months, maintaining a flawless record with no field issues, while boosting deliverables by 20% through the optimization of test suites and coverage.
- Oversaw the end-to-end delivery of various new products, including mice, keyboards, webcams, and presenters, ensuring excellence from concept through to customer satisfaction.
- Mentored a peer team in automation development and rollout, empowering them to cut manual testing efforts by 30%.
- Effectively program-managed software QA releases across 10+ teams, ensuring seamless coordination and communication. Delivered timely and transparent status updates to the Senior Leadership Team, reinforcing alignment and accountability throughout the release process.

Fidelity Investments**Senior Manager, Quality Assurance**

Mar 2007 – May 2022

- Implemented a CI process for automation scripts, enabling automated test coverage for every build and achieving 100% efficiency in build acceptance testing.
- Program-managed the rollout of best practices across the organization, leading to a 30% improvement in operational efficiency.
- Actively led the development of automation frameworks, reducing test coverage and completeness timelines from 7 days to just 2 days.
- Served as an individual contributor, automation consultant, and manager, mentoring and supporting peer teams to ensure successful, high-quality releases.
- Oversaw a team of 8+ development engineers, delivering quality assurance for over 20 features with varying complexity from medium to high.
- The framework developed by me was agnostic to versions and languages, enabling the automation of 100% of regression scenarios and guaranteeing exceptional quality assurance.
- My proposed automation framework was adopted by more than 20 teams, significantly enhancing operational efficiency and test effectiveness.

Wipro Technologies Ltd**Project Engineer**

September 2005 – March 2007

- Test Engineer handling software quality assurance for a leading security product.

Siemens Information Systems Limited (SISL), Bangalore**Software Engineer**

September 2004 – September 2005

- Test Engineer in medical application domain owning testing modules for a medical application dashboard

EDUCATION

- Bachelor of Engineering – Electrical & Electronics – RMK Engineering College, University of Madras
