## About Me

Quality Assurance/Engineering Manager with 15 years of experience

## Profile Summary

Quality Assurance Engineer with over 15 years of extensive software experience. Successfully led a 20+ member team proficient in manual and automated testing, including mobile apps. Seeking to leverage my proven communication skills across diverse teams, aiming to spearhead QA departments, drive the delivery of high-quality products, and implement robust QA strategies for technical teams. Proficient in preparing Test Automation Road Map proposals for various modules, I've also excelled as a Scrum Master for multiple projects. My expertise extends to writing Selenium Automation Scripts using JAVA, crafting the Page Object Model design pattern, and conducting API testing using Rest Assured. With a strong background in Agile methodologies, I contribute to efficient project execution and iterative development. Demonstrated proficiency in crafting and executing detailed test plans and manual scripts, to validate software functionality and ensure alignment with business requirements.
