Computer Language: Python, Java, C, C++.

Documentation: System Test Case, System Test Report, Software Requirement Specification, Release Note, Weekly Report, Monthly Report, Load Test Report, QA Checklist, Documentation analysis, Test Planning and Design.

WORK EXPERIENCE

Lead QA Engineer, Jean Martin Inc.

Sep 2023 – Present, Chennai

Experienced Lead QA professional with over 2 years of hands-on testing experience, contributing to high-quality software releases for an Applicant Tracking System (ATS) and HRMS.AI product across web and mobile platforms.

Key Responsibilities:

- Designed and executed manual & automated tests (**Python & Java Selenium**) across **Functional, Integration, Regression, API (Postman)**, and **performance (JMeter)** testing.
- Collaborated with **Agile Scrum** teams on sprint planning, stand-ups, and retrospectives.
- Estimated efforts, analyzed requirements, prepared test reports, and ensured SDLC compliance with a strong quality focus.
- Utilized **JIRA and GitHub** for defect tracking, version control, and managing the bug life cycle.
- Provided regular project status updates to stakeholders and the Project Manager.

Key Achievements:

- Identified and reported 100+ critical bugs in production-critical modules.
- Played a key role in optimizing test coverage, improving testing efficiency in fast-paced Agile releases.
- Acted as a QA point of contact, mentoring junior team members and ensuring adherence to testing standards.

Senior QA Engineer, Jean Martin Inc.

Sep 2021–Aug 2023, Chennai

Experienced Senior QA professional with over 2 years of hands-on testing experience, contributing to high-quality software releases for an Applicant Tracking System (ATS) and HRMS.AI product across web and mobile platforms.

Key Responsibilities:

- Developed and executed manual test cases based on detailed requirements and acceptance criteria.
- Performed various types of testing including Functional, System, Integration, Regression, Browser Compatibility, Gorilla Testing, and REST API testing using Postman.

QA Engineer, Jean Martin Inc.

Nov 2018 – Aug 2021, Chennai

Contributed to the testing and quality assurance of Applicant Tracking System (ATS) and GOALS & IPCR products across web and mobile platforms. Played a key role in manual testing, test case design, and collaboration with cross-functional teams to ensure defect-free releases.

Key Responsibilities:

- Analyzed user and system requirements to design and derive detailed test scenarios and test cases.
- Participated in test estimation and effectively handled multiple projects across mobile and web platforms.
- Supported test planning, execution, and ensured timely, high-quality releases

PROJECT

1. OpenJob.AI

April 2025 – Present

Project Overview:

OpenJob.AI is an AI-driven talent platform that matches companies with vetted global software engineers, enabling fast, efficient hiring for remote and contract roles.

2. JABORD

Oct 2018 – Present

Project Overview:

Jabord is an AI-powered Digital Recruiting and Predictive Analytics Platform that serves as a modern alternative to traditional Job Boards, Resume Builders, and Applicant Tracking Systems (ATS). By unifying fragmented HR solutions into a single platform, Jabord helps organizations rebrand their career pages, post job requirements, manage candidates end-to-end, and hire top talent — all through a rich multimedia interface.

For applicants, Jabord provides tools to create and rebrand profiles, explore tailored career paths, and engage with employers via enhanced multimedia features. For recruiters and HR specialists, it offers advanced job posting, smart candidate search, applicant tracking, candidate relationship management (CRM), background checks, integrated communication, and full transparency across the hiring process.

3. HRMS.AI

Dec 2022 – Present

Project Overview:

HRMS is designed to automate and streamline employee performance evaluations. It provides a flexible framework to assess achievements and competencies, ensuring objective reviews that support promotions, salary decisions, and career growth.

4. GOALS – Gabriel Organized Analysis Location System

Oct 2018 – Dec 2018

Project Overview:

GCNY lacked a system to analyze retailer ratings, demographics, and identify new sales areas. A GIS solution was needed to visualize customers, uncover growth opportunities, and replace labor-intensive Excel-based zip code distribution for eShop clients.

5. IPCR

Aug 2018 – Sep 2019

Project Overview:

i-PCR is an iOS app for ambulance crews to record and track patient details during emergency transports. It captures information such as address, diagnosis, vitals, insurance, crew, and physician details, along with signature acknowledgments. Data is updated in real time via Java web services, and consolidated patient reports can be generated as PDFs.

6. Stealth Cam

July 2020 – Sep 2020

Project Overview:

24/7 Monitoring of the logs and connection.

EDUCATION

Bachelor of Electronics and Communication Engineering

Aug2010–May2014

Shree Motilal Kanhaiyalal Fomra Institute of Technology

Higher Secondary School Certificate

June2009–Apr2010

Buvana Krishnan Matriculation Higher Secondary school
