

BALACHANDAR R

Software Test Engineer

✉ balachandararaja61096@gmail.com

☎ + 91 9363734552

OBJECTIVE:

With strong expertise in automation test tools and designing and implementing automation test suites, I would like to work as automation tester for your esteemed organization and ensure high-quality software products are delivered to end users.

PROFILE SUMMARY:

- Extensive experience in **Manual and Automation Testing**. Hands on experience in **Test driven development (TDD)**, **Behavior driven development (BDD)** and acceptance test driven development.
- Implemented **Page Objects Module** based frameworks using **Selenium WebDriver**, **Java**, **Cucumber**.
- Worked with **Jenkins** tool for achieving the **Continuous Integration**.
- Experience in designed Functional decomposition **TestNG** framework.
- Expertise in locating elements using **XPATH** and **CSS**. Excellent working experience of **Software Development Life Cycle (SDLC)**, **Software Testing Life Cycle (STLC)** and testing methodologies like Agile/Scrum.
- **WebDriver** on multiple browsers and on different platforms. Worked With selenium grid to achieve parallel execution.
- Experience in creating and executing scripts in parallel and sequential using **WebDriver-TestNG** with **Java**.
- Collaborating with developers and other stakeholders to identify and resolve defects and issues Conducting **API testing** using tools such as **Postman**. Proficient with **Rest API** and Validated **Restfull API** services.
- Experience on Writing **SQL queries** to extract data from various source tables to perform database testing
- Experienced in designing and implementation of Various Frameworks in **Selenium**. Developed test plans, test cases and test scripts to verify system functionality.
- Good in handling **GIT tool** to pull and push the codes.
- Critical thinker and problem-solver drives process improvements by scrutinizing current system.

EXPERIENCE PROFILE:

- Associated with **Colan Infotech**, as Software Test Engineer **From November 2020 to till date**

ACADEMIC:

- **M.E(Embedded System Technology)** from Anna University-2020-65%.
- **B.E(Electrical and Electronics Engineering)** from Chennai Institute of Technology-2018-67%

Technical Expertise:

- **Functional Automation Tool** : Selenium Web Driver
- **Framework** : BDD, TestNG, JUnit and Data Driven
- **Project Management Software** : Maven
- **Software Configuration management** : GIT
- **Test Management tool** : JIRA
- **CI/CD Tool** : Jenkins
- **Language** : Core java
- **API** : Rest Assured

Project Title:

Project #1

Project Title : ROVER
Domain : E -Commerce
Role : Software Test Engineer

Description:

Rover.com was founded in 2011 in Seattle, Washington and is formally incorporated under the name "A Place for Rover, Inc. "The company serves as a broker and takes roughly 20% of each transaction booked through its site . The Company Services Pet sitting , Dog boarding , Doggy day care , Dog walking , Drop-In Visits and Dog Training through GoodPup.

Roles and Responsibilities:

- Reviewed all the Requirement documents, Functional Specification and Use Case documents
Implemented automation using **Selenium WebDriver, JAVA, Cucumber, Maven.**
- Expertise in developing automation scripts in **BDD** format using **cucumber** and proficient in writing cucumber scenarios in **GHERKIN** format.
- Developed the features, scenarios, step definitions for **BDD (Behavior Driven Development)** and Performed Back-End Testing for data validation using **SQL Queries.**
- Executed automated tests on Continuous Integration environment (CI) using **Jenkins.**
- Strong experience in **Black Box** and **Gray Box** testing. used **JIRA** as Defect
- Tested the application in highly dynamic environment with sprint team using **agile methodology.**
- Automated Regression Test cases using Selenium **Web Driver, Jenkins and Maven.**
- Having good experience in **API Testing** and **Rest Assured.**
- Hooks in **Cucumber** can be used to set up and tear down resources before and after scenarios.
- we define repositories for downloading project dependencies by using Maven.

- We allows **Jenkins** to defining pre-build and post- build actions, such as setup and cleanup tasks for regression testing.
- Pre-request scripts in **Postman** allow the execution of code before sending an **API request**.
- In **Jira**, Log and track the time spent on testing activities for better resource management.
- Test the execution of triggers and their impact on data changes with the help of **MySQL**.
- We manages releases, making it easy to **track versions** and changes in **GitHub**.

Project #2

Project Title : **DAP Airline**

Domain : E-Travel

Role : Software Test Engineer

Description:

DAP is a Chilean airline that operates charter and scheduled flights, with its base in Punta Arenas, Chile. The DAP group is a consortium formed by Aerovías DAP, AeroRescate, Antarctic Airways, DAP Antarctica, DAP Helicópteros and Mineral Airways.

Roles and Responsibilities:

- Verifies specific functionality after changes or fixes are made while perform **Manual Testing**.
- Used Apache Maven Surefire Plugin to create **JUnit/TestNG HTML** test report for the entire test suite.
- Develop and implement robust Selenium Page Object Model framework with Selenium WebDriver using **Object Oriented Programing Java** and open source unit test framework **TestNG** which cut down the script development time in half.
- Strong experience in **cross browser**, cross platform web testing with **Selenium Web Driver**.
- In Test Design, conditions that must be met before executing the test case.
- Test Plan specifies the goals of testing, including what you want to achieve and verify.
- In **TestNG**, a test method will only be executed if its dependencies are successful.
- Dynamically used **Junit, POM, Data Driven** and many other reusable methods from Base class with one another to perform **Automation testing**.
- Raise and track defects until closure. Implementation of **cross browser** and **parallel browser testing**.
- Conducted **Functional testing** with Valid and Invalid inputs for **positive** and **negative** testing.
- Uploading and updating the test cases in **GIT** on daily basis.
- Frequent discussions in **Scrum and Sprint Meetings**
- Executed automated tests on **Continues Integration environment (CI)** using **Jenkins**
- **Regression Testing** will be done to check the existing functionality must not be affected.
- Client Interaction with e-mail / conference call.
- Preparing the Test Summary Report.
- Preparing Weekly and monthly status report.
