Objective:

Seeking a challenging QA position that allows me to leverage my expertise and contribute to the success of projects.

Profile

- Experienced Software Test Engineer with nearly 3 years of expertise in manual and automation testing techniques.
- Proficient in defining test strategy, planning, creation, execution, and defect tracking.
- Well-organized working experience in Agile and waterfall models
- Strong analytical and critical thinking skills
- Experienced in cross-browser and cross-platform testing for both Web and Mobile applications.
- Well-versed in various testing types: Functional, Regression, System Integration, GUI, User Acceptance, Usability, and End-to-End Testing.
- Independently evaluated core IAM-based product (EZTO) for successful market launch.
- Proficient in testing Subscription & licensing modules, Single Sign-On (SSO), Payment gateway, and social connections.
- Skilled in SQL, Postman API testing, and JMeter Performance testing.
- Identifying/preparing regression test cases and maintaining regression repository.
- Possesses foundational knowledge and exposure to automation tools, including Tosca and Cypress.
- Recognized for identifying critical defects, enhancing product quality and customer satisfaction.
- Conducted internal sessions for sharing product knowledge.
- Proficient in Insurer Brokerage platforms & Data Migration.
- Good understanding of QA methodology, SDLC, and STLC.
- Enthusiastic, flexible, and disciplined team player with a keen aptitude for adaptive learning.
- Committed to continuous learning and professional growth.

Skills:

- Defect Management Tools: JIRA, YouTrack
- Testing Tools: SQL, Postman API, JMeter, Cypress
- Testing Types: Functional, Regression, System Integration, GUI, User Acceptance, Usability, End-to-End
- IAM Product – EZTO/QLIKVERIFY
- Others - Shift2Net HCM Portal and AonLink (In-House Brokerage Platform tool)

Academics:

- Bachelor of Technology (Information Technology) from M. Kumarasamy College of Engineering, Karur (Autonomous - Anna University),
Batch - 2016, CGPA – 7.732.
 - Higher Secondary from Kurinji Higher Secondary School, Namakkal,
Year of completion – 2012, Percentage - 77.25.
 - Secondary Schooling from Anna Nehru Higher Secondary School, Namakkal,
Year of completion – 2010, Percentage – 80.2.
-

Work Summary

Company	Role	From	To	Years
Grootan Technologies	Test Engineer	Apr 2021	Jan 2023	1.9
LogicWorks BT	Software Trainee	Apr 2020	Mar 2021	1

Experiences

Test Engineer | Grootan Technologies | Apr 2021 - Jan 2023 | 1 year, 10 months|

Grootan Technology: Consulting firm specialized in developing apps for banks and industries. Successfully launched QLIKVERIFY, a core IAM tool ensuring secure user access and single sign-on for comprehensive domain visibility.

Roles and Responsibilities

- Managed timely releases of the company's flagship product within the Agile development framework.
- Conducted end-to-end testing of IAM tools using manual and Cypress automation, specializing in user authentication, authorization, role-based access control, and security measures.
- Performed API testing with Postman for modules such as Subscription & Licensing, SSO, Payment Gateway, and social connections.
- Executed regression and smoke testing to ensure product stability.
- Conducted cross-platform and cross-browser testing for seamless user experiences.
- Prepared and maintained comprehensive Test Summary Reports to enhance communication within Agile sprints.
- Tracked and collaborated on defect reports for timely closure.
- Updated the product knowledge repository for seamless information sharing.

Achievements

- Recognized for strong leadership and technical skills.
 - Earned multiple performance awards for dedication and contributions.
-

Software Trainee | Logic Works BT | Apr 2020 - Mar 2021 | 1 year

Aon is a global company focused on financial services like insurance and pension administration. At Aon, I used tools called AonLink and Shift2Net, which help insurance brokerages manage clients, handle day-to-day tasks, and administer policies. These tools include a secure portal for client HR and members, offering various entry points like system admin and customer. They support functions such as Broker Account Management, Operations (Enrollment, Claims, and Invoices), and Client Portals for HR and members.

Roles and Responsibilities

- Conducted User Interface & Functional Testing for AonLink upgrade, including comprehensive test case execution and reporting.
- Led System Testing, Acceptance Testing, and go-live support testing for smooth transitions.
- Provided critical support for Data Migration processes.
- Collaborated closely with clients to evaluate end-to-end functionality across various portals of AonLink, encompassing Broker Account Management, Enrollment, Claims & Invoices, Client HR Portal, and Client Members Portal.
- Executed E2E, Regression, and Usability Testing for the Shift2Net HCM Portal.
- Methodically extracted defect reports and diligently tracked their status until resolution, maintaining effective communication with cross-functional teams.
- Took responsibility for training newcomers on tools and processes while providing prompt reviews and constructive feedback to team leads.
- Actively contributed to updating the knowledge repository of business processes, facilitating streamlined information sharing.

Achievements

- Trained new joiners, increasing team productivity within a short timeframe.
