PROFILE

Results-oriented and detail-driven Software Test Engineer with one year of experience in quality assurance and testing methodologies. Proficient in creating comprehensive test plans, executing test cases, and identifying defects to ensure the delivery of high-quality software products. Skilled in various testing techniques and tools, including manual and automated testing. Adept at collaborating with cross-functional teams to analyze requirements and improve testing processes. Eager to leverage skills and experience to contribute to the success of dynamic software development projects.

KEY SKILLS

Selenium

FireFlink

API

Eclipse

Oracle 10G

SQL

PROFESSIONAL EXPERIENCE

Dridatah Technology

Test Engineer

2023 – 2024

Kazhakkootam, India

- Developed and executed comprehensive test plans and test cases for various software applications, ensuring adherence to project requirements and deadlines.
- Identified, reported, and tracked software defects using issue tracking systems, collaborating closely with development teams to resolve issues promptly.
- Conducted manual testing across different platforms and browsers to ensure the compatibility and reliability of software products.
- Implemented automated testing scripts using Selenium WebDriver, reducing testing time and increasing test coverage.
- Participated in daily stand-up meetings, sprint planning sessions, and retrospective meetings as part of an Agile development team.
- Collaborated with cross-functional teams to review user stories, acceptance criteria, and technical specifications, providing feedback to improve software quality.

PROJECTS

Shoppersstack Application Testing

- Verified product availability and button functionality, including login and apply buttons.
- Ensured proper display of product images.
- Tested the ordering process for specific products and added products to the cart.
- Utilized Firelink for test automation, defect identification, and script testing.
- Proficient in both automation and manual testing.

OLA Application Testing

- Conducted testing on the OLA application.
- Identified defects, including confirmation of bookings for impossible rides.

Fabrication of automatic seed sowing machine engaged with internet of things (IOT)

- Designed and developed an IoT-based seed sowing machine for agricultural purposes.
- Implemented remote operation capabilities, enabling the machine to be controlled from a distance.
- Utilized ankle-connected shafts with a chain mechanism to efficiently drop seeds into the soil.
- Integrated an inbuilt sensor for real-time object detection in the machine's path to ensure safety and precision.
- Successfully demonstrated the project's functionality as a proof-of-concept for automating seed sowing processes in agriculture.

EDUCATION

Bachelor of Engineering (B.E.) in Mechanical Engineering

Paavai College of Engineering
Secured 69.9%

2016 – 2020
