PROFILE

QA professional with **3.5 years** of experience in **Manual testing** and **API testing** within **FinTech** domains, including **Capital Markets**, **Microfinance**, and **Mutual Funds**. Proficient in testing **web** and **mobile applications** (**Android**, **iOS**), executing **SQL queries** for data validation, and utilizing **JIRA** and **Azure DevOps** for defect tracking. Skilled in analyzing business requirements, designing test cases, and delivering quality outcomes. Possess basic knowledge of **Java**. Seeking a challenging opportunity to contribute to impactful projects.

EDUCATION

2022 - 2024

ANNA UNIVERSITY

- Master of Computer Science

2011 - 2014

THE NEW COLLEGE

- Bachelor of Computer Science

WORK EXPERIENCE

JUL 2021 - NOV 2024

Market Simplified India Ltd.

Senior Quality Analyst - Level 1

- Designed and reviewed detailed test cases based on wireframes, BRDs, and API documentation to ensure comprehensive test coverage for complex workflows.
- Mentored junior team members, enhancing their testing skills and ensuring adherence to quality standards.

Quality Analyst - Level 2

- Executed cross-platform testing across Web, iOS and Android applications, validating seamless functionality and user experience.
- Performed functional, regression, integration, system, exploratory, UAT, end-to-end, static, and dynamic testing, ensuring high-quality, defect-free releases within strict timelines.
- Participated in requirement analysis and shared insights with the team through detailed MOMs.
- Performed test closure activities and delivered summary reports to external QA clients, highlighting key findings.

Quality Analyst - Level 1

- Collaborated in Agile sprints, participating in standups, and reviews for continuous delivery and quick feedback.
- Conducted exploratory testing for smaller workflows and collaborated with QA and development teams to improve testing strategies.

SKILLS

- Manual Testing
- API Testing
- Java
- SQL for Data Validation
- Cross-Platform Testing
- Regression & Functional Testing
- Defect Tracking and Test Management
- Test Documentation & Closure Reports
- Production Issue Handling & System Testing
- Agile Methodology
- Communication & Collaboration (SPOC, MOMs)
- Teamwork & Leadership
- Critical Thinking & Problem Solving

AWARDS & CERTIFICATION

- ISTQB Certification
- Value Champ Award - Market Simplified [FY 23-24]

PROJECTS

■ Axis Mutual Fund - MAR 2024 - NOV 2024

Assigned to the revamp project, Conducted testing across **Web, Mobile responsive, Mobile applications,** and **APIs**

Senior Quality Analyst – Level 1

- Analyzed BRDs to identify gaps and prepared, updated, and reviewed comprehensive test cases, ensuring clarity and complete coverage for each module.
- Executed test cases for integration builds, reported and tracked bugs, and defined exit criteria while conducting client demos before release.
- Performed API testing for key and value validation with third-party vendors, ensuring data integrity and seamless integration.
- Acted as SPOC (Single Point of Contact) for modules and led the team during the lead's absence, managing client releases and ensuring smooth delivery.

■ CAGL - AUG 2023 - FEB 2024

Assigned to the Microfinance Money Lending Project, responsible for testing the **Android application** and **APIs**

Quality Analyst – Level 2

- Tested the application from scratch, including UAT, alpha, and beta testing, and contributed to test closure reports to ensure comprehensive validation.
- Validated APIs for data retrieval, ensuring accuracy and consistency, and prepared test cases for complex functionalities to cover business logic thoroughly.
- Handled production issues and conducted system testing before each release, ensuring application stability and seamless functionality.

■ CSK - DEC 2022 - JUL 2023

Assigned to an API Development Project for the Capital Markets domain. Performed **API testing, SQL Queries**

Quality Analyst – Level 2

- Prepared API test cases and comprehensive test closure reports, ensuring smooth client releases and quality deliverables.
- Conducted API testing based on Business Process-Based Testing (BPBT), identifying and reporting bugs for timely resolution.
- Utilized SQL to validate data integrity, perform complex queries, and verify database consistency during testing.

■ BFSL - JUL 2021 - DEC 2022

Assigned to a Capital Market Application Project, responsible for testing **web** and **mobile applications**

Quality Analyst – Level 1

- Developed comprehensive test cases for the entire application, ensuring thorough test coverage..
- Performed pre- and post-production sanity testing, ensuring application stability and seamless deployment.
