|                  |                                          |
|------------------|------------------------------------------|
| Project Name     | National Payment System Strategic (NPSS) |
| Client Location  | UAE                                      |
| Project Location | Chennai-India                            |

**Company** : RAQMIYAT INFORMATION TECH.PVT

**Job Title** : Software Test Engineer.

- **Description:**

Instant payment (sometimes referred to as real-time payment or faster payment) is a method of exchanging money and processing payments, allowing for almost immediate transfer of money between bank accounts, instead of the more typical one to three business days. Many countries have implemented instant payment systems, and many instant payment systems and platforms are currently under development worldwide, due to increased need for faster and reliable transactions. The Euro Retail Payments Board (ERPB) define instant payments as: Electronic retail payment solutions available 24/7/365 and resulting in the immediate or close-to-immediate interbank clearing of the transaction and crediting of the payee's account with confirmation to the payer (within seconds of payment)

## RESPONSIBILITIES

- Regular participant in planning meetings, analyze requirements and prepare the use cases.
  - Preparing Test Estimation, Test Strategy and Test Plan documents and sharing for review and comments.
  - Involved in API testing, both manual testing using Postman.
  - Performed Mobile Testing, Retesting, Functionality Testing, and Usability Testing.
  - Test and certify features for release and keep tracking the status of the task, preparing burn down chart.
  - Regularly run Regression test suite, trouble-shoot any issues and provide constant feedback to the scrum team.
  - Document and lead root cause analysis and track defect resolution until completion.
  - Review and provide feedback on development code, test designs and test cases.
