

# SAIKUMAR M N

JR. SOFTWARE TEST ENGINEER

## INTERNSHIP

➤ **Internship in Software Testing** (Sep 2022 to Feb 2023)  
Undergone 6 months Internship on Testing tools from Inmades Infotech Pvt. Ltd.

➤ **Internship in Software Testing** (Apr 2023 to Jun 2023)  
Undergone 3 months Internship on Testing tools from PHN Technology Pvt.Ltd

## Expertise preparing in

- ✓ Test case Design
- ✓ Test Case Requirement Traceability
- ✓ Matrix Bug Report Sheet
- ✓ Daily Status Report

## Automation using Selenium

- ✓ BDD Scripts with Cucumber Smoke, Sanity, Functional
- ✓ Testing Retesting and
- ✓ Regression Testing

## TECHNICAL SKILLS

- **Testing Tool**  
Selenium WebDriver, Appium
- **Framework**  
Data Driven, POM, Junit, TestNG and Cucumber
- **API**  
Postman and Rest Assured
- **Test Management Tool**  
Jira
- **Exposure on Tools**  
Maven & Jenkins
- **Programming Language**  
Core Java
- **Database**  
Oracle, MySQL
- **Database Language**  
SQL, PLSQL
- **Database Tools**  
ISQL Plus (Browser Level), SQLPLUS (cmd Level), TOAD

## EDUCATION

**Msc – CHEMISTRY (68%)** - (2020 to 2022) -  
St.Peter's Institute of Higher Education and Research,  
Avadi.

**Bsc - CHEMISTRY (62%)** - (2014 to 2017) -  
Jaya College of Arts and Science, Thiruninravur.

**HSC (49%)** - (2012 to 2014) -  
TMKV.Govt Boys Higher Secondary School,  
Ammayarkuppam.

**SSLC (60 %)** - (2011 to 2012) - St. Charles Higher  
Secondary School, K.G.Kandigai.

## INTERNSHIP PROJECTS

### Manual Testing

|             |                                                                                                                                                              |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Project     | Bistro Bites                                                                                                                                                 |
| Description | Web based E-Commerce application                                                                                                                             |
| Approach    | Manual Testing                                                                                                                                               |
| Role        | Designed Test approach, Prepared User Stories, Test Cases and manually tested customer check points and flow. Analysed Testreport and reported bugs in Jira. |
| Documents   | Requirement Traceability Matrix, Bug Report Sheet and Daily Status Report.                                                                                   |
| Tools       | Jira                                                                                                                                                         |

### Automation Testing

|             |                                                                                                                                                                                                                                                                                                                         |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Project     | Flipkart                                                                                                                                                                                                                                                                                                                |
| Description | Web based E-Commerce application                                                                                                                                                                                                                                                                                        |
| Approach    | Automation Testing                                                                                                                                                                                                                                                                                                      |
| Role        | Created test automation scripts with Cucumber and Selenium WebDriver. Analysed test results and maintained the test reports using JVMReports. Generated Test scenarios, Test Case Documentation and Test Data Collection. Identified the defects, reported it through Defect Tracking Tool and followed Bug Life Cycle. |
| Documents   | Requirement Traceability Matrix, Bug Report Sheet and Daily Status Report.                                                                                                                                                                                                                                              |
| Tools       | Selenium-Java, Cucumber BDD, JUnit, TestNG, Maven and DataDriven.                                                                                                                                                                                                                                                       |
| Framework   | Cucumber in BDD Framework, JUnit in TDD Framework                                                                                                                                                                                                                                                                       |

## LANGUAGES

**ENGLISH | TAMIL | TELUGU**

## EXPERIENCE

- ❖ **Eight months** worked as **Quality chemist** in **Electroplating and Metal finishers - Ambattur**  
(From Jan 2018 to Aug 2018)
  - Chemical Quality Testing.
- ❖ **One year** worked as **Production Chemist** in **NURAY CHEMICALS PRIVATE LIMITED - Tiruvallur**  
(From Dec 2018 to Dec 2019)
  - cGMP online documentation.
  - BMR, BCR and ECR documentation and equipment maintenance.
