

PROFESSIONAL SUMMARY

Techno-functional Solution Architect with 15+ years of expertise in delivering high-quality and performance multi-platform software products. Proven track record of leveraging shift-left methods to understand complex domains and products, and developing automated functional integration and end-to-end tests. Skilled problem solver with a human-oriented approach and an eye for identifying solutions. Driven to lead ambiguous situations, dealing with technical issues and coming up with effective solutions to ensure customer project deliverables. Passionate about driving continuous improvement and achieving customer satisfaction.

KEY COMPETENCIES & TECH SKILLS

- Test processes
- QA functional testing
- Test Design Strategies
- Writing Test Cases/ Automating Tests
- Technical and functional troubleshooting
- Test Management Tools: Microsoft Team Foundation Server, JIRA, Bugzilla
- Agile and Scrum methodologies
- Kanban and Waterfall
- Strong analytical and problem-solving
- BDD / TDD (Cucumber & JBehave)
- Open Source Test Frameworks
- Functional & Non-Functional
- Automation Tools: Selenium, WebdriverIO, Karate, Cypress, Rest Assured, Appium, Jmeter, Postman, Pytest
- Programming and Scripting
- Languages: JAVA, JavaScript, Python
- Database: Microsoft SQL Server, My SQL, MONGO DB, Cassandra
- Reporting Tools: Micro strategy
- Framework: Spring Boot, TestNG, Junit, Jacoco, Mockito
- Web Security & Cenx Hailstorm
- Source Code Management Tools: GIT, Perforce
- Cloud: Amazon Web Services, AWS-RDS, AWS Dynamo, AWS Certificate Manager, AWS Device Farm, AWS Cloud Watch, AWS Cloud Front, Cloud
- DevOps technologies: CI/CD, Docker, Kubernetes, Jenkins

LONG-TERM PROGRESSIVE EXPERIENCE – NOTABLE MENTION

- Catalogued comprehensive **testing strategies for both functional and non-functional testing**
- Deeply specialized in developing **test automation frameworks for web, mobile, thick client**, SQL and NoSQL data validation, utilizing industry-standard tools and frameworks
- Proficiently implemented **REST API and microservices functional automation**, performance testing and security testing of Rest API
- Resourcefully conducted **white box testing for code coverage and test coverage**, code deployment
- Expertly created **4000+ test automation scripts** for web and API
- Efficiently managed **Agile Scrum teams**, facilitating release planning, sprint planning, backlog grooming, and retrospective meetings
- Proactively **built successful QA teams from the ground up**, and mentored co-team members in developing automated test suites for optimized test execution
- Adeptly used **open-source test frameworks** for overall system testing within an Agile environment

WORK EXPERIENCE

Apr 2021 - Aug 2023 **OPRT Development India Limited (Officially Oportun)**
Senior Software Engineer – Test (SDET)

Established automation frameworks for REST API and Web UI functional tests for Fintech Risk, Verification and Validation services, Payments services, and Loan disbursement Applications

PROCESS AND TOOLS EXPERTISE

Established -

Web platform test automation framework using Selenium 3.0, WebDriver IO, Java/J2EE, TestNG, Python, PyTest, JavaScript, open source technologies

REST API and microservices automation framework - Rest Assured, Karate Framework with Java

Test automation framework for mobile platform - Appium for Android devices

White box testing, unit test cases - Junit, Mockito, Jacoco

End-to-end database testing framework - Spring JPA, Spring Boot

Functional and performance test suite for REST API and microservices using Postman, Swagger, Insomnia and JMeter respectively

CI/CD pipelines for test automation using Jenkins, source code management tools like GIT, Perforce

Technical Leadership – Subject Matter Expertise

- Functional ownership of Risk Engine, Payments, Buy Now and Pay Later products
- Conceptualized unit test cases and assisted developers in improving code and test coverage
- Enhanced performance and security test suite for microservices using JMeter, Karate tools
- Handled cloud services such as AWS RDS, Dynamo DB, Cloud Front, EC2
- Created and optimized SQL and NoSQL Standalone data and schema validation framework
- Figured fully automated Jenkins jobs for test automation and deployed them in cloud instances
- Curated Microservices/Rest API Automation for testing using Python and Pytest.
- Framed Test Strategies, Test processes, and Quality Metrics to ensure full test coverage
- Identified and communicated risks related to releases
- Demonstrated experience in BDD (Behaviour Driven Development) and TDD (Test Driven Development)

Team and Project Leadership

- Conducted interviews and ramped up team from scratch to 30+ SQA engineers
- Actively participated in Agile ceremonies
- Maximized the value delivered by the team in collaboration with the product owners
- Led and mentored test personnel, providing technical guidance and training
- Worked cross-functionally with internal engineering teams in an agile environment

PREVIOUS ROLES AND PROJECTS HANDLED

Dec 2019 - Apr 2021 Intelizest Consulting Limited – Deputized with Oportun LLC Senior Software Engineer – Test (SDET) for Financial applications

- Built and deployed fully automated Jenkins jobs for test automation
- Established end-to-end database testing framework using Spring JPA and Spring Boot
- Authored close to 500+ test cases for UI, and microservices automation
- Functional ownership of Secured Personal Loans, Data Services
- Handled cloud instances such as AWS RDS, Dynamo DB, Cloud front, EC2s
- Created software artifacts such as test plans, test cases, test procedures and test reports
- Led a 10+ member Agile Scrum team through the Agile development process

Jun 2018 - Dec 2019 SecureW2 India Private Ltd Senior Automation Test Engineer

- Led Agile Scrum teams through the Agile development process
- Validated AWS Certificate Manager Automation
- Collaborated with product manager to prioritize and validate requirements
- Facilitated Release Planning, Sprint Planning, Backlog Grooming, and Retrospective meetings
- Structured and strengthened
 - ✓ UI automation framework for Securew2 web products using Selenium Web Driver, TestNG and Java
 - ✓ Mobile automation suite using Appium, TestNG and Java for Android native app and web app
 - ✓ Thick client automation using the Test Complete tool
 - ✓ AWS Certificate Manager validation automation
 - ✓ L2/L3 automation suite for Radius protocol using Python and PyTest
 - ✓ REST API functional automation and performance testing suite for the web using JMeter

Aug 2016 - Jun 2018 ABCO India Private Ltd (United Health Group) Senior SQA Engineer

- Assembled UI Automation Framework, Rest API Automation using Jmeter and Postman; Functional owner of Crimson Reporting Services
- Migrated 400 manual test cases to automated test cases

PROCESS AND TOOLS EXPERTISE

Proficient in

Monitoring and debugging applications using **New Relic, Sumo Logic**

Validating datasets in NoSQL databases such as **MongoDB, AWS DynamoDB, Micro Strategy**

Security Testing Using **Cenzic Hailstorm and Web Security**

Automating test scripts for **L2/L3 layer protocol testing for TCP and Radius protocols**

Virtualization tools such as Docker and Kubernetes for scaling, deployments and containerization

Creating CI/CD pipelines for test automation using **Jenkins, GIT, Perforce**

Framing **User Stories** from system design, documenting and translating user stories to scenarios and test cases

- Listed test suite for Micro strategy platform and QUBES using Integrity manager; Successfully guided Engineering team through agile development
- Guided Agile Scrum teams through the Agile development process
- Compiled Performance testing suites for Micro stage reports
- Structured Authentication tokens and role authorization automation testing suites

Sep 2014 - Aug 2016 Mobius Knowledge Services
Deputy Manager – SQA Engineering

- Developed automation testing framework for various products using open-source technologies
- Managed 10-member offshore QA teams
- Successfully bid and delivered an E-Com platform product worth \$100,000
- Facilitated execution of Quality Management Process for customer satisfaction and continuous improvement
- Collaborated with QA and Dev teams to troubleshoot and resolve defects
- Created standards and procedures documentation for a large QA Team

July 2011 - Sep 2014 Symantec Software and Services
SQA Engineer

- Established a test automation framework using Selenium 2.0
- Conducted end-to-end automation and manual testing across multiple platforms
- Conducted security testing using Cenzic, web security, and SkipFish
- Analyzed and documented test scenarios and framed functional end-to-end test cases
- Improved products by analyzing competitor's products and technologies

PREVIOUS EXPERIENCE

Jun 2010 - Jun 2011 CashEdge India Ltd (FISERVE)
SQA Engineer

Dec 2007 - Jun 2010 Cognizant Technology Solutions
Programmer Analyst

ADDITIONAL DETAILS

Education **M.E. Computer Science** and Engineering | Sathyabama University, Chennai | 2007
M.Sc. Computer Science | EGS Pillai Arts and Science College (Bharathidasan University), Trichy | 2005
B.Sc. Computer Science | EGS Pillai Arts and Science College (Bharathidasan University), Trichy | 2003

Training Banking and Financial Services Training from Cognizant

Awards Received **Extra Mile Award** from Securew2 India Pvt. Ltd.
 Achieved 3 **Applause Awards** from Symantec
 Recognized as **Star Performer** in CashEdge
 Participated in **Hackathon** and delivered our ideas.

Date of Birth 28th December 1983
