- Expertise in various stages of STLC including **Scoping, Requirements gathering, Test Plan, Test design & execution and Reporting**
- Gather Non Functional requirements, converting business NFRs to be test objectives
- Load planning to analyze Transaction Profile & User profile and executed Performance Testing for respective workload model
- Executing the scenarios, analyzing the Graphs and coordinating with the DBA's and Network Admin to ensure optimum performance
- Experience in working on Performance testing for Microsoft Azure, Micro Services & Cloud Migration projects
- **Capacity Planning** for Enterprise release applications to calculate the future growth in the transaction volume and concurrent users
- Conducted discussion with technology team to decide on the various **optimization & fine tuning** based on system performance testing
- Conducted benchmark, load, stress and endurance tests simulating multiple virtual users using load runner.
- Managed Test Plan, Scenarios, Test Cases, Execution and Defect Management in **HP ALM & JIRA**
- **Weekly/Monthly status reporting** to Client Programme Managers, Technology Leads and Key Business stakeholders
- Proactive, Flexible, Developing Leadership qualities with work ethics and Continuous learning as part of Up-skilling/Reskilling on Performance testing & engineering

SKILLS

- Software Quality Assurance
- Performance Testing
- SQL
- ETL Testing
- Agile & Scrum Methodologies
- Retail Domain Business Acumen

APPLICATION & TOOLS

- Load Runner
- NeoLoad
- JMeter
- JDA Dispatcher
- Grafana, New Relic, Dynatrace and SAP ALM
- SAP, SAP GRC, SAP Fiori, SAP BODS
- GitHub, Azure, Postman
- Data studio, Data Satge and SQL Server
- HP ALM and JIRA

PROJECT DETAILS

Carrefour Group, Belgium - Performance Test Lead

Nov 2022 – Till Date

Roles & Responsibilities

- Non-Functional requirement gathering & Test Plan/Artefacts preparation.
- Creation and enhancement of test scripts for the specified workload model
- Plan, Executing, monitoring, publishing test results with respect to the NFR
- Creation, Review & Execution of test scripts to verify the workflow
- Defect management, reporting performance issues /escalation management
- Weekly/Daily status reporting to Client PMs & Key business stakeholders
- Led a team of 4-8 on various performance testing for SAP Fiori & SAP BODS

Tools & Applications

- NeoLoad
- SAP Fiori, SAP BODS & Middleware
- SAP ALM

Colruyt Group, Belgium - Performance Test Lead

Apr 2020 – Oct 2022

Roles & Responsibilities

- Non-Functional requirement gathering & Test Plan/Artefacts preparation.
- Creation and enhancement of test scripts for the specified workload model
- Plan, Executing, monitoring, publishing test results with respect to the NFR
- Creation & Execution of test scripts
- Test Data creation using SQL and Macros for batch testing.
- Unit PT Plan, Preparation and Execution
- Defect management, reporting performance issues /escalation management

Tools & Applications

- Jmeter and Neoload
- API Testing, Batch Testing & Web Testing
- SQL Server , Postman
- Grafana and Dynatrace

Marks & Spencer Plc, United Kingdom - Senior Performance Test Analyst

Feb 2012 – Mar 2020

Roles & Responsibilities

- Scope Determination & Gathering Non-functional requirements.
- Creation and enhancement of test scripts for the specified workload model.
- Executing and monitoring the test with respect to the NFR.
- Reporting various test and defect metrics.
- Publishing test results and suggestions for optimization.
- Coordination with Business & IT stakeholders for timely deliverables

Tools & Applications

- HP Load Runner & Performance center
- JDA Dispatcher, Putty, SQL server
- IBM Data Stage & MQ Explorer
- Data Stage, Data Studio, ControlM
- GitHub, Azure Portal, New Relic
- SAP, SAP GRC
- HP ALM & JIRA
