Mobile Sports Book Technology

June, 2011 — May, 2012

QA Automation Engineer

Orion Business Innovation

July, 2010 — June, 2011

QA Analyst

TOOLS&SKILLS

- GitLab, Docker, APi Automation(XML, jSon)
- Jira, Mantis and Issue Tracker
- MSSQL, MYSQL, MONGO DBJenkins, GItHUb, Source Tree.
- BurpSuite, WebScarab, Fiddler, PostMan,WireShark
- Selenium, Appium, TestComplete, VSTS, jMeter, LoadRunner, TSung(Ejabberd & Tigase xmpp server Analysis tools.)
- Java & nodejs development, Nemo.
- Code coverage with Java, javascript using tools mocha, Istanbul, cobertura, jacoco etc.
- **White Box Testing Experience: 4Years**
- **Black Box Testing Experience: 12 Years**

SPOKEN LANGUAGES

- English, Telugu, Tamil, Malayalam, Hindi.

Project Summary

✓ **PayPal Compliance and GRIP**

Client : PayPal

Tools Used : Nemo, Playwright, Webdriver, GitHub, Git bash, eclipse, IntelliJ, Jenkins, ECD Pipeline, Jmeter.

Languages : Java, NodeJS, JavaScript.

Role Played: Scrum Master, Backend developer java and Nodejs, Automation Engineer and clarifying doubts to the team.

Components Covered :

- ComplianceAdminNodeWeb
- Compasesearchnodeweb
- GripNodeWeb
- MetricsDashboard
- Compaseserv

✓ **PayPal Helix to Raptor Migration Project**

Client : PayPal

Tools Used : Webdriver, GitHub, Git bash, eclipse, IntelliJ, Jenkins, ECD Pipeline, Jmeter.

Languages : Java.

Role Played: Automation Engineer and clarifying doubts to the team.

Responsibilities: Converting ASF Calls to RestAPI calls, Adding new cases in Functional tests due to lack of jars availability in Repo. ECD Pipeline executions, FT coverage etc.

Project Description:

PayPal provides spring-based web services for all internal functionalities on top of Helix (internal to PayPal) framework which is going to be deprecated soon. To replace Helix framework, PayPal has come up with Spring boot-based framework called Raptor. Raptor has Its own way to define Rest, ASF and SOAP services etc. Helix to Raptor Migration involves in implementing Rest, ASF and SOAP based webservices in Raptor framework for the existing Helix Services and implementing the client migration changes as per the new Raptor service implementation.

Components Covered :

- AMQRiskBankReturns (Daemon)
- RiskResolutionDecisionServ
- RiskPublicReadServ

✓ **ThirdChannel**

Client : ThirdChannel

Tools Used : Appium, Webdriver, GitHub, Source Tree, xCode, xCuiTest Framework, eclipse, gradle, Jenkins.

Languages : Java, Groovy

Role Played: Developer writing scripts.

Responsibilities: **Mobile iOS** Automation, Android is in progress. Crashlog handling, simulator & Device supported.

Project Description:

The ThirdChannel app enables the field force for globally recognized brands to easily capture critical intelligence and observations in real-time while identifying action plans to drive the highest sales.

Features:

- View all store locations on one map
- Complete visit reports at serviced locations – regardless of internet connectivity
- Ability to instantly share observations, giving teams insight into what is happening on the ground

Requirement:

A ThirdChannel login is required to use this app.

Become a ThirdChannel agent today and get paid to represent the brands you can't live without! View available positions and apply directly on <https://www.thirdchannel.com/overview>.

About ThirdChannel

ThirdChannel is a retail intelligence network that enables the world's largest manufacturing brands to find actionable opportunities to improve their sales performance at retail locations. Go to www.ThirdChannel.com to learn more.

✓ **Public Eye**

Client : ZCO Corporation Pvt Ltd

Tools Used : Selenium WebDriver, Sikuli, TestNG, JUnit, Eclipse, VSTS 2008 Test Suite, Monkey Talk, Appium.

Security Tools : Web Scarab, BurpSuite, Fiddler, Paros Proxy, Fiddler, TamperData, Sikuli.

Languages : Java, c#

Role Played: Automation, Performance Analyst, Security Analysis.

Responsibilities: Web and IOS Automation & Security Analysis.

Project Description:

PublicEye offers situational intelligence by visually presenting information sources such as CAD/RMS data, public and private databases, surveillance systems, and social media feeds. On a real-time map, PublicEye users can be alerted about incoming 911 calls and immediate hazards, which can range from gang hangouts and outstanding warrants to directed patrol points and customizable buildings of interest.

✓ **Bubblelingo – Messenger Mobile App for iOS and Android**

URL: <https://play.google.com/store/apps/details?id=com.bubblelingo.bblapp&hl=en>

Project Description:

Bubblelingo is a FREE MESSAGING APP available for android phones. It allows to send photos and videos to friend's through animated speech bubbles. Bubblelingo allows you to send Voice Notes videos and photos using Instant Messaging. Customize your photos and wallpapers by adding colorful resizable fonts, clipart and animated bubbles. Share the exciting world of Bubblelingo by sending group messages to friends and family.

Tools Used: VSTS, Jenkins, Fiddler, BurpSuite

Responsibilities:

- Participated in Sprint Kick off .
- API Performance Test/Analysis.
- Security Analysis on API by Tampering and ManInTheMiddleAttack using Burp Suite etc.
- Interacted with Client for gathering Requirements.
- Performing Memory Leak Testing using Instruments.
- Sending weekly status report about the team.

✓ **Verizon Universal Identity Client : Verizon**

Tools Used : Selenium RC[Remote Control], TestNG, JUnit, Eclipse, VSTS 2008 Test Suite, Monkey Talk

Languages : Java, c#

Role Played: Automation, Performance Analyst.

Responsibilities: Web and IOS Device Automation.

Project Description:

The Universal Identity Services application is a security solution that facilitates strong authentication to web sites, applications, and/or networks. The available features of this application include a one time passcode generator and a mobile message center for reviewing, approving, and/or rejecting transactions (Health Care).

In order to use this application, you must first register for a Universal ID. During the registration process you will receive an activation code that is required to enable use of this application.

✓ ZCO

Client : ZCO Corporation.

Tools Used : Selenium, TestNG, jUnit, Eclipse, VSTS 2008 Test Suite., Sikuli

Languages : Java, c#

Role Played: Automation, Performance Analyst.

Responsibilities: Web site automation on Macintosh, windows, linux platforms. Video analysis, image regression, link verification etc..

✓ GIGI

Client : GiGi LLC Corporation.

Tools Used : VSTS 2008 Test Suite

Languages : c#

Role Played: Performance Analyst, Security Analyst.

Responsibilities: Web and IOS Device Automation.

Project Description:

GiGi - Secure, Encrypted, & Flexible Messaging For All!

Stay securely connected with GiGi from anywhere and instantly get the power to keep in touch via text, send pictures, video, and emails, all without worrying about your conversations being compromised, stolen, or simply viewed without your permission. Stay in touch from anywhere from any mobile device or directly from the web at www.gogigi.com!

GiGi Features:

- Encrypted mobile & online secure messaging system.
- Group & single person-to-person text chatting/ messaging options.
- The power to directly share photos, videos, voice memos, & emails directly with single or multiple contacts.
- Intuitive User Interface complete with visual contact/messaging dashboard.
- Multi-tiered security features including:
 1. Encrypted message delivery & storage.
 2. Customizable time-sensitive, self-deleting message options.
 3. PIN empowered password protection.
 4. Security question options.
- Fully customizable profile creation complete with profile photos & optional contact information.

✓ Acceletry

Client : ZCO Corporation Pvt Ltd

Tools Used : Selenium, BurpSuit, TamperData, Fiddler, Paros Proxy, Web Scarab.

Languages : Java

Role Played: Security Analyst.

Responsibilities: Web Security Analysis.

✓ IMQR

Client : ZCO Corporation Pvt Ltd

Tools Used : Selenium Web Driver

Languages : Java

Role Played: Automation.

Responsibilities: Web Site Automation.

✓ Vadovia

Client : iGoToo LLC Corporation Pvt Ltd

Tools Used : Selenium Web Driver

Languages : Java

Role Played: Performance Analyst.

Responsibilities: Performance Analysis.

✓ StickerApp

Client : ZCO Coorporation Pvt Ltd

Tools Used : Selenium Web Driver

Languages : Java

Role Played: Performance Analyst.

Responsibilities: Performance Analysis.

Project Description:

The Sticker App is the first ever free-form creative collaboration app! Create a visual collage and share however you see fit. Sticker is designed to let you create, express and share.

✓ **BikeApp**

Client : GandC Apps Inc

Tools Used : Selenium Web Driver

Languages : Java

Role Played: Performance Analyst.

Responsibilities: Performance Analysis.

✓ **BadApples**

Client : High Five Apps, LLC

Tools Used : Selenium Web Driver

Languages : java

Role Played: Automation.

Responsibilities: Web Site Automation.
