- Significantly facilitated Agile Adoption Retrospective for the organization with the leadership and guiding the teams with outcome resulting in enhanced performance

Projects Completed

At Standard Chartered Global Business Services Pvt. Ltd. (formerly known as Scope International Pvt. Ltd.), Chennai

Project: S2B Trade

Synopsis: Ting-Trade initiation Next generation is an online customer portal which is used for initiating trade transactions for various products like **ILC, Guarantee, SBLC, Shipping guarantee and export direct collection**. TING stands for Trade Initiation next generation which enables the customer to initiate trade transactions which in turn will be sent to DTP-**the back office IMEX application** where the transaction will be processed and the copy will be sent back to TING. Exports products initiated from DTP application also reach ting, for which the customer can send his response to bank thereby completing the full flow.

Project: S2B Cash

Synopsis: S2B Cash is an online customer portal used by the customers to initiate various payments & collections including local and cross-border payments. System allows the customer initiate payments & collections via different modes like transaction initiation screen, bulk import, host-host channel, template bulk import etc. End-to-end interfaces include STS, DOTOPAL, EBBS, RCMS, HOGAN depending upon the payment centers & payment types.

Project : FlowBanker

Synopsis : Automated Solution to manage Client's hedge execution, Settlement, Payments and underlying document making the workflow easy for the client.

Other Major Projects

Data Migration Projects:

Migration related projects to accommodate country based requirements and also product based changes

Support Projects

Since Straight2Bank is an online application used by the corporate clients, all the changes in the back office will require an end to end support to identify any impact in the client facing application.

At Mphasis, an HP Company, Chennai

AIG Direct.com/21st.com

AIG Direct was created by American International Group, Inc. (AIG) to enable the AIG companies to offer a full range of quality insurance products, services, and resources, through a customer friendly online process. AIG Direct is also an aggregator from where the customer gets Auto Insurance quote by entering his/her information. It will allow the system to provide the Consumer with the options of requesting either a Quick Quote Estimate based on the Consumer's current carrier's Bodily Injury Limits or a Full Quote. It will also afford the Consumer the ability to Save (partially completed and completed quotes) and Retrieve their Estimate or Quote. The Consumer will have the ability to amend their Estimate/Quote, with Quick Quote the Consumer can select a different package; within Full Quote the Consumer has the flexibility to amend individual coverage's/limits. The system will present multiple quotes (packages). Coverage packages are determined based on the Consumer's current or prior carrier's Bodily Injury limits.

DRC Application

21C uses DRC application as quote / policy generation tool. For any Internet aggregators DRC would be the backend for providing quotes and rates to the customer. Maintenance Releases (MR08, 09...) would be on consecutive manner. Each release has Retro, IST and QA region testing. Gained knowledge in the following fields:

- Voluntary Business
- Assigned Risk
- Rating
- Billing
