sathish.ajay0911@gmail.com

About Me

I have **3.6 years** of experience in the **Software Testing** domain and overall 7.5 years experience , experience in all phases of Manual and Automation Testing. Experienced in **Java Selenium, Cucumber, Testng, API(postman, Rest Assured), GitHub, SQL, Jira, Jenkins and creating the Bug report**. Experienced in identifying gaps in current process and tools and suggest new ways to improve them Enjoy working in a fast-paced dynamic environment.

Profile Summary

- Having good experience in creating test cases using **Selenium WebDriver** with **Java**. Strong Experience in Automating Web Applications using **Selenium WebDriver, Grid with TestNG, Maven & BDD(cucumber)**.
 - Extensive experience in **Manual and Automation Testing**. Good experience on **Object Oriented Programming** concepts and **Java Programming**.
 - Implemented Page Objects, Module based frameworks using **Selenium WebDriver, Java, Cucumber**.
 - Worked with **Jenkins** tool for achieving the Continuous Integration.
 - Experience in designed Functional decomposition TestNG framework.
 - Expertise in locating elements using **XPATH** and **CSS**.
 - Excellent working experience of Software Development Life Cycle (**SDLC**), Software Testing Life Cycle (**STLC**) and testing methodologies like Waterfall & Agile/Scrum.
 - Conducted **Regression, Data driven, Cross browsing** testing and Parallel test execution.
 - Having good knowledge in **UNIX** and **SQL**.
 - Experience in creating and executing scripts in parallel and sequential using **Web driver-TestNG** with Java.
 - Involved in testing **REST services** using **Rest Assured** and tested both **XML** and **JSON** formats.
 - Creating and executing test plans and test cases to ensure API functionality and performance
 - Created Test cases using **HTML** element locators and Selenium WebDriver API commands. Conducting API testing using tools such as Postman and Rest Assured.
 - Experience on Writing SQL queries to extract data from various source tables to perform database testing. Parse the response **JSON** and validated the DATA using **JAVA**.
 - Using **POSTMAN**, handle and test cookies in requests to **APIs**. Utilizing the Rest Assured API to test and handle various **API error** types.
 - Created **XML** based test suit and integrated with **Jenkins** Server to execute automation scripts on a regular basis by scheduling Jenkins jobs in different test environments with different test configurations.
-

Senseapp Technology Pvt Ltd

Client: Capgemini Technology

Project 1 - Manscaped

Domain: Ecommerce

Duration : June 2023 to Present

Role: Software Test Engineer
