"I have 3 years of experience in Performance Testing with strong knowledge on LoadRunner & JMeter tool. As Performance Tester, my role involved gathering non-functional requirements, creating test plan, test scripts, and executing test scenarios, analyzing test results and identifying bottlenecks. I have good communication and coordination skill, and as quick learner I can learn new tools quickly."

Skills

- Tools Known – LoadRunner, JMeter
- Monitoring Tools – PerfMon, Dynatrace
- Scenario design & Test Execution – Performance Center
- Programming Languages – Java
- Cloud – Azure
- Others - SQL, Fiddler, Blazemeter, Requirements Gathering, Test scripting, Test execution, Defect reporting

Work History

Project #1

Client and Title	GSK – DARA
Protocol	LoadRunner- Truclient, Web Http/Html
Team Size	1
Domain	Life Sciences
Project Summary The intended use of Data Analytics and Reporting Application (DARA) is to have a centralized and single business analytics cockpit gathering pre-defined trusted and advanced quality reports built based on AZURE data model. Furthermore, this platform includes some specific features to facilitate the user's activities related to Data Analytics (ex: self-service tool) enabling to each user to build their own queries.	
ROLES AND RESPONSIBILITIES Performance Engineer • Worked with stakeholders to gather the non-functional requirements.	

- Creation and Maintenance of Test Scripts using Micro focus Load runner for all identified business critical scenarios. Due to tool transition, scripted the new business flows in JMeter tool.
- Creating and Executing Test Scenarios.
- Providing the observations and Analysis report after Test Execution.
- Collaborating with development team to identify and resolve performance issues.
- Providing result walkthrough to the stakeholder
- Handled end-to-end performance testing activities of DARA.

Tools:

LoadRunner, Performance Center, JMeter

Project #2

Client and Title	GSK – PVAI Intake
Protocol	Web HTTP/HTML
Team Size	2
Domain	Life Sciences
<u>Project Summary</u> Pharmacovigilance Artificial Intelligence (PVAI) from Genpact PVAI is a Software as a Service (SaaS) solutions that supports Adverse Event case intake from various structured and unstructured data sources and is directly interfaced with OASIS Argus Safety database.	
<u>ROLES AND RESPONSIBILITIES</u> Performance Tester • Involved in non-functional requirement gathering. • Responsible for performance test Scripting, Load Scenario Set up and Executions • Generated test data required for formal load test execution. • Analyzing the results and discuss with the application team for issues incurred during execution.	
Tools: LoadRunner, Performance Center	

Education

2017 - 2021

Bachelors of Engineering

Dr. Mahalingam College of Engineering & Technology, Pollachi.

2015 - 2017

High Secondary

Veveaham Girls Higher Sec School, Dharapuram.

Certification

- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Azure AI Fundamentals
