Chennai, India

PROFILE SUMMARY

With over 7 years of IT experience, including 5 years in ETL, Database, and Functional Testing, and 2 years in Production Support, I bring expertise across the Software Testing Life Cycle. Skilled in SQL scripting, data verification, and ETL test case creation, I have hands-on experience with Surrogate Keys, SCD, and Star/Snowflake schemas. Proficient in Functional Testing, Regression Testing, and JIRA, I ensure seamless collaboration and efficient issue resolution.

EDUCATION

ANNA UNIVERSITY

Bachelor of Engineering

2013 - 2017

WORK EXPERIENCE

Pointel Technology & Solutions

2017 - PRESENT

Ecobank

- Conducted rigorous testing for **Data Warehouse** enhancements, verifying the accuracy and efficiency of **data integration** processes while identifying and reporting system inefficiencies.
- Executed and Designed test cases to validate **IICS** mappings, ensuring data extracted from **Oracle databases** was accurately transformed and loaded into target systems.
- Tested the implementation of **SCD Type 1** and **Type 2 Slowly Changing Dimension** strategies, ensuring historical and transactional data integrity within **ETL workflows**.
- Developed complex **SQL** queries for querying data against different database for data verification process.
- Monitored **ETL** jobs during testing by **analysing logs and metrics**, identifying performance bottlenecks, and validating fixes to ensure smooth data processing.
- Verified the functionality of **IICS transformations** such as **Expression, Router, Connected Lookup, Union, Sorter, and Rank**, ensuring they met data flow and transformation requirements.
- Collaborated with the development team during Scrum meetings to report **ETL testing** progress and raise any identified defects, ensuring timely resolution.
- Conducted regression testing and root cause analysis for **ETL workflows**, ensuring all data processing adhered to quality standards and resolved issues effectively.

Exim Bank

- Analysed requirements, specifications, and technical design documents to create effective test strategies and ensure alignment with business needs.
- Created and optimized complex **SQL** queries to validate **data transformations** and ensure **performance optimization** during **ETL workflows**.
- Extensively utilized **SQL queries** to perform data validation, backend testing, and verify the accuracy of data in **staging** and target systems.
- Monitored and verified **ETL** job executions, ensuring proper **data extraction, transformation** and loading processes.
- Assessed and validated the implementation of **views** and materialized views (**M-views**) to ensure secure and efficient data sharing while meeting data security and compliance standards.
- Documented **test plans, defect reports, and test results**, collaborating with the development team to resolve issues and improve data quality.
- Detected and logged defects during testing phases, categorizing them by severity and priority and collaborated with developers to resolve issues promptly.
- Ensured that all **ETL** testing activities adhered to established best practices, standards and project timelines

SKILLS

- Informatica IICS
- ETL Testing
- Performance Tuning
- Oracle SQL
- UNIX & Windows
- SQL Server
- ETL Concepts
- Agile Methodology
- JIRA
