

SENTHIL PANDIAN SUBBIAH (CSM®) (CMMI) (ISTQB)

Result-oriented professional with a proven record of achievement in conceiving & implementing effective operations / strategies through inspiring leadership, technical experience, versatility, agility and innovation excellence

✉ senpan@gmail.com 📞 +91-8778822355  www.linkedin.com/in/SenthilPandianS   

Profile Summary

- Result-driven professional with over **18 years** of enriched experience in **Quality Assurance , Test management, Digital Transformation, Delivery Management, Project Management** including testing on various complex software development, implementation, and integration projects across **Banking, Finance, Insurance, Healthcare, Airlines, Security, Printing and Manufacturing domains**
- International Exposure:** Gained exposure of **5 years of working with clients in USA**; involved in extensive onsite-offshore delivery expertise for elevating client & stakeholder expectations with effective resolution of escalations & change requests within TAT/ SLAs
- Serving as Scrum Master and coordinated all Scrum Ceremonies** including, Backlog Refinement, Sprint Planning, Daily Scrum, Sprint Reviews, Sprint Retrospectives & Release Planning. Leading large scale Agile transformations globally, ensured common processes and tools are used by all application teams and driving quality throughout the organization
- Functional experience of **open source tools selenium (selenium IDE, selenium RC, selenium Web driver), Junit, TestNG, AWS and UI Path (RPA)**. Analyzed and Implemented AWS for projects.
- Comprehensive work experience in all phases of SDLC, STLC including **requirement analysis, Test strategy, Test planning and approach, execution & debugging of automation test scripts, framework implementation and various phases of testing and test suite development using Selenium.**
- Hands on experience in building TCoE, managing and implementing end-to-end activities of Pre-Sales, RFP, customer interaction, Client visit, Test Solutioning etc.
- Transformation/ Automation Specialist:** Contributed to business & technology vision by selecting best automation candidates for maximum functional coverage through automation by identifying and making recommendations on technical design of solutions or enhancements based on assessment of business requirements & conducting detailed implementation planning as per defined RPA
- Leveraged skills in Functional Testing, Performance testing, Integration Testing, Smoke Testing, Regression and Black Box Testing;** competent in preparing & reviewing Test Plan, Test Estimation, Traceability Matrix, Risk Mitigation Plan, Test Cases, Test Execution, Test Results, Defect Reporting and other activities of testing like Test Data and Daily Status Reports using Google Data Studio.
- People Manager:** Resolved bottlenecks and guided the team on identification of right personnel to remove impediment; provided training program to present Quality, business, Tool & process with organization and involved in recruitment of resource for QA team
- Diligently executed projects using various methodologies such as SDLC, STLC, Agile, Scrum, RPA,AWS** from planning, scoping, tracking, resource allocation, change management, delivery management and implementing project plans within preset budgets and deadlines **using diverse state-of-the-art technologies & cost- cutting tools for creating end-to-end automation solutions** for clients

Areas of Excellence

QA Automation

SDLC & STLC/ QA Plan & Strategy

Budgeting & Cost Optimization

Scrum & Agile Management

Stakeholder/ Client Engagement

Team Building & Leadership

Digital Transformation

Project Delivery Management

Requirement Gathering & Analysis

Career Timeline

Mar'05- May'06

Indium software

Jun'06- Nov'09

HCL

Dec'09- Jan'11

Syntel

Feb'11- Apr'15

Cognizant Technology Solutions

Apr'15- Dec'23

RR Donnelley

IT Skills

Automation Tool:

RPA:

Cloud Computing Services

QTP, Selenium, IntelliJ, TestNG

Ui Path

AWS

Test Management Tool: Quality center (ALM), Azure, Jira, Zephyr, Adaptavist
CI/CD and Build Automation Tool: Jenkins, Maven
API Testing Tool: SoapUI, Postman
Programming Languages: Python, Java
Bug Tracking Tool: Bugzilla , Mantis, Attask, Test Link, Lotus Notes, Pm Smart
Database: PLSQL , My SQL
Performance Testing Tool: J Meter
Security Testing Tool: Checkmarx
Configuration Management Tool: Perforce, Clear case, Clear quest, Visual Source Safe , Git Hub, Bit bucket, SVN

Education

- ▶ Bachelor of Engineering from Bharathidasan University in 2002

Exposure Areas:

- ▶ Good understanding of GUI, ecommerce and web based applications with experience on agile development methodology
- ▶ Experience in Dashboard Maintenance, Metrics preparation and RAG (Red, Amber, Green) status maintenance for projects.
- ▶ Hands-on experience in basic SQL queries

Certifications

- ▶ Certified Scrum master (CSM) from Scrum Alliance (Certificate ID: 000887805)
- ▶ Certified CMMI Associate (Certification Number: 162215335)
- ▶ RPA Ui Path certified (Certificate ID :77357205608080616)
- ▶ Received 'Delivery Excellence Award' at RRD in 2021
- ▶ Received 'Gold line Award' for best performance in HCL in 2007
- ▶ International Software Testing Qualification Board (ISTQB) Certified
- ▶ Brain Bench Certification for Software Testing Assessment.

Work Experience

Apr'15 – Dec'23 with R.R. Donnelley

Key Result Areas:

- ▶ Monitoring testing activities to ensure the quality and functionality of assigned systems; ensuring timely and accurate test communication with Development Leads, Project Manager and Senior Management throughout the project lifecycle
- ▶ Project planning, Scope defining, estimation, execution and customer interaction, offshore management – Resource, Revenue, Work tracking, Escalations, Issues tracking, and Milestone based execution
- ▶ Pre-scales, Proactive Pitching – Bidding, RFP's, Managing Client Presentations, Project Estimations, Performance Testing Solutions / Strategy Designing, Collaterals & Deck Creation
- ▶ Strategic Leadership - Develop and communicate the testing strategy aligned with the overall business and IT objectives.
- ▶ Governance and Standardization - Establish and enforce testing policies, processes, and standards globally.
- ▶ Budget Management - Develop and manage the testing CoE budget, ensuring optimal utilization of resources
- ▶ Foster a culture of learning and development within the Testing CoE.
- ▶ Ensure a coherent architecture of the solution in production and in project deliveries using AWS
- ▶ Preparing, designing & leading the test strategy and test plan for all projects; reviewing activities such as requirements review, design review, test strategy review and test case review
- ▶ Interacting with team members to ensure smooth progress of project work; ensuring adherence to quality norms throughout the implementation process
- ▶ Supervising the execution of testing plans for projects to ensure compliance with quality standards and end-user requirements
- ▶ Participating in product specification reviews, design, triage, scheduling, and other stages of the product development process
- ▶ Implementing standard test processes & deliverables including defect management & quality metrics reporting within the gated process to streamline testing & support function
- ▶ Developing and executing comprehensive test plans; assuring the overall quality of the project, including functionality, security, performance and accessibility testing.
- ▶ Understanding business requirement, building test strategies and providing estimations for test projects

Role: QA Manager

Test Tool: Jira, Selenium, Test NG, AWS, RPA UI Path, Azure, Attask, Zephyr, GIT Hub, Jenkins, Checkmarx

Client: Pimco, Global Atlantic, JNL, AON, Security Benefit

Team Size: 50

Description: The Veritas Super fulfillment website provides their client with a direct link to the literature fulfillment and Print on Demand system. This site can be customized based on the client needs where clients are able to place orders, manage orders, manage inventory, control distribution, monitor cost centers, manage their users and their permissions, and manage Special Projects and more. Clients will be provided with their unique URL.

Responsibilities:

- Directing & leading onshore & offshore Testing Team responsible for delivering quality product and preparing testing effort estimation, test plan, test scenario document
- Evaluating and implementing cost cutting Testing Tools (Jira, Selenium) for the Quality assurance team using AWS and RPA
- Communicating with the Project Managers, business partners and clients to understand the requirements and escalating project related issues with Managers and resolving it to deliver better product to client; updating the project risks in SharePoint
- Analyzing user requirements and functional specifications and providing root cause analysis of defects to developers
- Designing and developing automation framework in selenium; automating large number of regression test cases in selenium
- Conducting Scrum meetings and guiding team and providing demo across other functional teams
- Documenting the Functional and Regression test cases for business requirements for complete application coverage
- Calculating the test cases periodically and add/update test cases based on the changes in application for successful Implementation
- Coordinating with Development Team to replicate the issues, debugging the problems and maintaining all the testing documents in SharePoint
- Contributing in Management activities like Timesheet management, conducting team meetings to resolve the release issues, monitoring the team progress, gap analysis
- Performing functional, Performance, security and compatibility testing and updating traceability matrix
- Verifying customer processes, identifying automation possibilities, defining RPA value proposition to improve automotive potential and recommending RPA strategy for most of work flows
- Designing process definition document (PDD) and working closely with RPA Architect to design the workflows (including exceptions, external process integrations using API) in Web, windows and very few image based solutions
- Debugging and executing the bots and triggering them in the orchestrator for nightly and weekly schedules
- Raising bug in defect management tool and bug verification after it is fixed
- Delivering functional test scenarios, test cases, defect reports, test summary report, traceability matrix, and status report

Previous Work Experience

Feb'11- Apr'15 with Cognizant Technology Solutions

Role: Project coordinator

Test Tool: Mantis, JMeter , Quality center, SoapUI , PLSQL

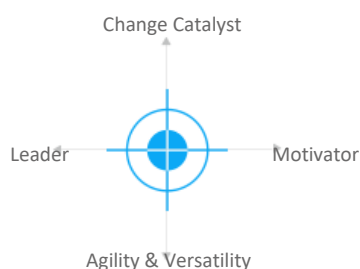

Client: The Northern Trust Company

Team Size: 40

Description: Goals Powered Solution application uses an interactive and dynamic approach to portfolio planning and asset liability matching. The application integrates the characteristics of each client's unique and changing financial goals with the client's time horizon and risk preference. The process is done on an interactive basis with the client. The GPS application allows the client to view different simulations based on changes to the time horizon and risk preference related to their specific goals and objectives. A client's risk preference can be customized and present itself (a) in the amount of risk control allocated to a specific goal or objective and (b) in the selected exposure to small cap and value oriented equities. The GPS application is part of a dynamic planning collaboration between the client and advisor through time.

Soft Skills

Possessed relentless attention to detail while multi-tasking in a fast-moving environment with positive attitude

Extensive cross- functional & communication skills with capability to work under pressure and meet deadlines

Demonstrated leadership & project management skills

People engagement specialist, excels at leading and realigning work groups and possess excellent interpersonal, team leadership, relationship building, and problem solving skills
