

SUMMARY

With over 4 years of experience as a Testing, Support Engineer and Senior Testing Analyst in the IT industry, I possess an entrepreneurial mindset that allows me to comprehensively understand the technology of the products I work with. I am highly skilled in guiding both myself and my team towards lean agile/waterfall methodology, resulting in exceptional outcomes. As a proactive and result-oriented individual, I am seeking a challenging opportunity to utilize my expertise in manual testing processes and automated testing tools as a Software Tester with a reputable organization.

EDUCATION

VLB Janakiammal College Of Arts & Science

Bachelor of Computer Application

Refinement Solutions

Certified Testing Engineer

SKILLS

- End-to-end Manual testing
- Documentation skills which includes test scripts, test scenarios, flow charts, test cases and use cases.
- Ability to conduct seamless UAT by co-ordinating with clients.
- Excellent verbal & written communication knowledge in English.
- Experience in managing budgets and handling financial documents.
- Client coordination.
- Email etiquettes skills.

ACHIEVEMENTS

- Successfully handled more than 100 projects.
- Have played vital role in developing a product from the scratch. (ATS)
- Have been a pilot for 20 members team and bridged the gap between the client expectations and the end result.

PROFESSIONAL EXPERIENCE

Software Testing Engineer

CrescoWorks - Coimbatore | 2023 - Present

- CrescoWorks ATS (Applicant Tracking System) is a well developed product which is being used by many users.
- Since every client would have different recruitment and ATS logics, the product have been implemented according to their requirements.
- So, the implementation process involves in development and testing in which I played a major role in STLC.
- My end-to-end rigorous testing covered the whole requirements of the client and made sure the expected end results are achieved.
- I have also supported on all UATs of the clients which will be powered by the documentations as well.
- When it comes to testing, my role includes not only the bug tracking, I used to take full responsibility in conducting meetings with developers to explain. I coordinate with clients to understand their bugs and help them to recreate to record and solve them.
- Overall as a software testing engineer, I would take the whole responsibility for a product development, successful implementation and a holistic completion of software testing life cycle.

Senior Testing Executive

HCL Comnet - Chennai | 2010 - 2011

- Exploring test cases in data base management system and server.
- Prepared and distributed test reports, presentations, and other materials which supports the project management.
- Working with international clients to support their software testing life cycle.
- Played vital role in multiple product development and my testing skills helped me to support the successful product execution upon completion of development.

SOFT SKILLS

- I would say that I am well trained on people handling, since I always get a chance to coordinate with multiple developers, this helped me to learn people handling.
- I always thoroughly understand the customers pain points and project requirements which will be reflected on my testing life cycle.
- Typically every software product will come across certain bugs which will make the clients to escalate. On this point of time, we require someone to take charge and find the root cause of the bug. I will be playing this role in full fledge and client's bugs would be fixed on time.
- Sometimes we come across a scenario where a tester could find a bug which will not be reflected by a developer which creates confusion. I am well experienced in recreate a bug and log handlings to solve this situation.
- I would like to declare that I have strong technical and non technical skills which I am still enhancing for the betterment.

Testing & Support Engineer

CSS Corp Pvt Ltd - Chennai | 2008 - 2010

- Internal ATS (Applicant Tracking System) was developed from the scratch and I was the testing engineer till the execution.
- Conducted research and prepared reports on various bugs, test scenarios, use cases and the UAT results.
- Provided administrative support and the project management support.

Career Break - Marriage & Maternity

2012 - 2022

- I had a career break from 2012 and 2022 due to marriage and taking responsibility of providing pleasant atmosphere and moral support for my 2 daughters.
- During my Maternity leaves, I focused on maintaining and enhancing my skill set. That involved enrolling in an online course and participating in a online workshops(SQL, Ethical Hacking & Cyber Security, Software Testing, Networking) to ensure that I remain up-to-date with Industry happenings. Professional Certification.

I would wholeheartedly thank you for taking time and reviewing my resume through which I may get an opportunity to explore and serve your requirements. I have mentioned my career break on this resume, however I have bounced back with additional skills and energy to play a vital role with any organisation and currently I am doing this with an organisation which is mentioned above. I assure to add value to the project and the organisation which I consider to be my core responsibility and my work ethics. Once again thank you for your valuable time and consideration.

Yours Sincerely,
Shanthi S
