COURSE: Bachelor of Computer Science Engineer

COLLEGE: Sri Shakthi Institute of Engineering and Technology,

UNIVERSITY: Anna University

(2016 – 2020)

OBJECTIVE:

Seeking a position within a distinguished organization where I can leverage my skills and experience to carve out a rewarding career path while actively contributing to the advancement of the organization's objectives.

EXPERIENCE

Company name : Djax Technologies

Role : QA Engineer

Experience : 3 Years (April 2021 – Present)

Responsibilities and Achievements:

1. Developed and maintained daily test cases, ensuring the seamless functionality of web and mobile software.
2. Assisted the technical team in mapping client business processes post Sprint planning.
3. Conducted manual testing of new features across multiple browsers, mobile views, and performed accessibility testing.
4. Mentored and ramped up four new Quality Assurance team members.
5. Ensured UI functionalities and design alignment with client requirements while conducting comprehensive software functional testing.
6. Executed diverse testing types, including manual, automation, functional, non-functional, smoke, sanity, UI, performance, and database testing.
7. Successfully automated platform testing with a minimum of 2+ years of experience using the TestNG framework and Selenium.
8. Utilized Jmeter and loader.io websites for effective Performance testing.
9. Proficient in API testing with tools like Postman and Swagger UI, and adept at preparing API documentation.
10. Tested Redis, Clickhouse databases, and conducted cloud-based testing using Digital Ocean.
11. Updated bugs in Jira, Bugzilla, and Mantis BT, maintaining clear communication with clients and developers via an in-house bug tracking tool.
12. Contributed to live streaming projects for Jio's application and conducted payment gateway testing.
13. Collaborated with the business team for client requirement gathering, designing, and project documentation, including BRD, FRD, and use case specification.

DECLARATION
