I need pathway to build new ideas with collection of new challenges eventually facing every day to curve my career in different dimension. My future forecasting based on what I do, I trust what I do is best.

PROFILE HIGHLIGHTS

- 4 years of experience in Information Technology, specializing in Automation and Manual Testing of Web based and Desktop applications and good experience in Core Java.
- Extensive experience in developing, maintaining, executing scripts written using Selenium WebDriver with JAVA for automation of web applications.
- Good experience in using Singleton Design Pattern.
- Worked on Cucumber-BDD using POM, well versed with Feature file (Gherkin Keywords like Given, When, Then, And, But), Step Definition and Runner class.
- Good Knowledge in Playwright.
- Experience in Unit Testing frameworks – TestNG, JUnit and knowledge in Selenium GRID used for cross browser and parallel testing on different browsers like IE, Chrome, Firefox, Safari.
- Good working experience in build management tools like Maven, automating and scheduling test execution through Jenkins for Continuous Integration.
- Expertise in Hybrid Framework using Data Driven approach based on Page Object Model design pattern and TestNG.
- Experience in identifying different page elements using object locators and creating Object repository for all the pages.
- Maintained the Selenium Web Driver, Java automation code and resources in source control GitHub.
- Exposure to Git commands.
- Well versed with XPath, CSS, Document Object Model (DOM), JSON, and XML.
- Experience in analyzing Business Requirements and creating Test Plans, Test Cases, Test Scripts, Requirement Traceability Matrix under manual testing.
- Experience in all phases of Software Testing Life Cycle (STLC).
- Exposure to Agile Methodology and well versed with terms like Scrum, Sprint, Product Owner, Product Backlog, Sprint Backlog, Sprint Retrospective, Sprint Refinement, Burn up/down chart, Epic, user stories and velocity.
- Good Exposure to all stages of Software Development Life Cycle (SDLC) and Software Testing LifeCycle(STLC).

PROFESSIONAL SKILL

- Automation Tools : Selenium WebDriver, Playwright
- Programming Languages : Core Java, Python (Basics)
- Framework : Cucumber BDD, TestNG, Data-Driven
- API Testing : Postman (Manual)/Rest Assured (Automation)
- Databases : MySQL
- Version Control : GitHub
- CI/CD : Jenkins CI
- Build Management Tool : Maven
- Test Management Tool : JIRA
- Testing Environment : QA/STG/PROD

EMPLOYMENT HISTORY

- **Company** : XACTO SERVICES PRIVATE LIMITED
- **Period** : Aug 2020 To Till Date
- **Position** : Software Test Engineer

PROJECTS

- **Domain** : Medical
- **Title** : Clinical Trial Management System
- **Designation** : Software Test Engineer
- **Duration** : Jan 2022 –Till

Clinical trial management system designed for CRO's. A complete solution that enables bio-pharm and clinical research organizations to capture critical patient related details for clinical trials. Software suite that manages critical functions of the research site such as patient recruitment, study, Tracking, financial accounting, scheduling, and reporting. This application making the trial process easier and allow organizations to make better business decisions and meet every challenge.

Roles & Responsibilities

- Run automated test scripts using Playwright to identify bugs and ensure the quality of web applications.
- Performed thorough API testing utilizing Rest Assured, guaranteeing smooth integration and optimal functionality.
- Involved Selenium Automation testing using Selenium Web driver and performed Regression testing.
- Executing the test cases on various platforms and performing functional testing, Regression testing and Involved in Unit Testing, Performed browser compatibility Testing.
- Involved in API testing using Ready API tool
- Communication with the development team for Bug resolution and Preparation of Test Result
- Selenium Automation testing using Selenium Web driver and performed Regression testing.
- Regresses existing bugs on previous software builds and Verify bug fixes and provide Feedback.

- Involved on Sanity testing in production.
- Work closely with developers to understand application behavior and assist in troubleshooting issues identified during automated testing.
- Continuously learn and improve skills in using Playwright and automated testing techniques to enhance testing efficiency and effectiveness.

- **Domain** : **Education**
- **Title** : **Apollo IT Education (Seattle)**
- **Designation** : **Software Test Engineer**
- **Duration** : **Aug 2020 – Dec 2021**

Balloon Application is a radical new career and learning tool that helps user manage career success in today's dizzying knowledge economy. User can able to find the courses and learning user need to master the skills for the career of his future. Balloon is a new kind of site that brings it all together in one place: the world of skills, jobs, and learning - all personalized around user and his future. It's a system that maps out your skills today and helps user to see just where you are in the career landscape. Balloon lets user explore career paths and jobs user never thought possible. It tells user the skills he need to get those jobs. And Balloon provides user with access to learning and courses to reach your destination and user can able to see who all are the providers providing the course and user can able to see salary range for particular career based on the location.

Roles & Responsibilities

- Conducted thorough Manual Testing to identify and rectify any functional or user interface discrepancies.
- Test Scenarios and Test Cases Preparation.
- Validated the test data before commencing the Test Execution and identified defects in the early phases of testing life cycle.
- Developed and executed comprehensive Automation Testing scripts to enhance the efficiency of repetitive testing tasks and ensure software stability
- Implemented Cucumber framework in Automation Testing, enhancing the efficiency and reliability of the authentication process.
- Participating in agile development processes, including stand-up meetings, sprint planning and retrospective meetings.

EDUCATION

- B. Com (General) (2020) 69.4% (The New College - Chennai).
