WORK EXPERIENCE

Senior Test Engineer Speridian Technologies

01/2020 - Present

Domain: International Insurance Management [Health, Disability, Travel and Student]

Achievements/Tasks

- Facilitated the adoption of Agile practices, improving team collaboration, product quality, time-to-market, and project efficiency, resulting in higher customer satisfaction and a positive impact on company revenue.
- Prioritized and implemented thorough testing at all levels, significantly boosting product quality. As a result, product costs decreased noticeably, contributing to a significant improvement in Return on Investment (ROI).
- Built strong connections with clients by keeping communication open and understanding their QA needs thoroughly. Led in resolving issues, actively identifying and addressing challenges to ensure project timelines were met.
- Successfully implemented rigorous defect management strategies in software testing, resulting in a substantial reduction in defects, enhanced product quality, and improved overall project efficiency.

Test Engineer/Associate Test Engineer BenefitAlign Technologies

06/2015 - 01/2020

Domain: US Health Care

Achievements/Tasks

- Orchestrated end-to-end testing activities, involving test case design, review, and execution, to ensure thorough coverage across all test levels. This initiative significantly strengthened the project's testing foundation, improving early issue detection, and minimizing defects in subsequent phases.
- Implemented robust defect tracking using Redmine, streamlining the identification, resolution, and monitoring of issues throughout the testing process.
- Developed a comprehensive Test Traceability Matrix, Test Status Report, and Defect Summary Report, providing clear insights into testing progress and project quality.
