- Strong analytical and time management skills
- Ability to work under pressure and attention to detail
- Experience in defect logging, tracking, and prioritization
- Skilled in preparing daily and weekly status reports
- Effective team player with strong collaboration skills

PROJECTS

- **Arppan (Mobile Application and Web)** Arppan is an online application that enables devotees to perform Offerings no matter where we are. The ability to track the progress of each pooja once it has been scheduled is one of this app's best features. Packaged Pooja and Dakshina is another feature of this application. When booking poojas through Packaged Pooja, devotees can book poojas from multiple temples together.
- **Arppan EPOS (Testing Method: Manual Testing)** : A temple's EPOS device is used to manage activities in the temple. This program is used for a rapid print of receipts and arppan bookings within 5 seconds
- **Sweet Convo (Mobile Application)** The Sweet Convo Project is an online dating application. We used it to find our partner based on the preferences we added. It allows us to chat, video call, and audio call with each other
- **ACTA AI [Extension]** : ACTA is a valuable tool that lets participants revisit discussions, review key details, and capture action items and decisions from meetings. With an intuitive interface, it ensures effortless meeting assistance. One Chrome extension supports Google Meet, MS Teams, and Zoom, offering fast processing and multi-meeting insights securely

DECLARATION

I hereby declare that the above statements are true and current to the best of my knowledge and belief, I hope that the above written will suit your requirements.
