SV

SUMMARY

Results-driven **Test Manager with 16 years of extensive experience** in **quality assurance, test automation, and software testing lifecycle management**.

Proven expertise in **strategizing, planning, and executing functional, automation, and performance testing** to ensure the delivery of high quality software products.

Adept at **leading cross-functional teams**, defining **test strategies**, and implementing **best practices** to enhance product reliability and efficiency.

Strong background in **test automation frameworks**, leveraging tools like **Selenium, Appium, TestNG, RestAssured, and JMeter**, with hands-on experience integrating automation into **CI/CD pipelines**.

Skilled in **stakeholder management, risk assessment, and defect tracking**, ensuring seamless collaboration between development, business, and QA teams.

Committed to **continuous process improvement**, driving innovation in **test automation, Agile/DevOps methodologies, and test management strategies** to optimize software quality and delivery timelines.

A proactive leader with a track record of **mentoring teams, managing enterprise-level testing initiatives, and implementing robust quality standards** to achieve business objectives.

EXPERIENCE

QA Manager

Contiem 06/2023 - 07/2024 Chennai, India

Managed complex testing projects with a focus on quality, timelines, and cost efficiency, ensuring seamless software delivery.

- Led and managed end-to-end test management processes, ensuring seamless execution and quality assurance.
- Supervised a team of meticulous SQA analysts, overseeing and optimizing various testing processes.
- Spearheaded the development of a robust regression automation suite using Selenium and Java, enhancing test efficiency.
- Actively engaged in hands-on testing to refine product quality and ensure seamless client delivery.
- Strategically orchestrated test plans for each release, ensuring thorough validation and risk mitigation.
- Played a key role in implementing test processes to enhance overall product quality and reliability.
- Delivered comprehensive quality metrics reports and timely updates to clients and management, ensuring transparency.
- Conducted daily meetings with the team and key stakeholders, fostering collaboration and alignment.
- Successfully initiated and managed the automation suite from the ground up, driving test automation excellence.

EXPERIENCE

QA Project Manager

Publicis Sapient

04/2022 - 07/2022 Chennai, India

Directed test planning and execution, ensuring testing goals and quality requirements were successfully met.

- Engaged in strategic negotiations with upper management, leveraging influential skills to gain buy-in for key QA and automation initiatives.
- Spearheaded the automation of critical modules and regression test suites, driving the establishment of an Automation Center of Excellence (CoE).
- Planned, deployed, and managed testing efforts for various projects while effectively collaborating with the client base to align with quality expectations.
- Designed and implemented core components for complex, large-scale projects, adhering to defined technology standards and project requirements.
- Developed and executed risk mitigation strategies, proactively implementing measures to maintain quality and minimize potential risks.

QA and Release Manager

Aegis Info Business Solutions

05/2020 - 02/2021 Chennai, India

Assisted in test management tasks, including test planning, execution, and communicating status updates to stakeholders.

- Gained a deep understanding of the business domain and implemented quality processes to ensure high compliance in product delivery.
- Led the organization and execution of quality processes within the team, ensuring the delivery of high-quality outcomes.
- Analyzed and reported quality metrics to the team, highlighting risks and the criticality of errors during testing phases.
- Developed risk mitigation strategies and implemented necessary measures to proactively control potential quality risks.
- Initiated automation for critical modules and regression test suites, laying the foundation for establishing an Automation Center of Excellence (CoE).
- Strategically planned, deployed, and managed testing efforts for projects while collaborating with the respective client base to meet quality expectations.
- Analyzed and reported quality metrics to the team, highlighting risks and the criticality of errors during testing phases.
- Developed risk mitigation strategies and implemented necessary measures to proactively control potential quality risks.

Delivery Manager Testing

FYNXT

07/2018 - 12/2019 Chennai, India

Supported test management activities, including test planning, execution, and stakeholder communication of progress and results.

- Serving in a pivotal techno-functional role, deeply understanding the business domain and implementing quality processes to ensure zero-bug compliance in product delivery.
- Leading the organization and execution of quality processes within the team to consistently deliver high-quality outcomes.
- Automated critical product modules to enhance efficiency, reducing manual efforts and building robust regression test suites from scratch.
- Played a key role in establishing the Center of Excellence (CoE) team for the automation project, driving innovation and best practices.
- Strategically planning, deploying, and managing the testing efforts for projects while effectively collaborating with the client base to meet quality expectations.

STRENGTHS

Creative Problem Solving

Increased test coverage by 35% through risk-based test selection and optimized test suite design.

Minimized flaky tests by 50% by stabilizing automation scripts and enhancing locator strategies.

Strong Leadership

Defined and implemented test strategies, achieving **100% requirement traceability** and risk-based test coverage.

Successfully handled critical go-live decisions, ensuring zero P1 defects in production for key releases.

Efficient Resource Allocation

Improved resource utilization by 35% by implementing a skill-based task allocation strategy.

Saved 30% on testing costs by optimizing offshore-onshore team distribution and leveraging automation.

English

EXPERIENCE

Quality Assurance Specialist

Accenture 📅 03/2016 - 07/2018 📍 Chennai, India

Facilitated test management processes, overseeing test planning, execution, and timely status reporting to stakeholders.

- Established quality standards and metrics for the web application project, ensuring alignment with business objectives.
- Collaborated with stakeholders to review, finalize, and secure consensus on quality metrics.
- Educated the QA team on quality metrics, proactively addressing queries to enhance understanding and implementation.
- Defined key milestones, checkpoints, and measures to systematically assess quality at each stage.
- Inspired and motivated the team while making informed, data-driven decisions under tight timelines.
- Engaged in strategic negotiations with upper management, leveraging influential skills to advocate for automation initiatives.
- Served as the primary point of contact for all QA-related escalations, ensuring swift resolution and maintaining testing excellence.

Quality Lead

Cognitive Platform Solutions 📅 08/2015 - 03/2016 📍 Chennai, India

Coordinated test management activities, ensuring efficient test planning, execution, and clear communication of status updates.

- Oversaw the execution of test plans, including installation and validation of the product under test, while adhering to QA methodologies and ensuring comprehensive test report documentation.
- Managed the final quality document sign-off for all stakeholders, ensuring alignment and communicating key lessons learned to the entire delivery team.
- Developed reusable functions to enhance the robustness, reusability, and maintainability of test scripts, improving automation efficiency.
- Coordinated with internal and external stakeholders to facilitate seamless knowledge transfer for both new and existing products, ensuring process stability and continuity.

Senior Test Engineer

HCLTech 📅 05/2006 - 08/2015 📍 Chennai, India

Managed test planning and execution while ensuring effective communication of progress and results to stakeholders.

- Managed bug tracking using Bugzilla 3.0, ensuring efficient defect reporting and resolution.
- Conducted testing of migrated components in C#, ensuring alignment with the existing VB system.
- Validated services and service patches in a C# environment, assessing their behavior against the VB system.
- Participated in test case reviews to ensure comprehensive test coverage and adherence to quality standards.
- Performed functional and regression testing, analyzing defects and providing detailed reports.
- Developed a Proof-of-Concept using the TOSCA automation tool to enhance test automation strategies.

EDUCATION

Master of Computer Applications

University of Madras 📅 04/2003 - 05/2006 📍 Chennai, India

Bachelor's Degree in Mathematics

Delhi University 📅 04/1998 - 04/2001 📍 New Delhi, India
