OBJECTIVE

Skilled and results-driven QA Test Engineer with 2.5 years of experience ensuring the reliability and quality of Mobile, Web, and ServiceNow applications through comprehensive manual and automated testing in Agile and Waterfall environments.

SKILLS

- **Testing Tools:** Selenium, TestNG, JMeter, Postman, SQL
- **Programming Languages:** Java
- **Managerial Tools:** JIRA, TFS
- **Testing Types:** Functional, Non-Functional, Smoke, Regression, Integration, UAT
- **Languages:** Tamil [R, W, S]; English [R, W, S]; Hindi [R, W]

WORK EXPERIENCE

Ava Software Pvt. Ltd

Jan 2023 - Present

- Developed and implemented thorough **test strategies**, creating detailed **test plans** and executing **test cases/scripts** to identify critical defects via **positive** and **negative scenarios**.
- Gained hands-on experience testing mobile applications across **Android and iOS platforms**, covering aspects such as Functional, UI/UX, performance and compatibility.
- Proficient in diverse testing types (**Smoke, Integration, Functional, Regression, UAT**) and skilled in defect tracking using **JIRA & TFS**, ensuring high-quality product delivery.
- Engineered **Selenium with Java** automation, leveraging a **Hybrid framework** and **TestNG** methodology for robust design, reducing manual effort and ensuring consistent, reliable testing.
- Proficient in utilizing **Postman** for **API** testing, and **JMeter** for **performance** and load testing of web applications and also in testing **SQL** queries for data validation and integrity.
- Planned and managed test data setups for various **real-time scenarios**, which helped minimize environment-related issues and improved the consistency of test results across platforms.
- Proactively implemented **Root Cause Analysis** (RCA) practices to **reduce defect** leakage and improve test coverage, leading to significant quality improvements and faster release cycles.
- Documented requirements, created user manuals, and **collaborated directly with clients** to align expectations with product delivery and applied **Agile** and **Waterfall methodologies** across the entire **SDLC**, ensuring comprehensive testing and timely delivery.
- Actively participated in **sprint planning** and backlog grooming sessions to ensure test coverage aligns with **business requirements**.
- **Achievements:** Earned direct client commendation for the on-time, issue-free delivery of two project phases, highlighting consistent quality and reliability.

EDUCATION

2019 – 2023

Bachelor of Engineering - Panimalar Engineering College
Specialization in Electronics & Communication | 9.12

CERTIFICATIONS

- Certified System Administrator (CSA)
