Kanyakumari , Tamilnadu, India

SKILLS

- **Programming** : Core-Java
- **Monitoring**: Prometheus
- **Containerisation**: Docker Kubernetes
- **SQL**: ORACLE, MSSQL
- **Operating System**: Linux ,
• Windows

SUMMARY

Experienced and skilled professional at managing functional and Performance testing. Committed to maintaining a stable and bug-free environment through comprehensive test coverage. Proven ability to collaborate with cross-functional teams to ensure seamless integration and delivery of high-quality software products.

WORK EXPERIENCE

Test Engineer Trainee

Volante Technologies - Jan 2023 - Present

Collaborated with cross-functional teams to identify and resolve performance bottlenecks, resulting in a 20% improvement in application's Payment response

BNYM-SPG: Worked on the project regarding SPG Payments for BNYM.

BNYM-SPG-MSP: Validated that the Payment Details and Data's have been archived from the Primary DB to a Secondary DB.

Done Performance Testing on VolPay-CORE-2x Containerization and provided the the required reports for the bottlenecks on the DB. Readiness and Liveness API setup has been done.

Used: ASB(Azure-Service Bus, MSSQL, AKS(Azure Kubernetes Service).

EDUCATION

- **Bachelor of Engineering - Mechanical engineering**

FX Engineering College

2018-2022

CGPA - 8.1/10

RBC-Royal Bank of Canada: Performance Testing has been done in the Fed-Now payments.

Performance testing has been done on Fed-Now Payments in the VM setup.

Containerization has been done for RBC with the Docker Kubernetes Service.

Readiness and Liveness setup has been done after validating the respective API's.

Auto-Scaling and Auto-Healing setup has been done for RBC and also has been validated while processing payments.
