Email ID: sona16061999@gmail.com

OBJECTIVE:

Enthusiastic Software QA Analyst with over 3 years of experience, having broad expertise in SDLC, Software Testing, and Agile methodologies. Highly skilled in testing tools like TFS and JIRA. Seeking to leverage my expertise in the healthcare domain to contribute effectively to innovative projects. Looking forward to applying my technical skills and passion for efficient technological solutions in a challenging environment.

EDUCATIONAL QUALIFICATIONS:

COURSE	INSTITUTION	YEAR OF PASSING	CGPA/ PERCENTAGE
B.Tech-IT	Velammal College of Engineering and Technology, Madurai. Anna University, Chennai.	2021	8.01
HSC	SBK Girls Higher Secondary School, Aruppukottai.	2017	92
SSLC	SBK Girls Higher Secondary School, Aruppukottai	2015	97

SKILLS:

- Programming Languages: Playwright JS, Selenium, HTML and CSS, C#, JavaScript, SQL
- Database Management: DB2 SQL server
- Healthcare Standards: HL7, HIPAA compliance
- Tools: Intersystem, AS400, Azure Board, Jira Board, Mirth Connect, Confluence, Postman

WORK EXPERIENCE:

Software Analyst - TVS Next

Chennai, Tamil Nadu

21st June 2021 to till date

Automation Testing:

- Developed and consistently updated automated test scripts for various web applications using Playwright JS
- Assisted in creating automated test cases for various web applications, gaining essential skills in test automation
- Implemented automated tests within CI/CD pipelines to ensure seamless deployment
- Reviewed test outcomes, identified defects, and worked closely with the development team to address problems

Manual Testing Projects:

Migration: Migrating a Legacy application (IBMI software) to an enhanced new application. This project aimed to improve the efficiency of patient care, streamline administrative tasks, and ensure compliance with healthcare regulations, including HIPAA.

Responsibilities:

- Successfully migrated over 25 interfaces from Mirth Connect to Intersystem
- Cross-Functional Collaboration with different teams and ensuring seamless functionality across different interface types
- Conducted thorough testing of HL7 messages to validate their compliance with industry standards and project requirements
- Effectively presented migration interface functionality to client during client demonstrations.

OE: The COVID Vaccination project allows end users to effortlessly schedule or create appointments for vaccine doses, and also offers convenient options for modifying or cancelling appointments

Responsibilities:

- Performed the manual Functional testing: Regression, Sanity and Smoke testing
- Dedicatedly involved in seamlessly working on more than 15 production pushes and effectively reproducing production issues in the QA environment.
- Executed SQL queries to validate database records as expected

PM: Practice Management schedules appointments for consults or follow-up visits and manages billing to ensure timely payments from patients and insurance companies. Also, managing patient records effectively, ensuring accuracy and confidentiality.

Responsibilities:

- Performed the manual Functional testing: Regression, Sanity, Smoke testing, Interface testing, Load Testing, Stress Testing, Cross browser testing, Mobile and iPad testing
- Tested orders and results processing functionalities to ensure accuracy and reliability in healthcare data exchange.
- Collaborated closely with development and business team to understand requirements and prioritize testing efforts
- Maintaining Regression suite and parallelly executed the testcases in TFS

ED: EHR provides full access to health records, while EDs collaborate with various departments such as radiology, laboratory, and blood bank and offer critical care to patients awaiting ICU transfer.

Responsibilities:

- Performed Smoke and Functional testing on every build of the application
- Tested order and result processing for accurate healthcare data exchange
- Tested the HL7 transaction and executed SQL queries to validate database records

PERSONAL DETAILS:
