

Professional Summary

With over 9.2 years of experience in the IT industry, including 6+ years specializing in performance testing, I have built a strong foundation in this field. Starting my career with 3.1 years of Selenium Automation Testing,

- Rich experience in covering End-to-End Performance Testing process such as Requirement Analysis, Workload Model Creation, Test Design, Test Script Creation, Test Execution & Analysis, POC (proof of concept), Performance Monitoring, Finding Bottlenecks and Result Analysis etc.
- Proficient in managing multiple deliverables independently and prioritizing tasks for successful project completion.
- Strong problem-solving aptitude and excellent time management skills for delivering end-to-end performance testing across multiple platforms using tools like Microfocus Load Runner & Performance Center, Neoload & Web, JMeter, Apploader (Scenario Builder), Storm Runner, Blaze meter.
- Expertise in performance engineering tools for monitoring and analysis from APM tools such as Appdynamics, Dynatrace, New Relic, ELK, Microsoft Azure, PerfMon & SCOM on servers under test including server log analysis.
- Expertise in testing and monitoring application using protocols like HTTP/HTML, Web Service (SOAP, Rest and API), Kafka, JDBC, SAP GUI, Ajax True client and Batch and MQ based applications and analysing the performance with upstream and downstream components.
- Excellent track record in preparing and executing performance test scripts for Load, Stress and Scalability test.
- Expertise in handling performance testing requirements for the applications hosted on Cloud (AWS, Azure).
- Proficient in debugging the user experience issues and Effective defect tracking and analysing the test results end to end.
- Detail-oriented team player with strong organizational skills. Ability to handle multiple projects simultaneously with a high degree of accuracy.

Technical Skills

Testing Tools & Web debugging Tools	HP Load Runner 12.X, Performance Center 12.X, JMeter-5.x, Neoload v9.x, Cloud Neoload Web, Apploader, Storm Runner, Soap UI, Blaze meter, Fiddler
Monitoring & Analysis	Elastic search, PerfMon, JVM, Appdynamics, Dynatrace, New relic, Microsoft Azure, SCOM and Confluence
Platforms	Windows XP, Windows Server 2003 R2 and Win 7
Language	C, Java (OOP Concepts)
Bug Tracking Tools	Jira, JFM and TFS (Team Foundation Manager)
Databases	SQL server, My SQL, DB2, Oracle 12, PostgreSQL, Dbeaver

Educational Qualification

B. Tech(Information Technology) from Anna University in VKK Vijayan Engineering College – 2013

Certification

Neoload Professional Certification

Work History

Wipro Ltd, Senior Software Test Engineer - 06/2022 to Currently Serving notices

- Involved in application on boarding activities, which includes non-functional requirement gathering, Proof of concept study.
- Monitored resolution of bugs, tested fixes, and helped developers tackle ongoing problems by providing QA perspective.
- Analyzed the feasibility of applications with Neoload.
- Created a detailed performance Test Strategy document.
- Participation in strategic discussions to identify the scope for Performance Testing.
- Designing the test scenarios spread across all components associated.
- Executed multiple rounds of load test to capture performance related metrics.
- Involved in formulating various Key Performance Indicators as per the metrics collected during test execution.
- Delivered executive Summary Report and make business stakeholders understand the performance test results.
- Optimized team performance with regular status updates, meetings, and process improvements that kept everyone focused on project goals.

Infinite Computer Solutions Ltd, Senior Software Test Engineer - 04/2021 to 05/2022

- Provided technical support using knowledge of complex technology to solve problems and support new projects.
- Improved end-user experience by conducting extensive usability testing on web-based applications.
- Performance Analyst develops Project Performance Test Strategy.
- Provide recommendations for improvement of application under test performance. Create Project Results Reports.
- Designs and creates performance tests scenarios and execute them in JMeter.
- Creates code for automated test cases, load and performance test cases and tests frameworks to execute test cases and report results.
- Work with developers to troubleshoot and resolve performance issues.
- During development, assess performance vs. design targets and help product development.

Career Net Technologies Pvt Ltd, Performance Tester – 12/2020 to 03/2021

- Understood the performance test requirements and application transactions.
- Involved in preparing performance test approach and test plan.
- Created test scripts using Neoload testing tool.
- Designed load test scenarios for various load conditions.
- Executed multiple rounds of load test to capture performance related metrics.
- Analyzed the performance test results for possible performance bottleneck and published test reports for every run.
- Prepared Performance test summary report.
- Incorporated delivery requirements into planning of testing schedules.

Adecco India Pvt Ltd, Performance Tester – 05/2018 to 05/2020

- Participated in project planning sessions, providing valuable input on performance requirements and potential risks associated with proposed solutions or architectures.
- Improved system performance by executing thorough testing and identifying bottlenecks.
- Monitored resolution of bugs, tested fixes, and helped developers tackle ongoing problems by providing QA perspective.

- Identified critical issues impacting overall system capacity, leading to more effective resource allocation decisions.
- Analyzed test results and provided recommendations for necessary adjustments, ensuring optimal application functionality.
- Developed custom test scripts for precise evaluation of application performance metrics.

Clarisys Technology, Software Engineer – 11/2013 to 04/2018

- Involved in Automation Framework Development implementing Page objects, Data Driven, Maven using Selenium Web Driver – Java and Junit.
- Automated Continuous Integration Scripts Failure Analysis after every build.
- Prepare reusable components to improve productivity and maintainability.
- Defect logging for failure scripts and tracking for closure.
- Mentoring team on enhancing automation skills and addressing technical challenges.
- Involved in the requirements elicitation process.
- Assisted my team in tracking all the clarifications raised to onsite until closure.
- Involved in bug fixing for the defects raised during UAT.
- Fixing the code review comments and helping team members.
- Automation Framework design and maintenance, setting up Automation Test for daily regression.
- Developing new scripts, Debugging and reviewing the automation test scripts.
- Working as an Automation engineer, working on Automation using Cucumber framework.

Personal Details

Date of Birth	09 Sep 1988
Gender	Male
Language Known	English, Tamil
