Profile Summary

Test Manager with 12 years of techno-functional IT expertise.

Passionate about delivering quality solutions through efficient testing strategies. Adept at leading cross-functional teams and navigating complex projects. Strong stakeholder management and planning skills.

Education

Bachelor of Technology in Electronics & Communications (April'2012)

SASTRA University, Tanjore, India

Skills

Technical Skills:

Testing Methodologies:

- Agile Project Management in Testing
- API Testing: SOAP UI, Postman
- Web Services Testing

Test Design and Execution:

- Test planning and execution
- GUI and backend testing for Desktop and Web applications
- Database Testing

Tools and Automation:

- HP Quality Centre
- JIRA
- SVN GitHub
- Visual Studio Eclipse
- Microsoft Azure ADO

Soft Skills

- **Leadership:** Spearheaded the turnaround of challenging, time-critical projects, delivering exceptional outcomes by leveraging expert leadership and strategic decision-making, resulting in a significant cost-saving of £6 million for Vodafone, UK.
- **Strategic Thinking:** Identified inefficiencies in the testing process and implemented new process & automation tools, leading to a 30% reduction in testing time & retest efforts.
- **Solution-based Approach/Problem Solving:** Transformed critical, struggling projects (Amber/Red) into thriving ones (Green) through innovative problem-solving and resource optimization. Achieved this without compromising quality or delivery standards, showcasing my ability to overcome challenges and achieve results.
- **Effective Communication:** Clearly communicated complex technical concepts to stakeholders. Leveraging my deep understanding of ground-level technical complexities, I lead my team to rapid resolutions during WAR calls and BRs by proactively identifying and communicating potential issues, minimizing project risks and optimizing outcomes
- **Time & Resource Management:** Successfully managed multiple projects simultaneously while meeting deadlines and staying within budget constraints.

Current Role:

Techno-functional Manager/Tower Lead in QA
(2019-Dec) –Present),
_VOIS ,Pune, India

Roles & Responsibilities/Achievements in current role:

- Enhanced code deployment pipeline by facilitating environment setup and code provisioning for various test instances, ensuring on-time

completion of system integration testing and UAT approvals for production releases.

- Led test management for diverse applications across various technology stacks, optimizing resource allocation and achieving 100% test coverage consistently.
- Collaborated effectively with cross-functional teams (development, product, stakeholders) to assess requirements, identify scenarios, and guide testing efforts for multiple agile projects, ensuring timely delivery within resource constraint.
- Mentored and empowered a team of 30+ testers, 10+ Test Leads resulting in a 60% improvement in test efficiency through streamlined processes and knowledge-sharing initiatives.
- Developed and implemented effective test strategies, analysed user stories, and guided exploratory testing plan.
- Prepared and delivered comprehensive test completion reports, walkthroughs for stakeholders and aligned environment support for defect analysis, optimizing the testing process.

Technical Expertise & Mentorship:

Rapidly mastered new applications and features for backend testing, enabling me to mentor teammates and upskill the team on required project areas.

Recruitment & Onboarding:

In a fast-paced IT environment, successfully recruited and onboarded 10 team members, equipping them with the necessary skills to hit the ground running and contribute to company growth within just 2 weeks.

Performance Recognition:

- Received multiple STAR awards in Vodafone for successful deliveries and consistent performance, demonstrating a strong track record of exceeding expectations.
- Consistently received positive feedback from Delivery Managers, stakeholders and service owners highlighting my dedication and commitment to achieving results

Work History in previous organization:

Project: US-based Telecom Project for Verizon India Client (Aug 2018 - Nov 2019)

Role: Test Lead SME - Regression & System Testing (CRM Applications)

Key Achievements:

- Led regression and system testing efforts for CRM applications at the client site, ensuring quality and stability.
- Identified and resolved logical defects/bugs in Java Microservices applications built on Spring Boot, Netflix OSS, and Kubernetes, contributing to improved application performance.
- Efficiently triaged and reported defect status through detailed reports (DSR/WSR), facilitating timely issue resolution.
- Gained extensive experience across various testing cycles (Unit, ST, SIT, UAT, ORT), demonstrating a comprehensive understanding of the software development lifecycle.
- Proactively conducted exploratory testing, successfully identifying critical defects before UAT, minimizing potential production issues.
- Developed and implemented effective training methods for new joiners, fostering knowledge transfer and team efficiency.

Project: British Airways Client UK- Applications Maintenance & Production Support (Jun 2014 - Jul 2018)

Role: Tech Lead/SME

Key Responsibilities:

- Led a team of 15 members in the maintenance and support of desktop and web applications built with C, C++, Java, and .NET.

- Managed both production issues and feature enhancements, ensuring timely resolution of high-severity defects (P1/P2) while meeting strict SLAs.
- Conducted thorough log analysis and traced XML data to diagnose and provide effective solutions to users.
- Performed comprehensive testing through ST, SIT, and UAT phases, ensuring smooth production deployments on Windows servers.
- Streamlined processes by automating repetitive tasks through batch scripts, resulting in significant cost, time, and effort savings.
- Successfully migrated Windows application servers from W2003 to W2008 and Oracle 12c, overcoming challenges like DLL mismatches, registry configurations, and compatibility issues.
- Earned recognition from Delivery and Portfolio managers for consistently exceeding expectations and delivering quality results.
- Demonstrated leadership during transitions, travelling for due diligence and efficiently onboarding new projects, applications, and team members.
- Implemented an improved incident management and triage process, leading to better problem resolution outcomes.

Project: UK Retail Domain Project for Phone4U Client (Jul 2012 - May 2014)

Role: Analyst

Key Responsibilities:

- Supported point-of-sale (POS) applications used by a major UK client across 400 stores, providing prompt resolution of L2 production issues.
- Performed root cause analysis (RCA) of identified environment and code issues, effectively triaging defects to L3 and L4 teams for escalated support.
- Communicated clearly and concisely, keeping higher management and the client informed through regular status reports and RCAs.
- Utilized incident/defect logging tools such as HP-ALM and BMC Remedy, ensuring efficient issue tracking and resolution.

I hereby declare that the information contained in this resume is accurate and complete to the best of my knowledge.
