Profile

I have 4 years of experience in Manual Testing. I have worked on web applications and mobile applications. In Web Applications, I have done functional testing and non-functional testing, regression testing and smoke testing, and Re-Testing. In mobile applications, I have done API testing. In API testing, I have used Postman, Swagger, and Fiddler. I have used the Jira tool to report the bug.

Description -

IT US Health industry. It comprises different ailment trials like Redhill, GSK, and NJOY. Their aim is to serve the US medicine industry for trials before the release into the market. The product comprises different questionnaires and stages as per the user requirements. The participants may fill out the questionnaire and if they are eligible for the study then they may keep track of their morning and evening tasks and come to a conclusion with the study.

May 2019 – December 2020
Ahmedabad, India

DOTinfotech, Junior QA Engineer

Description -

Lift&co is a project related to cannabis (drugs) based in Canada. This is used for selling cannabis online based on medical prescription or recreational. People use cannabis for energy, focus, exotic, and so on. This site is useful only for people who are above some criteria.

Ormae project is based on Truck Transportation in Dubai.

In this project, we can see how much time is taken by truck for cleanup, offloading, and many other functionality like Sharjah permission, truck location and etc.

The Poppies project is based on selling poppies in different countries with different shipping charges. It is basically a cart where we can buy poppies online. There is an admin panel and UI both for the Poppies project
