

SOFTWARE TEST ENGINEER

ABOUT ME

Over all 5+ years of experience and relevant i have 4 years of experience in the Software Testing domain, experience in all phases of Manual and Automation Testing. Experienced in Java Selenium, Bdd Cucumber, Tdd Testng, API(postman, Rest Assured), GitHub, SQL, Jira, Jenkins and creating the Bug report. Experienced in identifying gaps in current process and tools and suggest new ways to improve them Enjoy working in a fast-paced dynamic environment.

WORK EXPERIENCE

Hinduja Global Solutions Limited

(Feb 2018 to Aug 2019)

Yatel IT Solutions Limited

(Sep 2019 to Jan 2021)

Dtwelve Spaces Pvt Ltd

(Feb 2021 to Aug 2021)

Matrixcare India Pvt Ltd

(Sep 2021 to till date)

SKILLS

- Bdd- Cucumber
- Tdd- TestNg
- Jenkins
- JIRA
- API(Postman & Rest Assured)
- SQL
- GitHub
- Software Development Life Cycle
- Software Testing Life Cycle, Agile
- Waterfall
- Smoke Testing
- Regression Testing
- Black Box Tester
- System Integration Testing

EDUCATION

2019 - MBA (Human Resource Management) - 7.39 (CGPA)

2017 - BE-Electronics and Communication Engineering - 8.24 (CGPA)

PROFILE SUMMARY

- Extensive experience in Manual and Automation Testing.
- Hands on experience in **Test driven development (TDD)**, **Behavior driven development (BDD)** and acceptance test driven development.
- Implemented **Page Objects, Module** based frameworks using **Selenium WebDriver, Java, Cucumber**.
- Worked with **Jenkins tool** for achieving the **Continuous Integration**.
- Experience in designed Functional decomposition **TestNG framework**.
- Expertise in locating elements using **XPATH** and **CSS**.
- Excellent working experience of Software Development Life Cycle (**SDLC**), Software Testing Life Cycle (**STLC**) and testing methodologies like Waterfall & Agile/Scrum.
- **WebDriver** on multiple browsers and on different platforms.
- Worked With selenium grid to achieve parallel execution.
- Experience in creating and executing scripts in parallel and sequential using **WebDriver-TestNG** with Java.
- Collaborating with developers and other stakeholders to identify and resolve defects and issues
- Conducting **API** testing using tools such as **Postman**.
- Experience on Writing **SQL** queries to extract data from various source tables to perform database testing
- Experienced in designing and implementation of Various Frameworks in Selenium.
- Developed **test plans, test cases** and **test scripts** to verify system functionality.
- Critical thinker and problem-solver drives process improvements by scrutinising current system.

PROJECT I - SILKFRED

Testing Approach : Automation

Tools Used : Java Selenium, BDD Cucumber, API (Postman), API(Rest Assured), Jenkins, Github, SQL, Jenkins.

Role : Automation Engineer

Duration : From Oct 2021 – to Present

DESCRIPTION

SilkFred, an online fashion retail platform that sells fashion from independent and emerging brands. They funded the venture with seed funding from angel investors, with additional capital through crowdfunding platform Crowdcube and later private equity firm Livingbridge.

ROLES AND RESPONSIBILITIES

- Reviewed all the Requirement documents, Functional Specification and Use Case documents.
- Implemented automation using **Selenium WebDriver, JAVA, Cucumber, Maven**.
- Expertise in developing automation scripts in BDD format using cucumber and proficient in writing cucumber scenarios in **GHERKIN** format.
- Developed the features, scenarios, step definitions for BDD (Behavior Driven Development)
- Performed **Back-End Testing** for data validation using **SQL Queries**.
- Executed automated tests on Continuous Integration environment (**CI**) using **Jenkins**.
- Strong experience in Black Box and Gray Box testing. used **JIRA** as Defect
- Tested the application in highly dynamic environment with sprint team using agile methodology.
- Automated **Regression** Test cases using Selenium Web Driver, **Jenkins** and **Maven**. Used Firebug and Fire Path plug-ins to find the elements on the web page based on the element locator ID, Name, Xpath, Class Name, Path, Link Text, Partial link Text and **CSS Locator**.
- Jenkins** allows for the customization of regression test scenarios through the setting of parameters for builds.

PROJECT II - STANZA LIVING

Testing Approach : Automation & Manual

Tools Used : Java Selenium, TDD TestNg, Manual, Jira, Software Development Life Cycle Software Testing Life Cycle, Agile, Regression Testing.

Role : Automation Engineer

Duration : From Feb 2020 – to Aug 2021

DESCRIPTION

Stanza Living is a technology-enabled housing concept which provides fully-furnished residences with amenities like meals, internet, laundry services, The App enables to track referrals and earnings in real-time. All earnings are transferred directly to account at regular intervals, hassle-free.

ROLES AND RESPONSIBILITIES

- Verifies specific functionality after changes or fixes are made while perform **Manual Testing**.
- Used Apache Maven Surefire Plugin to create **JUnit/TestNG HTML** test report for the entire test suite.
- Develop and implement robust Selenium Page Object Model framework with Selenium WebDriver using Object Oriented Programming Java and open source unit test framework **TestNG** which cut down the script development time in half.
- Strong experience in **cross browser**, cross platform web testing with Selenium Web Driver.
- In Test Design, conditions that must be met before executing the test case.
- Test Plan specifies the goals of testing, including what you want to achieve and verify.
- In **TestNG**, a test method will only be executed if its dependencies are successful.
- Groups help in selectively running tests based on categories in **TestNG**.
- handling of cookies and managing session data can be done by **Selenium WebDriver**.
- Executed automated tests on Continuous Integration environment (**CI**) using **Jenkins**
- Selenium WebDriver can perform **data-driven testing** by integrating with external data sources.

PROJECT III - EFRONT

Testing Approach : Automation & Manual

Tools Used : JIRA, Java Selenium, Jenkins

Role : Manual Tester

Duration : From Sep 2019 – to Jan 2021

DESCRIPTION

eFront is an eLearning platform (also known as a Course Management System (CMS), or Learning Management Systems (LMS), or Virtual Learning Environment (VLE)). eFront has historically been coming in a number of editions, from an open-source edition to the latest eFrontPro edition (which is the only available one in 2018).

ROLES AND RESPONSIBILITIES

- Analyzing the business Requirements and Functional Requirements and identifying various test scenarios to be tested.
- Involved in the **Test plan** and **Test design**
- Good knowledge of all stages of software developmental life cycle (**SDLC**) and software testing life cycle (**STLC**), software developmental methodologies.
- Experience with **Agile Scrum and Waterfall** methodology.
- Maven enforces best practices and conventions for project structure
- Prepare the **Test scenarios, Test cases and Test data**
- Executing the Functional, non-functional Test case
- Logging the defects in **JIRA** and track the defects until it get resolved
- Retest the failed test cases and Regression Testing
- Extending my support to documentation

PROJECT IV - HGS

Testing Approach : Manual

Tools Used : JIRA, Java Selenium, Jenkins

Role : Manual Tester

Duration : From Mar 2019 – to Aug 2019

DESCRIPTION

Employee leave management portal is used for leave management administration in employees hands. We bring a secure portal for employees to access salary, overtime, leave, attendance, benefits, scheduling, biometric card reader data, logged hours and other HR data.

ROLES AND RESPONSIBILITIES

- Involved in the Test plan and Test design
- Good knowledge of all stages of software developmental life cycle (**SDLC**) and software testing life cycle (**STLC**), software developmental methodologies like waterfall model, V model and Agile methodologies.
- Experience with Waterfall methodology.
- Prepare the Test scenarios, Test cases and Test data
- Executing the **Functional Test case**
- Logging the defects in **JIRA** and track the defects until it get resolved
- Retest the failed test cases and **Regression Testing**
- Preparing the Test execution reports for pass and failed test cases
- Send Daily reports to the Manager

DECLARATION

I hereby declare that all the information given above is true and correct to the best of my knowledge.

Your faithfully

(Swathika)
