Professional Summary

Over 15 years of experience as a Senior QA Manager, I've honed my skills in delivering top-tier software solutions, consistently exceeding client expectations. My expertise spans developing and implementing testing strategies across diverse projects, optimizing processes, and upholding rigorous standards.

Proficient in Java, .Net, and Python, I leverage AI in testing to enhance efficiency and precision. Holding certifications such as ISTQB Certified Test Manager and Agile Scrum Master, I'm committed to excellence in quality assurance. I specialize in refining testing best practices like Defect Prevention and Control, ensuring alignment with project goals and industry standards.

Collaborating closely with cross-functional teams, I've overseen testing for 30+ projects across web and mobile platforms. Leading teams of over 80 members with varying skill sets, I'm dedicated to achieving excellence at every turn.

AI-driven testing processes implemented and regularly evaluate their effectiveness in meeting predefined goals and objectives

Utilizing Generative AI, we crafted test scenarios and automation scripts, which significantly reduced the workload for team members by approximately 40%

Work Experience

Changepond Technologies Pvt Ltd – 2011 – Till now

Current Role: Senior QA Assurance Manager
