

Vaishali Jayaraman

Quality Assurance Engineer | Senior QA

(M): 7708704397 | Email: vaishjshalu14@gmail.com | Address: Chennai, India

PROFESSIONAL SUMMARY

As an **Senior Quality Analyst (QA)** with **8+ years** of expertise in **Functional and Video Testing** across a **diverse range of devices**, including **Android (Mobile, Tablets, MI BOX)**, **Fire OS (Kindle, Fire Tablet, FireTV, Echo)**, **ROKU**, and **iOS (Tablet, Apple TV)**. Proficient in **log capturing and analysis**, with a strong background in **reporting and auditing test cases**. Adept at ensuring seamless performance across multiple platforms, detail-oriented approach to quality assurance, delivering reliable results in dynamic and complex testing environments.

TECHNICAL & TESTING SKILLS

Testing Types: Functional Testing, Smoke Testing, Sanity Testing, Regression Testing, Database Testing System Testing, UAT, BAT, Exploratory Testing, Monkey Testing, Blackbox Testing, Stress Testing, Performance Testing, Stability Testing, Compatibility Testing

Test Management & Planning: Test Planning, TestRail, XRAY, Jira, Kanban Board

Tools & Technologies: Jenkins CI/CD , Confluence, Python ,Git & Github, Postman

Methodologies & Processes: SDLC, Agile

WORK EXPERIENCE

Brightcove, Chennai

Aug 2020 - Present

Role: Quality Assurance Engineer

Responsibility:

Project 1: STV

- Validated Brightcove's new product across multiple STV devices, including MI BOX (Android), Fire TV (Fire OS), Roku, Apple TV (iOS), and LG webOS, leading to a 15% reduction in post-launch defects.
- Followed Agile methodologies, including Scrum, and participated in test-driven development, leading to a 15% improvement in sprint velocity.
- Coordinated with clients to prepare test cases, ensuring software compatibility and reducing test execution time by 20%.
- Performed CMS testing, validating content delivery and management, contributing to increase in content delivery accuracy.
- Enhanced understanding of the CI/CD pipeline, which streamlined testing and deployment processes, leading to a 15% reduction in deployment failures.

Project 2: Roku

- Updated customer channels on Roku whenever a new build version was available for the application.
- Conducted deep linking tests for apps using the Roku Deeplinking Tester tool.

- Validated content accuracy and performance using the Roku Stream Tester.
- Tested and optimized playback functionality for VOD, SVOD, and TVOD content, achieving a 98% success rate in seamless playback across platforms.
- Executed CSAI and SSAI VOD and Live content tests with precise validation of analytics events, resulting in improved accuracy of analytics data by 20%.
- Conducted live streaming tests on Roku, Android, and Smart TV platforms, contributing to a 10% increase in live stream stability and user satisfaction.
- Supported daily operational activities by drafting and executing Use Cases, creating Test Suites, and managing Test Execution in XRAY, resulting in a 20% increase in testing efficiency.
- Audited test cases created by the team, ensuring accuracy and completeness, which reduced defect leakage by 25%.
- Generated detailed reports and status updates, facilitating effective tracking of progress and quality, which accelerated issue resolution time by 30%.

Amazon Development Centre, Chennai

Jul 2016 – Jul 2020

Role: Testing Engineer/ QA Engineer

Responsibility:

Project 1: End-to-End Multimedia Testing

- Conducted comprehensive Multimedia Testing across multiple generations of Tablets, Fire TVs, and Smart TVs.
- Set up AVLS (Audio/Video Lab Setup) for new-generation devices.
- Ensured device compatibility for various audio and video codec formats, checking for audio/video stutters, garbage, and glitches.
- Tested app compatibility for Amazon 1P apps and top 5 3P apps, focusing on multimedia performance across different devices.
- Performed AV Sync checks on devices, verifying sync accuracy across 1P and 3P apps like Amazon Video, Music, Pandora, iHeartRadio, Netflix, HBO GO, Hulu, YouTube, and Starz.
- Used Phidget board to fetch AV Sync objective values for audio/video lag/lead.
- Conducted BAT (Build Acceptance Testing) on different generations of products daily to ensure quality.

Project 2: 3P Tablet App Certification

- Conducted Compatibility Testing for multiple 3P apps on Kindle devices, Fire TVs, and Smart TVs across different generations.
- Ensured seamless app performance and compatibility on a variety of devices, focusing on user experience.

Project 3: Kindle Device Performance

- Tested Amazon Kindle devices under various temperature conditions (0, 30, 40 degrees) by downloading multiple books.
- Verified ghosting issues across different book formats.
- Used an electronic USB debug board to capture manual values, comparing them with baseline values.
- Audited and reported any deviations from baseline values to stakeholders, ensuring device performance and reliability.

Project 4: Stability Testing for Fire TV/Tablet Devices

- Performed Stability Testing on Fire TV and Tablet devices by running the Monkey test suite.
- Analyzed crashes and log failures observed during Stability Monkey Testing to enhance overall customer experience.
- Utilized tools such as Pivot, Jira, and Confluence for tracking and reporting.
- Fetched device logs from the logs portal using Linux commands and communicated findings to relevant stakeholders.

OWNERSHIP / SPOC

Team Ownership : Led a team of 5 QA professionals as a Senior QA, driving quality assurance efforts and ensuring the delivery of high-quality products. Provided mentorship, set testing strategies, and coordinated with cross-functional teams to achieve project goals efficiently.

Scrum Master : Served as Scrum Master, facilitating daily standups, sprint planning, and retrospectives, ensuring adherence to Agile practices.

Inventory Owner : Reporting and Auditing of team's testing devices and other equipment used among the team. Procuring new devices for team.

Knowledge Management : As part of KM team, taking care of onboarding training, Organising/ Hosting bug bash internally as well as across all teams, organising technical session.

ADDITIONAL SKILLS

- Problem Solving
- Communication
- Documentation
- Innovation
- Strong Understanding & Team Collaboration

EDUCATION

2011-2015

Vel Tech , Chennai

Bachelor of Engineering (EEE)
