Resource Management
Metrics

Quality Assurance
Requirement Gathering
Risk & Mitigation
KPIs & Progress Monitoring
Team Leadership / Trainings
Mobile Testing (iOS & Android)
Test Automation
Document repository
Accountability
Invoicing

Technical:

Databases: MySQL, Oracle, MongoDB
Platforms: Windows, Mac, iOS, Android
IDE: Eclipse, Visual Studio
Test Tools: JMeter, Selenium, Squish, Eggplant
Project management tools: Jira and Radar
Other tools: OmniPlan, FTS, Confluence, Connectme, Quip and Box, MS Office

PROFESSIONAL SUCCESS

Nov 2021 – Apr 2022: TCS, Hyderabad
Associate Consultant

Key Projects:

Title: Business process re-engineering
Client: Apple Inc.
Period: Mar 2021 – Apr 2022

Role: Business Process re-engineering executive

Responsibilities:

- Validating the labels and provide approvals for the goods
- Validating the E2E process of on boarding new OEM

**Nov 2007 – Sep 2021: Quest Global Engineering Services Pvt. Ltd., Bangalore/Hyderabad (Exilant Technologies Pvt. Ltd.)
Technical Manager (Quality Assurance Manager)**

Key Projects:

Title: Apple HR Project Releases

Client: Apple Inc.

Period: Jan 2008 - Nov 2016; May 2019 - Sep 2021

Role: Quality Assurance Manager

Synopsis: The project dealt with working on HR Applications, been used internally by Apple Employees in terms of maintaining employee's personal & professional information, time & attendance and so on. Below applications were tested for various releases viz. Merlin, myPage, TCP, G2 (Payroll), TAP, Incorta, ATP, WFM and Kronos

- Directed testing efforts as the leader of the Auto Functional Test Team; pivotal in overseeing both manual and automated testing for system testing
- Headed testing activities for Web services API, whilst utilizing a robust testing framework and ensuring thorough and effective testing procedures
- Implemented Agile-Scrum methodology, ensuring a streamlined and iterative approach to project management
- Led resources efficiently throughout the project lifecycle, including estimation, deployment, and on-going resource supervision
- Developed, documented, and implemented rigorous processes for testing, ensuring adherence to established standards
- Facilitated & chaired client leadership meetings, provided a platform to discuss project status, address issues, and offer projections
- Took charge of highlighting and escalating critical issues, collaborating with the client team to promptly resolve challenges, and reporting to Client management as necessary

Title: Apple Finance & Admin Applications

Client: Apple Inc.

Period: Jan 2017 – Apr 2019

Role: Quality Assurance Manager

Synopsis: The project aimed at working on Finance & Admin Applications entailing CLM, GMACC, eSign, AICM, AMFT, Pathfinder, eCost, ASTMS and Lorax

CLM: A worldwide IS&T supported system that provided Apple Sales and Contracts with a centralized repository for the life cycle management of sales customer contracts as well as a library for the management of contract clauses and templates. It included developing approval workflows, notifications; defining meta-data variables used to facilitate search and reporting as well as obligational term integration with downstream systems

eSign: An IS&T supported corporate electronic signature capture application. This application supported scalability and integration with various enterprise IS&T supported solutions such as CLM Sales and Procurement. It was a service-oriented application intended to be used by other groups at Apple

GMACC: A solution to build and manage the worldwide contract and customer data repository for Apple's Channel Customers through approvals & routing. After all the approvals, customer data was integrated with SAP Customer Master. This application will also provide the customer master data to all the downstream applications

eCost: A cost information system formed from the merging of two older applications, namely CPT (Cost Projection Tool) and CST (Cost Scrub Tool) used by the Costing groups in Apple

- Spearheaded comprehensive testing initiatives, including System, Exploratory and Regression, thus ensuring thorough coverage of product functionalities
- Formulated, reviewed, and meticulously documented test scenarios, test plans, and procedures; crafted test cases aligned with product release features, client requirements, and relevant technical documentation
- Orchestrated sprint retrospective meetings, daily stand ups, and weekly functional review meetings, fostered seamless coordination and communication within the team
- Collaborated with technical designers & architects to comprehend requirements for test environment setup and data preparation
- Exhibited proficiency in risk management by identifying, opening, prioritizing, following up, and successfully closing risks
- Actively participated in the Exploratory testing effort, integrating multiple functional groups to enhance the testing process
- Conducted Cross-platform and Cross-Browser testing to ensure application compatibility across various environments
- Took charge of the Mobile testing effort for the eSign application within the project
- Contributed to the effort to formulate diverse regression test suites, catering to the automation team's needs and preparing for future releases

INITIAL CAREER GLIMPSE

Jan 2001 – Dec 2006: Shiva Krishna Degree College || Non-teaching Faculty

Jan 1999 – Oct 2000: Sri Sai Finance || Accountant

EDUCATION & CREDENTIALS

Bachelor of Science – Computers | Nagarjuna University, Guntur, Andhra Pradesh Year: 1998
