PROFILE

Dedicated and results-driven Cypress Automation Engineer with 3 years of hands-on experience in designing, implementing, and maintaining automated test scripts. Proven track record of improving testing efficiency, reducing defects, and ensuring software quality. Seeking an opportunity to contribute technical expertise and innovation in a challenging automation role.

WORK EXPERIENCE

WNS Global Solutions

2021- 2024

Automation Engineer

Project #1 E-commerce project

- Collaborate with the QA lead and product owner to understand requirements and define test scenarios for critical user flows such as product search, adding items to cart, and checkout.
- Identify edge cases, boundary conditions, and potential failure points to ensure comprehensive test coverage.
- Configure test environments that mirror production as closely as possible, including databases, server configurations, and third-party integrations like payment gateways.
- Write Cypress test scripts to automate end-to-end testing of key user journeys such as, Searching for products by category and keyword.
- Adding products to the cart and verifying cart contents
- Proceeding through the checkout process, including guest and registered user scenarios.
- Utilize Cypress' built-in support for parallel test execution to speed up testing across different environments.
- Verify proper handling of error scenarios, network timeouts, and service disruptions. Validate interactions.
- Execute tests across multiple browsers (Chrome, Firefox, Safari) and devices (desktop, tablet, mobile) to ensure compatibility and responsiveness.
- Validate interactions with third-party services and APIs, such as payment gateways and inventory management systems, through API testing and mocking.
- Continuously monitor test results and triage failing tests to identify regressions or defects introduced by code changes.

EXPERIENCE

- WNS GLOBAL SOLUTIONS
(Oct 2021-2024)

- Integrate Cypress tests into the CI/CD pipeline using Jenkins or another CI tool to automate test execution on each code commit and deployment to staging and production environments.
- Conduct performance tests to evaluate the website's responsiveness and scalability under different load conditions, using tools like Cypress Network Requests and custom commands to measure response times and resource utilization.
- Configure notifications and alerts for test failures to enable rapid feedback and troubleshooting.
- Document test cases, test data, and automation scripts to facilitate knowledge sharing and onboarding of new team members.
- Update test scripts and fixtures as needed to accommodate changes in the website's functionality or user interface.
- Participate in daily stand-ups, sprint planning, and retrospective meetings to provide updates on testing progress, raise any blockers or issues, and collaborate with other team members to prioritize tasks.

DECLARATION

- I hereby declare that the above particulars of facts and information stated are true, correct and complete to the best of my belief and knowledge.
