

VIGNESH S

SOFTWARE ENGINEER

 vigneshyadav.s01@gmail.com

 +91 7339669738

PROFILE

A dedicated and detail-oriented Test Engineer with 2.7 years of experience in manual and automation testing. Proficient in using Java and Selenium WebDriver for building robust test automation frameworks. Experienced in analyzing requirements, creating test plans, and writing the test cases, and ensuring high-quality deliverables. Strong knowledge of TestNG, Maven, Jenkins, and completely worked on Agile methodologies. Adept at defect tracking and reporting using tools like JIRA and proficient in working with version control systems like Git.

EDUCATION

BSC - Physics **2018 - 2021**
Nandha Arts and Science College
Bharathiar University
Erode

SKILLS

- Core Java
- Manual, Automation Testing
- SDLC/STLC
- TestNG, BDD Cucumber
- Data driven, Apache POI
- API Testing
- Rest Assured
- HTML, CSS, JavaScript
- Databases : Mysql

TESTING TOOLS

- Selenium web driver
- Maven
- JIRA
- API Postman
- Jenkins
- Eclipse - IDE

METHODOLOGIES

- Agile - Scrum

VERSION CONTROL

- Git
- GitHub

WORK EXPERIENCE

UNITEL SOFTWARE LIMITED
SOFTWARE ENGINEER

Dec 2022 - Present

Key Responsibilities :

- Software Engineer with 2.3 years of experience in manual and automation testing of web applications.
- Expertise in Selenium WebDriver, Java, BDD Cucumber, TestNG with integration of POM and Data-Driven framework.
- Knowledge in JavaScript and Automation frameworks for frontend and backend testing.
- Experience in writing test scripts, debugging, and reporting defects in Agile environments.
- Experience in API automation testing using REST Assured and handling different types of API requests (GET, POST, PUT, PATCH, DELETE).
- Collaborate with cross-functional teams for CI/CD pipeline implementation using Jenkins, Maven for build management, Git for version control, and JIRA for defect management.

INFOSYS
OPERATION EXECUTIVE

Jul 2022 - Nov 2022

Key Responsibilities :

- Completed a 4 month training program, including 1 month of hands-on experience in manual testing, where I gained practical knowledge in Executed test cases, evaluated results, reported defects while participating in RTM preparation and and validation of web applications.
- Experience in functional, regression, UI, and cross-browser testing while collaborating with developers for issue resolution.

Company : Unitel Software Limited

Project : Banking Platform Testing

Client : Brookline Bancorp

Duration : Jan 2023 – Jul 2024

Project Description:

The Brookline Bancorp web platform is designed to provide banking and financial services, including online account management, fund transfers, loan applications, and customer support. The project focuses on ensuring a seamless user experience by verifying core banking functionalities, security compliance, and usability aspects through manual testing.

Responsibilities:

- **Requirement Analysis:** Review and analyse enhancement requirements to define comprehensive test scenarios.
 - **Test Case Design & Execution:** Develop and execute detailed manual test cases to validate new features and enhancements.
 - **Regression Testing:** Conduct extensive manual regression testing to ensure that existing functionalities remain unaffected after enhancements.
 - **Functional & UI Testing:** Verify the functionality, usability, and consistency of the platform across different user workflows.
 - **API Testing:** Perform manual API validation using Postman, ensuring proper request - response handling and data integrity.
 - **Bug Tracking & Reporting:** Identify, document, and track defects in JIRA, collaborating with developers for issue resolution.
 - **Git & GitHub:** I used Git to keep track of test files, scripts, and documents, making sure everything was version-controlled and easy to find. I also worked with the development team on GitHub to manage test cases, track issues, and review any test-related updates.
 - **Cross-Browser & Compatibility Testing:** Ensure the application functions seamlessly across different browsers and devices.
 - **Database Validation:** Validate data consistency and integrity by performing manual backend verification using MySQL.
 - **Agile Collaboration:** Actively participate in daily stand-ups, sprint planning, and retrospectives to align testing efforts with Agile development cycles.
 - **Compliance & Security Testing:** Ensure the platform adheres to regulatory and security guidelines by performing compliance-based validation.
-

Company : Unitel Software Limited

Project : E-Learning Platform Automation

Client : EduMaster Academy (Fictional Client)

Duration : Aug 2024 – Present

Project Description:

This project focuses on testing an e-learning platform that enables students to enroll in courses, attend live or recorded sessions, take assessments, and receive certifications. The platform provides features like user authentication, course recommendations, payment gateway integration, interactive quizzes, and a comprehensive admin panel for managing courses, students, and instructors. The objective is to ensure a seamless user experience through functional, regression, and API testing, improving overall platform stability and usability.

Responsibilities:

- **Requirement Analysis:** Understand enhancement requirements and define test scenarios.
- **Test Automation Development:** Design and update automated test scripts using Selenium WebDriver, TestNG, and Cucumber.
- **Regression Testing:** Ensure existing functionalities remain intact after enhancements.
- **API Testing:** Validate API responses using Postman and REST Assured.
- **Bug Tracking & Reporting:** Log and track defects in JIRA, collaborating with developers for fixes.
- **CI/CD Integration:** Execute automated tests in Jenkins for continuous testing.
- **Database Validation:** Perform backend data validation using MySQL.
- **Framework Maintenance:** Enhance the Hybrid Test Automation Framework (POM + Data-Driven).
- **Cross-Browser Testing:** Ensure compatibility across multiple browsers and environments.
- **Agile Collaboration:** Participate in daily stand-ups, sprint planning, and retrospectives in an Agile environment.
