EDUCATION

Bachelor of Engineering- CSE

Kamaraj College of Engineering and Technology, Madurai

2019 - 2023 CGPA: 7.9

HSC

VHN Higher Secondary School

2018 - 2019 Percentage: 72

SSLC

VHN Higher Secondary School

2016 - 2017 Percentage: 88

SKILLS

- Programming Skills: C, Python, Basics of Java, HTML, CSS, JavaScript
- Requirement Analysis
- Script Development
- Test Specifications
- Test Case Design
- Manual Testing
- System Testing
- Agile Methodology
- Bug Reporting and Tracking
- Automation Testing

LANGUAGE

- English: Fluent
- Tamil: Native
- Malayalam: Beginner

DECLARATION & SIGN

I hereby confirm that all the information provided above is true to the best of my knowledge.

PROFILE

A motivated and experienced QA Engineer with experience from June 2023 to January 2025 in manual and automation testing. I am seeking a challenging position where I can apply my skills in testing and software development to contribute to the quality of a product.

WORK EXPERIENCE

QA Engineer, Tata Elxsi
Trivandrum, Kerala

Jul 2023 - Jan 2024

Project 1: JLR -HMI Testing - Body Control Module (BCM)

Role: Manual Tester

- Gained insights into HMI and BCM concepts with mentorship, improving testing skills.
- Translated specifications into test scenarios, enhancing QA processes.
- Automated testing tasks using Python, increasing workflow efficiency.
- Reduced manual testing efforts with automation solutions, improving productivity.
- Tackled MATLAB tasks, demonstrating adaptability and continuous learning.

Project 2: Diagnostics Testing

Feb 2024 - Sept 2024

Role: System and Software Tester

- Reported bugs and collaborated with developers to resolve issues quickly.
- Developed and documented test cases in JIRA for comprehensive test coverage.
- Managed testing progress and updated documentation to reflect process improvements.
- Evaluated protocols including CAN, FlexRay, and DoIP for application performance.

Project 3: Training Zone Website

Oct 2024 - Jan 2025

Role: Software Tester

- Designed regression test suites to ensure new features did not affect existing functionality.
- Created test cases from application requirements and user stories for full UI coverage.
- Automated repetitive tests, integrating them into CI/CD pipelines to streamline testing.
