Profile Summary

I bring with me a diverse and enriching professional journey spanning several esteemed organizations. Currently, I have been with Source HOV since December 2018, contributing Sr. Test Lead to the team. Prior to this, my tenure at Infosys from April 2017 to June 2018 equipped me with valuable insights into Consultant.

My extensive experience with Wipro Technologies, where I served from June 2010 to April 2017, honed my skills in Sr. Test Lead. Earlier in USA, I held the role of Senior Engineer at LatticeBridge Infotech Pvt Ltd, Chennai, from June 2007 to May 2010, where I worked as System Engineer.

Additionally, my roles at FirstSource Solution Ltd, Chennai, Chennai, and HCL BPO Service Ltd, Chennai, have provided me with a solid foundation in BPO, where I consistently demonstrated quality outputs.

This cumulative experience has not only enriched my professional repertoire but has also instilled in me a deep appreciation for collaboration, innovation and continuous growth.

diverse domains including Finance, Accounts Receivable, Retail, Media, Telecom, Securities, Automobiles, Healthcare, and F&A, I have demonstrated proficiency in Agile (Scrum), V-model, and Waterfall methodologies. My roles have extensively involved coordinating testing teams for Integration, System, Regression, Back-end, UAT, and Business Shakeout testing. I possess expertise in Manual/Functional Testing, Automation Testing, and have utilized HP ALM/Quality Center (QC), HP Quick Test Professional (QTP), Cucumber, and Data warehousing tools.

Furthermore, I have a deep understanding of QA Methodologies, Quality Assurance Life Cycle (QALC), Defect Management Life Cycle, and Software Development Life Cycle (SDLC) methodologies. My skills extend to writing SQL queries for data validation in DB2 and SQL Server, backed by certifications in Mainframe and software testing, along with knowledge in Data warehousing.

In leadership roles, I've successfully managed global testing teams of 20 individuals, both offshore and onshore, within challenging environments and client-facing roles. I am adept at closely collaborating with direct business users to gather and understand requirements, ensuring the quality of project deliverables from an end-to-end standpoint. Additionally, I excel in managing evolving requirements throughout the project lifecycle, encompassing estimation, test planning, test scenarios, test case development, test data preparation, test execution, and comprehensive test reporting.

I have extensive experience with various databases including IBM DB2, Oracle, SQL Server, MS-Access, and Azure cloud. Proficient in database management, I utilize tools such as Toad and SQL Developer. In automation, I leverage Selenium, and for version control, SVN Tortoise. My testing toolkit comprises HP ALM/QC, Rally, Team Track, JIRA, Bugzilla, Hudson Confluence, POSTMAN API, and Eclipse. Operating across Windows and Mac IOS environments
